Welner, Wendy C. Chi, 2008-02-01 Educational policy controversies in the United States invariably implicate legal issues Policy debates about testing and school choice for example cannot be disentangled from legal rights and mandates The same is true for issues such as funding campus safety speech and religion rights as well as the teaching of immigrant students Written for a general audience this new twelve chapter book explores these compelling educational policy issues through that legal lens building an understanding of both law and policy The book s editors are Kevin Welner associate professor of educational policy at the University of Colorado at Boulder and Wendy Chi a doctoral candidate at Boulder Both Welner and Chi are lawyers as well as educational scholars Political Secularism, Religion, and the State Jonathan Fox, 2015-04-27 This book examines how the competition between religious and secular forces influenced state religion policy between 1990 and 2008 While both sides were active the religious side had considerably more success The book examines how states supported religion as well as how they restricted it International Handbook of the Religious, Moral and Spiritual Dimensions in Education Marian de Souza, Gloria Durka, Kathleen Engebretson, Robert Jackson, Andrew McGrady, 2007-06-04 Traditionally spirituality has resided and been contained within religious frameworks but while the links between the two areas are still acknowledged by many in the contemporary world spirituality is perceived by some as an aspect of human life that is distinct from religion Consequently many are searching for meaning within and without religious traditions today and seeking answers to ethical and moral questions that have been generated by the knowledge and technological explosion One outcome is the renewed interest in the religious spiritual and moral dimensions of education throughout the life cycle This International Handbook presents the research and professional practice of scholars who are daily engaged in the consideration of these dimensions in education The result is a collection of essays which reflects the discipline in all of its internationality as it is today Embedded within the chapters is also an agenda for the future where the religious moral and spiritual dimensions in education are proposed as an exciting and challenging way forward for educators at all levels in society As well it offers a vision for the emergence of a peaceful and just world

Jivraj,2013-09-10 How is religion particularly non Christianness conceptualised and represented in English law What is the relationship between religion race ethnicity and culture in these conceptualisations What might be the socio political effects of conceptualising religion in particular ways This book addresses these key questions in two areas of law relating to children The first case study focuses on child welfare cases and reveals how the boundaries between race and theological notions of religion as belief and practice are blurred Non Christians are also often perceived as uncivilized but also at times racial otherness can be erased and assimilated The second examines religion in education and the increasing focus on common values It demonstrates how non Christian faith schools are deemed as in need of regulation while Christian schools are the benchmark of good citizenship In addition values discourse and citizenship education provide a means to de racialise non Christian children in the ongoing construction of the nation Central to this analysis is a focus on religion as a socio political contingent fluid and invented concept The Community Development Reader James DeFilippis,Susan Saegert,2013-03-05

The Routledge Handbook of Religions and Global Development Emma Tomalin, 2015-02-11. This Handbook provides a cutting edge survey of the state of research on religions and global development. Part one highlights critical debates that have emerged within research on religions and development particularly with respect to theoretical, conceptual and methodological considerations from the perspective of development studies and its associated disciplines. Parts two to six look at different regional and national development contexts and the place of religion within these. These parts integrate and examine the critical debates raised in part one within empirical case studies from a range of religions and regions. Different religions are situated within actual locations and case studies thus allowing a detailed and contextual understanding of their relationships to development to emerge. Part seven examines the links between some important areas within development policy and practice where religion is now being considered including Faith Based Organisations and Development, Public Health, Religion and Development.

Human rights Religion and Development Sustainable Development Climate Change and Religion Global Institutions and Religious Engagement in Development Economic Development and Religion Religion Development and Fragile States Development and Faith Based Education Taking a global approach the Handbook covers Africa Latin America South Asia East and South East Asia and the Middle East It is essential reading for students and researchers in development studies and religious studies and is highly relevant to those working in area studies as well as a range of disciplines from theology anthropology and economics to geography international relations politics and sociology Federalism, Feminism and Multilevel Governance Marian Sawer, 2016-04-15 Until recently few gender scholars took notice of the impact of state architecture on women's representation political opportunities and policy achievements Likewise scholars of federalism devolution and multilevel governance have largely ignored their gender impact For the first time this book explores how women's politics is affected by and affects federalism whether in Australia Canada India Mexico Nigeria Russia or the US Equally it assesses the gender implications of devolution and multilevel governance in the European Union including case studies of the UK and Germany Globally multilevel governance is providing new arenas for women's politics For example CEDAW the UN Convention for the Elimination of All Forms of Discrimination against Women has led most governments to adopt gender equality norms while other UN instruments have supported Aboriginal self government Gender scholars will find especially valuable what is revealed about the impact of political architecture on a broad range of policy issues including gay marriage reproductive rights and childcare Federalism scholars will benefit from the book's wide range of cases comparative themes and combination of gender and federalism perspectives Written by leading experts this book fills an important gap in both literatures **In God We Trust?** Lewis D. Solomon, 2007-01-01 Lewis D Solomon offers a balanced hardheaded analysis of faith based organizations examining what they are presenting his original faith factor theory for their effectiveness and treating the various arguments raised by opponents of faith based organizations and the new social policy approach fairly and professionally This book provides reader friendly answers to constitutional law questions empirical studies of effectiveness and prescriptions for funding and staffing **The ^AOxford Handbook of Religion and American Politics** Corwin Smidt, Lyman Kellstedt, James L. Guth, 2009-08-19 Over the past three decades the study of religion and politics has gone from being ignored by the scholarly community to being a major focus of research Yet because this important research is not easily accessible to nonspecialists much of the analysis of religion's role in the political arena that we read in the media is greatly oversimplified This Handbook seeks to bridge that gap by examining the considerable research that has been conducted to this point and assessing what has been learned what remains unsettled due to conflicting research findings and what important questions remain largely unaddressed by current research endeavors The Handbook is unique to the field of religion and American politics and should be of wide interest to scholars students journalists and others interested in the American political scene *The Ten Commandments* Joseph P. Hester, 2015-08-13

The founders of the United States were well aware of religious differences in the new nation. Oppression had forced varied European religious groups to seek homes elsewhere, some in the new world of America. Governmental pressures toward conformity in religion had in the past led to corruption and civil strife. Thus Congress made a dual assertion in its First Amendment to the Constitution: Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof. However, the ethical foundations of American society and therefore its laws intermingle with the moral codes of religions, including the Judeo-Christian Ten Commandments. This handbook helps bring understanding and meaning to the controversies that have arisen in present-day society over the application of the Ten Commandments to public law and moral problems. Applications can be logical and legal or can violate the separation of church and state called for in the First Amendment. Part One provides background on the Ten Commandments. It gives the various versions found in the Old Testament and explains the non-Israelite influences on those versions, the Hammurabi Code, for example. The moral thinking of the ancient Mesopotamian, Egyptian, and Hebrew cultures is examined. The modern Jewish tradition is detailed, as well as the different interpretations placed on the Ten Commandments by Roman Catholics, Anglicans, Lutherans, and other Protestants. Part Two focuses on the modern controversies, assessing the differing sides of each. Among the many controversies covered are government funding of faith-based charities, posting the Ten Commandments in public buildings, science versus religion in schools, prayer in public places, blue laws, stem cell research, cloning, euthanasia, capital punishment, abortion, and war, racial profiling, and covenant marriages.
