*Graphics by Flo* Flo Singer, 1998-01-01      Cumulated Index to the Books , 1999      **The Psychology of Graphic Images** Manfredo Massironi, Translated by N Bruno, 2001-08-01 This book explores the nature of one of the most ancient tools for nonverbal communication drawings They are naturally adaptable enough to meet an incredibly wide range of communication needs But how exactly do they do their job so well Avoiding the kinds of aesthetic rankings of different graphic domains so often made by art historians and critics Manfredo Massironi considers an extensive and representative sample of graphic applications with an open mind He finds a deep mutuality between the material components of images and the activation of the perceptual and cognitive processes that create and decipher them Massironi first examines the material components themselves the mark or line the plane of representation the angle formed by the actual drawing surface and the depicted objects and the position of the viewpoint relative to the depicted objects The roles played by these three components are independent of the content of the drawing they function in the same way in concrete and abstract representations He then closely scrutinizes the choices made by the person planning and executing the drawings Given that any object can be depicted in an infinite number of different ways the drawer performs continuous work emphasizing and excluding different features The choices are typically unconscious and guided by his or her communicative goals A successful graph be it simple or complex is always successful precisely because the emphasized features are far fewer in number than the excluded ones Finally he analyzes the perceptual and cognitive integrations made by the viewer Drawings are not simply tools for communication but important instruments for investigating reality and its structure Richly illustrated the book includes a series of graphic exercises that enable readers to get a sense of their own perceptual and cognitive activity when inspecting images Massironi s pathbreaking taxonomy of graphic productions will illuminate all the processes involved in producing and understanding graphic images for a wide audience in fields ranging from perceptual and cognitive psychology through human factors and graphic design to architecture and art history      **Creative Pet Project** Rob Snow, 2014-04-14 With 111 well known artists from around the world this unique and beautiful PDF version of the Creative Pet Project will draw you to understand the passions that artists have to breathe life into their works This has been achieved through the connections they have with their companion animals Almost 70% of the artists in the book have rescue animals and their love for these animals extends to the beautiful artwork they create that also contain animals Well known artists and illustrators such as Yuko Shimizu Anita Kunz Martin Wittfooth Sas Christian John Brophy Lola Gil Raffaele Bafefit Ana Bagayan Dilka Bear Chet Zar Heidi Taillefer Jackie Morris and many more all have that great thing in common They love animals and they love their creative work That is what makes this book a great piece to have and explore If you love animal and love art this book is for you It comes with full interactive menu and bookmarks as well as 240 pages of art profiles and pet stories that will make you love the works even more 240 Pages 111 artworks 111 biographies pet bios Follow us at <http://www.creativepet.com>

 theory of interacting systems Piotr Sadowski's book provides an accessible account of the hierarchy of communication

Divided into two parts this book argues in the first section that a deductive semiotic theory generates communication situations of increasing complexity from contiguous communication to indirect referential forms based on indexical iconic and symbolic signs Within this system Sadowski explains how key concepts of the semiotic model such as information parainformation and metainformation can account for degrees of cognitive complexity of communication processes including the perception and interpretation of signs on literal and figurative levels After this clear step by step exposition of the theory of interacting systems Systemic Semiotics then explores various applications of this theory providing new insights into problems subsumed under communication studies cultural theory literary and film studies and psychology
