Wet Mind Stephen M. Kosslyn, 2010-05-11 How do our brains allow us to recognize objects and locate them accurately in space use mental imagery to remember yesterday's breakfast read understand speech learn to dance and recall a new telephone number Recent breakthroughs in brain scanning and computing techniques have allowed

researchers to plumb the secrets of the healthy brain's operation simultaneously much new information has been learned about the nature and causes of neuropsychological deficits in animals and humans following various sorts of brain damage in different locations. In this first comprehensive integrated and accessible overview of recent insights into how the brain gives rise to mental activity the authors explain the fundamental concepts behind and the key discoveries that draw on neural network computer models brain scans and behavioral studies. Drawing on this analysis the authors also present an intriguing theory of consciousness. In addition this paperback edition contains an epilogue in which the authors discuss the latest research on emotion and cognition and present new information on working memory.

Globalisation and Education Bob Lingard, 2020-10-28 This collection focuses on education policy in the context of globalisation and draws together influential research dealing with the interplay between education policy and globalisation. Globalisation and neo liberalism in relation to education policy are addressed as is the impact of the global financial crisis the recent rise of ethno nationalism and progressive challenges to neo liberal hegemony. A number of chapters deal with the new spatialities instantiated by globalisation's new technology and consider the implications for education policy. Also discussed are global policy actors such as the OECD EU and edu businesses in education policy the significance of international large scale assessments to an emergent global policy field refugees and education English language policy and globalisation off shore schools and the importance of affect in policy in the context of globalisation. The collection closes with two methodological contributions that consider the implications of globalisation in today's critical education policy analysis. The collection is brought together in a substantial introduction that traverses the literature and research on globalisation and education policy and also situates the chapters and approaches in the collection within the field. The chapters in this book were originally published as articles in various Taylor and Francis journals.

Internal Medicine Jarrah Ali Al-Tubaikh, 2010-03-14 In any radiology department worldwide around 60-70% of investigations deal with surgical cases trauma tumors pre and postsurgical assessment surgical follow ups and more. In spite of that radiology has a lot to offer in the field of internal medicine in terms of establishing confirming or rejecting diagnoses or favoring differential diagnoses. Before I joined radiology I worked as an internal physician for almost a year and almost another year and half as a general surgeon. This clinical experience leads me to look at radiological images with the eye of a radiologist and the mind of a clinician when I examine patient radiological images I even take a history and do a clinical examination if I have the chance when the patient is in the ultrasound CT or MRI room I have always believed that the radiologist's role is not confined to writing reports but it can be broadened to establish the diagnosis in the first hand in the same way as the clinician do. In the medical library there are books dedicated to the clinical signs of internal medicine diseases interestingly there are no such books in the radiology library.
