Food and the Memory Harlan Walker, 2001 This is the eighteenth volume of the ongoing series of papers and submissions to the Oxford Symposium on Food Cookery the longest running food history conference in the world The subject this year is more speculative than is often the case and contributors have ranged widely over a topic which allows them to explore the psychological bases of food consumption and the development of cookery as well as more obvious excursions down memory lane in pursuit of food and drink

The Oxford Handbook of Evolutionary Medicine Martin Brüne, Wulf Schiefenhövel, 2019-01-31 Medicine is grounded in the natural sciences where biology stands out with regard to our understanding of human physiology and the conditions that cause dysfunction Ironically though evolutionary biology is a relatively disregarded field One reason for this omission is that evolution is deemed a slow process Indeed the macroanatomical features of our species have changed very little in the last 300 000 years A more detailed look however reveals that novel ecological contingencies partly in relation to cultural evolution have brought about subtle changes pertaining to metabolism and immunology including adaptations to dietary innovations as well as adaptations to the exposure to novel pathogens Rapid pathogen evolution and evolution of cancer cells cause major problems for the immune system Moreover many adaptations to past ecologies have actually turned into risk factors for somatic disease and psychological disorder in our modern worlds i e mismatch among which epidemics of autoimmune diseases cardiovascular diseases diabetes and obesity as well as several forms of cancer stand out One could add depression anxiety and other psychiatric conditions to the list The Oxford Handbook of Evolutionary Medicine is a compilation of up to date insights into the evolutionary history of ourselves as a species exploring how and why our evolved design may convey vulnerability to disease Written in a classic textbook style emphasising physiology and pathophysiology of all major organ systems the Oxford Handbook of Evolutionary Medicine is valuable reading for students as well as scholars in the fields of medicine biology anthropology and psychology

Indigenous Environmental Knowledge John Edington, 2017-09-05 This book examines comprehensively for the first time the scope and accuracy of indigenous environmental knowledge It shows that in some spheres including agriculture house design fuel and water manipulation the high reputation of local observers is well deserved and often sufficiently insightful to warrant wider imitation However it also reveals that in certain matters notably some aspects of health care and wild species population management local knowledge systems are conspicuously unsound Not all the difficulties are of the communities own making some stem from external factors outside their control However in either case remedial measures can be suggested and this book describes especially for the benefit of practitioners what steps might be taken in rural communities to improve the quality of life The possibility of useful transfers of information from local settings to Western ones is not ignored and forms the subject of the book s final chapter

The Evolution of Childhood Melvin Konner, 2011-11-30 This book is an intellectual tour de force a comprehensive Darwinian interpretation of human development Looking at the entire range of human evolutionary history Melvin Konner tells the compelling and complex story of how cross cultural and universal characteristics of our growth from infancy to adolescence became rooted in genetically inherited characteristics of the human brain All study of our evolution starts with one simple truth human beings take an extraordinarily long time to grow up What does this extended period of dependency have to do with human brain growth and social interactions And why is play a sign of cognitive complexity and a spur for cultural evolution As Konner explores these questions and topics ranging from bipedal walking to incest taboos he firmly lays the foundations of psychology in biology As his book eloquently explains human learning and the greatest human intellectual accomplishments are rooted in our inherited capacity for attachments to each other In our love of those we learn from we find our way as individuals and as a species Never before has this

intersection of the biology and psychology of childhood been so brilliantly described Nothing in biology makes sense except in the light of evolution wrote Dobzhansky In this remarkable book Melvin Konner shows that nothing in childhood makes sense except in the light of evolution HOV Evaluation and Monitoring, Phase III William W. Brown, Graciela Etchart, Eldon L. Jacobson, 1996 **The Longevity Factor** Joseph Maroon, 2008-12-30 A groundbreaking examination of new scientific research that holds the secret to weight loss increased strength endurance memory and a healthier longer life In The Longevity Factor noted neuroscientist and surgeon Joseph Maroon M D offers the definitive look at recent scientific breakthroughs identifying a group of natural substances including the much publicized molecule resveratrol that can actually activate a specific set of genes in humans that promote a longer healthier life These substances which make red wine dark chocolate and green tea good for us appear to stave off a wide array of age related diseases and keep us feeling young and vital Resveratrol is the centerpiece of headline making research being conducted at the Harvard Medical School and elsewhere Only recently however have scientists discovered how to isolate resveratrol and concentrate it into an affordable and safe supplement Already more than 200 supplements featuring resveratrol have flooded the market and there are countless more on the way But which ones work best What is a consumer to look for on the label Since resveratrol is a natural substance can you get enough of it through diet alone or should you combine diet with a supplement And what lies on the horizon from the pharmaceutical industry All those questions and many more are answered in this immensely informative and practical book Joseph Maroon offers the first ever inside look at the amazing research that has led to the discovery of resveratrol and similar substances with the miraculous ability to activate our own longevity genes He also offers his own diet plan and sound reader friendly advice for living a longer healthier and more balanced life with or without supplements The Longevity Factor promises to be the authoritative source for everyone who wants to know more about how we can shift from the current paradigm of aging to a disease free golden age of health longevity and fitness Healthy Living Made Easy Steven Whiting, 2007-01-01 This book is the culmination of over 30 years in the health and supplement industry The book was written to illustrate the simplicity of living a healthier lifestyle Too many books are written on the subject of better health diet exercise supplements etc that complicate the issues to the point that the public often finds it overwhelming to attempt to make the changes that seem to be necessary in their lives This book will take the only three factors that really matter to one s health namely diet exercise and supplementation and show how each may be implemented in one s life without major impact changes or expenses The number one reason why people don t attempt to live a healthier lifestyle is that they feel it is too difficult or restrictive This book will show just how few changes are necessary to dramatically improve one s health and the prospect of a longer lifespan Children, Obesity and Exercise Andrew P. Hills, Neil A. King, Nuala M. Byrne, 2007-08-07 Throughout the developed world there is an increasing prevalence of childhood obesity This book provides sport exercise and medicine students and professionals with an accessible and practical guide to understanding and managing childhood and

adolescent obesity **Physical Fitness/sports Medicine** ,1989 Consists of citations selected from those contained in the National Library of Medicine s Medical Literature Analysis and Retrieval System
