Multicultural Literature and Response
Lynn Atkinson Smolen, Ruth A. Oswald Ph.D., 2010-12-22

This compelling book emphasizes the critical role of quality multicultural literature and reader response in today's schools and libraries. All students need access to books in which they can see themselves not just their physical appearance but their culture and language as well. *Multicultural Literature and Response: Affirming Diverse Voices* was written to help teachers and librarians find and use the best multicultural books in the service of reading comprehension and more. Underscoring the necessity of selecting quality literature that authentically sensitively and accurately portrays different groups, the book defines multicultural literature and provides a strong argument for its importance in schools and libraries. Expert contributors guide users to multicultural authors and illustrators who portray U.S. ethnic and cultural groups and they suggest ways to integrate this literature with writing fluency development, storytelling, and audiovisuals. Extensive lists of books and websites that feature multicultural literature as well as of authors, illustrators, and publishers of multicultural literature make it easy to include such works in programs across the curriculum.

Among the oddities of the Finger Lakes region are the world's largest pancake, a slice of Susan B. Anthony's seventy-eighth birthday cake, and the anecdote of the boy who accidentally caught an eight-pound trout with his nose. Join author Melanie Zimmer and uncover these and other curiosities and strange tales of the Finger Lakes.

Animals in Space Colin Burgess, Chris Dubbs, 2007-07-05

Many readers will doubtless be astonished to learn that animals were being fired aloft in U.S. and Soviet research rockets in the late 1940s. In fact, most people not only believe that the Russian space dog Laika was the first canine to be launched into space but also that the high-profile precursory Mercury flights of chimps Ham and Enos were the only primate flights conducted by the United States. In fact, both countries had sent literally dozens of animals aloft for many years prior to these events and continued to do so for many years after. Other latter-day space nations such as France and China would also begin to use animals in their own space research. *Animals in Space* will explain why dogs, primates, mice, and other rodents were chosen and tested at a time when dedicated scientists from both space nations were determined to establish the survivability of human subjects on both ballistic and orbital space flights. It will also recount the way this happened, the secrecy involved, and the methods employed, and offer an objective analysis of how the role of animals as spaceflight test

subjects not only evolved but subsequently changed over the years in response to a public outcry led by animal activists It will explore the ways in which animal high altitude and space flight research impacted on space flight biomedicine and technology and how the results both successful and disappointing allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence This book is intended as a detailed yet highly readable and balanced account of the history of animal space flights and the resultant application of hard won research to space technology and astrobiology It will undoubtedly become the ultimate authority on animal space flights *Heritage Comics Auctions, Dallas Signature Auction Catalog #817* Ivy Press,2005-06 Texas Far & Wide E.R.
