Gray Ghosts Us Navy Marine Corps F 4 Phantoms:

Gray Ghosts Peter E. Davies, 2000 This new study of the sea going Phantoms includes contributions from over a hundred aircrew and maintainers who were involved in the Phantom's success from the earliest service development flying to its twilight years in the Reserve units There are personal accounts of MiG battles from more than a dozen MiG killers first hand descriptions of the F 4's introduction into combat with the Marines as a CAS and reconnaissance aircraft memories of Bear intercepts on Mediterranean cruises narratives covering the aircraft's service into the 1980s and much more These voices are blended with a detailed technical and developmental description of the aircraft supported by comprehensive appendices and over 450 photos in color and black and white **USN McDonnell Douglas F-4 Phantom II** Peter E.

Davies, 2016-03-24 Originally designed as a carrier borne long range interceptor armed with radar guided missiles and tasked with defence against missile launching bombers the Phantom II went on to establish itself as one of the most important multi role fighter attack and reconnaissance aircraft of the 20th century Arguably the United States most important aircraft in the Vietnam War where it played the role of workhorse as well as being a deadly MiG interceptor the Phantom was also a mainstay of Atlantic Fleet operations intercepting Soviet bomber and reconnaissance aircraft and turning them away from the carrier groups at the height of the Cold War This book reveals the design and development history of the naval Phantom its variants and the exported designs adopted by other NATO countries Packed with illustrations photographs and first hand accounts it provides a technical history of one of the most famous aircraft ever built **US**

Marine Corps F-4 Phantom II Units of the Vietnam War Peter E. Davies, 2012-11-20 Although designed as a carrier borne interceptor the F 4 Phantom II was a very successful ground attack aircraft for the US Marines paving the way for its use in this capacity by the USAF and many other air forces It was closely involved in some of the toughest battles of the Vietnam War Twenty five US Marine Corps squadrons flew versions of the Phantom II and 11 of them used the aircraft in South East Asia from May 1965 through to early 1973 Rather than the air to air missiles that were the main component in the original F 4 armament these aircraft carried an ever expanding range of weaponry Some toted 24 500 lb bombs and others strafed with up to three 20 mm gun pods while most flew daily sorties delivering napalm Snakeye bombs and big Zuni rockets Many US Marines holding small outpost positions in Laos and South Vietnam against heavy Viet Cong attack owed their lives to the Phantom II pilots who repeatedly drove off the enemy Featuring stunning profile illustrations and photographs throughout this book examines these missions in the context of US Marine Corps close support doctrine using the direct experience of a selection of the aircrew who flew and organised those missions *US Navy F-4 Phantom II Units of the Vietnam War 1969-73* Peter E. Davies, 2018-05-31 Although the F 4 Phantom II was the most important fighter bomber to see action with all three American services during the Vietnam War it was essentially a U S Navy design and the carrier borne squadron crews were its main operators in combat The aircraft pioneered the use of long range radar guided missiles

in combat although the majority of its Vietnam missions involved ground attack with a variety of innovative ordnance From 1968 to 1973 the Phantom II was the standard U S Navy fighter in Southeast Asia having replaced several other types Its performance and versatility enabled it to perform a variety of different missions and switch roles as necessary in the assault on some of the world s most heavily defended territory Including detailed colour profiles and first person commentary from active participants in the F 4 s naval combat history this is a detailed study of the U S armed services most famous post war fighter

USN F-4 Phantom II vs VPAF MiG-17/19 Peter E. Davies,2011-12-20 A fully illustrated account of the duels between the carrier borne interceptor of the US Navy and the agile MiG during the height of the Vietnam air war The Vietnam War placed unexpected demands upon American military forces and equipment The principal US naval fighter the McDonnell F 4 Phantom had originally been designed to defend the Fleet from air attack at long range However its tremendous power and bomb carrying capacity made it an obvious candidate for the attack mission in Vietnam from 1965 onwards Its opponent was the MiG 17 a direct descendant of the MiG 15 which had given USAF Sabre jets a hard fight in the Korean War This book brings to life their dangerous duels and includes detailed cockpit views and other specially commissioned artwork to highlight the benefits and shortcomings of each plane type It was in the skies over Vietnam that many of the techniques of air combat evolved as pilots learned how to use and to defeat supersonic fighters for the first time

