Gravity Decoded Exploring The Structure Of Space Energy:

Gravity Decoded Sebastian Borrello, 2001 Gravity is a mystery Objects fall to the ground as if pulled by an unseen hand Galileo was the first person to discover how falling works but failed to ask why Kepler deciphered the laws of planetary motion but missed the meaning of his own discoveries Newton ignited the Enlightenment when he found the connection between matter and gravity and gave us the tools to measure orbital mechanics But Newton was disappointed with his own discoveries because the source of gravity lay hidden from him Einstein discovered the connection between space and matter but his own equations masked the real source of gravity He failed to understand that space is more than geometry This book explores the energy of space and discovers that its structure completely defines gravity Using simple mathematics and the achievements of Galileo Kepler Newton and Einstein the author constructs a new law of gravity that is defined by the size of the universe and its matter energy content Gone is Newton's awkward arbitrary constant and Einstein's dependence on it The force of gravity becomes the tendency for the Universe to reach perfect symmetry of space energy The Universe is self regulating with its space tension exactly balanced by its matter energy The Universe consists of only space energy and the matter energy that was derived from it With space energy revealed as the source of gravity the author looks into the meaning of anti gravity and how we might achieve it

Decoding the Human Body-Field Peter H. Fraser, Harry Massey, 2008-03-20 A revolutionary system that reestablishes the proper flow of information to the body's energetic fields to promote health Presents a new integrative model of the energetic physiology of the human body the human body field and its influence on health Shows that a root cause of disease is due to information blockages in the body field Introduces Infoceuticals liquid remedies that help the human body field process vital information to engage the physical body's self healing abilities After decades of research Peter Fraser has formulated a system that unites the meridian system of traditional Chinese medicine with quantum wave theory to provide the first comprehensive link between the human body's biochemistry and bioenergetics He explains that we each have a body field based on twelve meridian like channels that process and coordinate information throughout the body and that our health depends on the proper flow and communication of information through these channels In Decoding the Human Body Field Fraser and Massey describe in detail their revolutionary Nutri Energetics System which uses Infoceuticals liquids infused with organic colloidal minerals that are imprinted with corrective quantum electrodynamic information to remedy distortions and blockages in the information flow of the body field The imprinted information acts as a magnetic signpost to engage the body's self healing ability
