Grantham During The Interregnum The Hall Of Grantham 16411649:

Alcohol, Violence, and Disorder in Traditional Europe A. Lynn Martin, 2009-10-01 Traditional Europe had high levels of violence and of alcohol consumption both higher than they are in modern Western societies where studies demonstrate a link between violence and alcohol A Lynn Martin uses an anthropological approach to examine drinking drinking establishments violence and disorder and compares the wine producing south with the beer drinking north and Catholic France and Italy with Protestant England and explores whether alcohol consumption can also explain the violence and disorder of traditional Europe Both Catholic and Protestant moralists believed in the link and they condemned drunkenness and drinking establishments for causing violence and disorder They did not advocate complete abstinence however for alcoholic beverages had an important role in most people s diets Less appreciated by the moralists was alcohol s function as the ubiquitous social lubricant and the increasing importance of alehouses and taverns as centers of popular recreation The study utilizes both quantitative and qualitative evidence from a wide variety of sources to question the beliefs of the moralists and the assumptions of modern scholars about the role of alcohol and drinking establishments in causing violence and disorder It ends by analyzing the often conflicting regulations of local regional and national governments that attempted to ensure that their citizens had a reliable supply of good drink at a reasonable cost but also to control who drank what where when and how No other comparable book examines the relationship of alcohol to violence and disorder during this period

Isaac the Alchemist: Secrets of Isaac Newton, Revealed Mary Losure, 2017-02-14 A surprising true story of Isaac Newton's boyhood suggests an intellectual development owing as much to magic as science Before Isaac Newton became the father of physics an accomplished mathematician or a leader of the scientific revolution he was a boy living in an apothecary's house observing and experimenting recording his observations of the world in a tiny notebook As a young genius living in a time before science as we know it existed Isaac studied the few books he could get his hands on built handmade machines and experimented with alchemy a process of chemical reactions that seemed at the time to be magical Mary Losure's riveting narrative nonfiction account of Isaac's early life traces his development as a thinker from his childhood in friendly prose that will capture the attention of today's budding scientists as if by magic Back matter includes an afterword an author's note source notes and a bibliography