McDonnell Douglas F-4 Phantom Geoff Coughlin,2022-06-20 For military modelers and aviation buffs the history of the F 4 Phantom II along with detailed guidance for building the fighter jet The McDonnell Douglas F 4 Phantom II was the most produced American supersonic military jet with 5 195 aircraft being produced By any standards the F 4 has been incredibly successful used not only by the USAF and US Navy but many air forces around the world including Germany Israel Turkey and Japan The F 4 was designed as a long range fighter interceptor and fighter bomber excellent in all roles assigned to it The Phantom has performed leading roles in multiple conflicts around the world from the Vietnam War through to the Gulf War Although the F 4 left US service in 1996 it has continued in service with other air forces only just being retired in 2020 from the Japanese Air Self Defence Force This new title in Pen British FGR 2 and F 4J UK All the popular model scales are represented 1 72 1 48 and 1 32 This book is aimed at scale modellers of all levels interested in building the F 4 Phantom II

Naval Aviation News ,2000-09 **The Men Who Flew the F-4 Phantom** Martin W. Bowman,2017-09-30 The Phantom was developed for the US Navy as a long range all weather fighter and first flew in May 1958 before becoming operational in 1961 The US Air Force then realized that the Navy had an aircraft that was far better than any tactical aircraft in their inventory and ordered 543 F 4C variants There then followed a spate of orders from around the world In Britain it was ordered for the Navy and Air Force but was modified to take the Rolls Royce Spey turbofan One of the Royal Navy s Phantoms stole the record for the fastest Atlantic crossing a record that stood until taken by the remarkable Blackbird Phantoms have been used in combat in many conflicts throughout its long service history It was one of America s most

utilized aircraft during the long Vietnam War and has been flown in anger in the Middle East by a number of different air forces This is the perfect book for the general reader enthusiast or modeler wishing to find a succinct yet detailed introduction to the design of the aircraft that has made history It features a multitude of stories as relayed by USAF and Israeli airmen who actually flew this remarkable aircraft in wars in SE Asia and the Middle East detailing just what it was like to fly the F 4 in combat Many of the dozen or so chapters include combat testimonies of the Phantom design and durability in SE Asia and in the wars fought between Israel and her surrounding Arab enemies throughout the 1970s and beyond The book also features a wealth of technical data along with stirring images that supplement the text perfectly enhancing its visual appeal

Marine Air Robert F. Dorr,2007-01-02 Think of the U S Marines and you ll naturally think of the peerless ground force that has always bravely answered America s call to arms But the Marines also have an air arm with a tradition every bit as proud and legendary as the ground infantry they support Now military historian Robert F Dorr presents the first fully illustrated oral history of the Marine Air Wing and gives the Flying Leathernecks the recognition they deserve When America entered World War I in 1917 the Marine Air Wing had only thirty five aviators During World War II it expanded to sixty one squadrons twenty with at least one flying ace and over 10 000 pilots Marine Air is a long overdue illustrated history filled with the Flying Leathernecks own words and packed with photographs of the the few the proud of the skies and of their unwavering commitment to protecting their comrades on the ground and to defending the country they have never let down no matter what the odds

USAF McDonnell Douglas F-4 Phantom II Peter E. Davies,2013-04-20 A definitive technical guide to the USAF and foreign variants of the McDonnell Douglas F4 Phantom In many respects the most successful versatile and widely used combat aircraft of the post war era the F 4 Phantom II was quickly adopted by the USAF after its spectacular US Navy introduction Its introduction to USAF squadrons happened just in time for the Vietnam conflict where USAF F 4Cs took over MiG fighting duties from the F 100 Super Sabre Although the F 4 was never intended as a dog fighter to tangle with light nimble gun armed MiGs it was responsible for destroying 109 MiGs in aerial combat At the end of their careers many of the survivors from the 3 380 land based Phantoms were converted into target drones for training purposes New aircraft were also built for West Germany Iran

and Israel As Peter Davies outlines in this illustrated history the USAF's experience with the Phantom showed clearly that the air to air fighter was still a necessity Its decision to fund its successor the McDonnell Douglas F 15 Eagle as well as the F 16 Fighting Falcon and F 22A Raptor was heavily influenced by the lessons of US and other Phantom pilots in combat USAF F-4 Phantom II MiG Killers 1965-68 Peter E. Davies,2012-11-20 The USAF introduced the F 4C Phantom II into the Vietnam war in April 1965 from Ubon RTAB Thailand The F 4C D soon became the Air Force's principal fighter over the North destroying 85 MiGs by the close of 1968 This book describes how the USAF turned a gunless naval interceptor into an opponent to the more nimble VPAF MiGs It explains how the Air Force gradually followed US Navy initiatives in the use of the F 4's missile armament but employed very different tactics and aircrew training The roles of key personalities such as Col Robin Olden are discussed together with armament and markings crews and engagements **American Book Publishing Record** R.R.
