Michael Hall,Allan M. Williams,2019-11-25 This ground breaking volume on the relationships between tourism and innovation provides an overview of relevant innovation theories and related literatures on entrepreneurship productivity regional development and competitiveness and their significance to contemporary tourism practices Innovation is a key concept in business and entrepreneurial studies and the broader social sciences Yet despite its policy and academic importance historically little attention has been given to the role of innovation in tourism and the corresponding contribution of tourism related human mobility to regional firm and product innovation This book emphasises that innovation in tourism is much more than a series of technological innovations as important as they are and instead needs to be understood in an economic social and political context with particular stress being placed on the extent to which innovations are shaped by the framework of governance and regulation as well as by institutional factors and activities of individual actors and entrepreneurs It is structured so as to introduce the reader to the overall significance of innovation at various levels and the role that innovation plays in firm and place competition Supported with case studies throughout this book is essential reading for all tourism students **Tourism and Innovation** Williams Allan,2008-02-19 Tourism is often described as an industry with high growth rates and it is subject to radical change in how

it is produced and consumed However there is still a relatively poor understanding of how such changes are brought about that is through innovation This book is the first to provide a comprehensive review of innovation in tourism while also considering how tourism itself contributes to innovative local regional and national development strategies This timely book places tourism innovation in the context of current academic and policy concerns relating to knowledge competition and the management of change A substantial introductory chapter provides an overview of what makes innovation in tourism both distinctive from and similar to innovation in other economic sectors This is followed by three general scene setting chapters which explore how competition and the search for competitiveness drive tourism innovation how knowledge transfers and knowledge creation lead the process and how institutions shape innovation These provide a coherent theoretical framework for understanding the roles of different agencies in innovation ranging from the state to the firm to the consumer The next four chapters analyze innovation at different scales Two chapters review the territorial dimensions of innovation through the fresh perspectives of the national and regional innovation systems followed by reviews of the determinants of innovation in the firm and the contested and complex role of entrepreneurship The final chapter summarises the importance of understanding tourism innovation This is a groundbreaking volume which provides an accessible introduction to a key but neglected topic It provides a readable account of the multidisciplinary research on innovation and relates the emerging theoretical framework to tourism A clear conceptual framework is complemented by fifty boxes which provide a range of illustrative international case studies This book will be a useful guide for researchers and students of tourism studies management and business and geography
