**Bibliography of Agriculture with Subject Index** ,1988-10      **Agriculture and Human Values** ,1984

**Bibliography of Agriculture** ,1990      *Animals and Women* Carol J. Adams, Josephine Donovan, 1995-11-14 *Animals and Women* is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women's rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such

issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women      *Animal Behaviour and Animal Welfare Ethics* Mr. Rohit Manglik, 2024-06-24 This book explores behavioral patterns of animals and the ethical considerations surrounding their treatment aiming to promote humane practices in research farming and wildlife conservation      **Animals Property & The Law** Gary Francione, 2012-06-20 Pain is pain irrespective of the race sex or species of the victim states William Kunstler in his foreword This moral concern for the suffering of animals and their legal status is the basis for Gary L Francione's profound book which asks Why has the law failed to protect animals from exploitation Francione argues that the current legal standard of animal welfare does not and cannot establish fights for animals As long as they are viewed as property animals will be subject to suffering for the social and economic benefit of human beings Exploring every facet of this heated issue Francione discusses the history of the treatment of animals anticruelty statutes vivisection the Federal Animal Welfare Act and specific cases such as the controversial injury of anaesthetized baboons at the University of Pennsylvania He thoroughly documents the paradoxical gap between our professed concern with humane treatment of animals and the overriding practice of abuse permitted by U S law      **Eco-Wars** Ronald T. Libby, 1999-03-19 Can grassroots interest groups ever win the wars they wage in the political arena against big business in America Praised by some as a crucial component of the democratic system and criticized by others as stubborn single issue factions that pose a threat to the equitable progress of political change interest groups are considered by many detractors to have a success rate directly related to their alliance with wealthy powerful corporations As Ronald T Libby asserts in *Eco Wars* viable strategies are available to environmental food safety animal rights gun control and other organizations that seek to challenge business interests in the political arena Employing newly released documents culled from five non business related alliances with mostly social concerns known today as expressive interest groups Libby examines how they confront powerful industries *Eco Wars* investigates an antibiotechnology campaign aimed at drug companies an animal rights effort directed against the agricultural industry an anti pesticide campaign focused on the chemical industry a property rights fight against environmental groups and a secondhand smoke campaign opposing tobacco companies Drawing upon previously classified files *Eco Wars* also draws from interviews with both activists and the industry representatives they oppose With his balanced analysis Libby goes beyond the polemical nature of much work on this subject offering a new avenue for research in the social sciences and a useful tool for interest groups      **Animal Welfare and Ethics Resources for Youth and College Agricultural Educators** , 2000
