Transactions on Rough Sets III James F. Peters, Andrzej Skowron, 2005-05-02 The LNCS journal Transactions on Rough Sets is devoted to the entire spectrum of rough sets related issues from logical and mathematical foundations through all aspects of rough set theory and its applications such as data mining knowledge discovery and intelligent information processing to relations between rough sets and other approaches to uncertainty vagueness and incompleteness such as fuzzy sets and theory of evidence This third volume of the Transactions on Rough Sets presents 11 revised papers that have been through a careful peer reviewing process by the journal s Editorial Board The research monograph Time Complexity of Decision Trees by Mikhail Ju Moshkov is presented in the section on dissertation and monographs Among the regular papers the one by Zdzislaw Pawlak entitled Flow Graphs and Data Mining deserves a special mention *Market Power in EU Antitrust Law* Luis Ortiz Blanco, 2011-12-02 The notion of market power is central to antitrust law Under EU law antitrust rules refer to appreciable restrictions of competition Article 101 1 Treaty on the Functioning of the European Union TFEU ex Article 81 1 EC Treaty the elimination of competition for a substantial part of the market Article 101 3 TFEU ex Article 81 3 EC dominant positions Article 10 2 TFEU ex Article 82 EC and substantial impediment to effective competition in particular by creating or reinforcing a dominant position Article 2 of the EU Merger Regulation At first sight only the concept of dominant position relates to market power but it is the aim of this book to demonstrate that the other concepts are directly linked to the notion of market power This is done by reference to the case law of the EU Courts and the precedents of the European Commission The author goes on to argue that for very good reasons clarity and enforceability among others the rules should be interpreted in this way Beginning with market definition the book reviews the different rules and the different degrees of market power they incorporate Thus it analyses the notion of appreciable restriction of competition to find a moderate market power obtained by agreement among competitors to be the benchmark for the application of Article 101 TFEU ex Article 81 EC It moves on to the concept of dominance under Article 102 TFEU ex Article 82 EC which is equivalent to substantial or significant market power and then focuses on the old and new tests for EU merger control Finally it addresses the idea of elimination of competition in respect of a substantial part of the market Article 101 3 TFEU ex Article 81 3 b EC in which the last two types of market power Article 102 TFEU ex Article 82 EC and EU Merger Regulation converge To exemplify this an in depth study of the notion of collective dominance is conducted The book concludes that a paradigm of market power exists under the EU antitrust rules that both fits with past practice and provides for a useful framework of analysis for the general application of the rules by administrative and even more importantly judicial authorities in the Member States under conditions of legal certainty **Annotated Bibliography of Quaternary Vertebrates of Northern North America** Donna Naughton, Canadian Museum of Nature, 2003-01-01 This book focuses on highlights species mentioned locality geological age stratigraphic positions etc of nearly 1000 items published between 1821

and 2000 dealing with the remains of vertebrates that lived from about 2 million to 5000 years ago

Merger Control in the European Union Edurne Navarro Varona, 2005 This second edition of Merger Control in the EU provides the reader with an exhaustive analysis of the European Community rules relating to merger control including the new EC Merger Regulation 139/2004 of 20 January 2004 which entered into force on 1 May 2004 and the latest interpretive notices adopted by the European Commission A brand new addition to the book is the companion website which will maintain the currency of the main work after publication a service that is free of charge to all who own a copy of the book The European Commission has exclusive competence to authorise or prohibit concentrations which have a Community dimension Bearing in mind the economic relevance of these operations decisions made by the Commission have an extraordinary market impact This work is an invaluable and precise instrument for legal practitioners and economists as well as for those undertakings involved in merger operations or acquisitions It will enable them to become acquainted with the Commission's policy in this field and to guide themselves through the complex procedure of notification in Brussels It will also be useful for those merger operations which are required to follow the procedure of notification to the national competition authorities in EU Member States since the Commission's guidelines inspire to a large extent the acts and decisions of the national authorities in this field This book analyses the issues related to merger control not only from a legal standpoint but also from an economic one It is a product of the authors' knowledge and experience in Brussels as officials of DG Competition in the Commission and as lawyers defending the interests of undertakings involved in the notification procedure

Thermodynamics Jean-Paul Duroudier, 2016-08-12 Thermodynamics includes thirteen independent volumes that define how to perform the selection and calculation of equipment involved in the thirteen basic operations of process engineering offering reliable and simple methods Throughout these concise and easy to use books the author uses his vast practical experience and precise knowledge of global research to present an in depth study of a variety of aspects within the field of chemical engineering The main concepts of thermodynamics are presented in detail and their importance is demonstrated through their various practical applications In this volume the author provides a general introduction into the study of thermodynamics Across the five chapters users will find different concepts involved in the study of energy including systems states energy laws and their associated theorems In addition the author provides the methods needed for understanding the machinery used in applied thermodynamics to encourage students and engineers to build the programs they need themselves Provides detailed descriptions of thermodynamic phenomena Presents clear analysis and practical applications Includes different concepts involved in the study of energy including systems states energy laws and their associated theorems

The Competitive Effects of Minority Shareholdings Panagiotis Fotis, Nikolaos Zevgolis, 2016-04-07 The objective of this book is twofold First it presents the economics of minority shareholdings under both merger and antitrust law In particular economic analysis provides both an overall assessment of minority shareholdings in the context of concentrations and Articles 101 and 102 TFEU and the examination of the link between non controlling minority shareholdings merger control and antitrust law Second the book also provides a legal assessment and an analysis of selected case law According to settled

European case law minority shareholdings are analysed not only under Regulation 139 2004 but also under Articles 101 and 102 TFEU Nevertheless according to current enforcement practice at European and international levels several national competition authorities have adopted different approaches The million dollar question is whether the existing regulatory framework is sufficient to cover all possible cases In summary the book will be a useful tool for students practitioners researchers economic and legal experts and competition authorities It provides a comprehensive survey of the subject which has been missing until now and answers many questions that have been raised in the literature in the last decades

Geomarketing Gérard Cliquet, 2013-03-04 This title describes the state of the art in all areas of spatial marketing discussing the various constituents which make up the geography of markets Demand varies according to location and can be measured according to revenue the number of households spending patterns and lifestyles Supply is also dependent on position because prices services products and available shops rely on location while the difference between supply and demand is the rationale for the role of the trader The book also covers the way geographic techniques help to solve marketing problems and contains chapters written by contributors with extensive experience in this field given that it is crucial for companies to direct their marketing correctly at their target audience this will be indispensable reading for those involved in this area

Thermodynamic Modeling of Solid Phases Michel Soustelle, 2015-08-26 This book offers advanced students in 7 volumes successively characterization tools phases the study of all types of phase liquid gas and solid pure or multi component process engineering chemical and electrochemical equilibria the properties of surfaces and phases of small sizes Macroscopic and microscopic models are in turn covered with a constant correlation between the two scales Particular attention is given to the rigor of mathematical developments This book focuses on solid phases

Phase Transformations Michel Soustelle, 2016-03-14 This book is part of a set of books which offers advanced students successive characterization tool phases the study of all types of phase liquid gas and solid pure or multi component process engineering chemical and electrochemical equilibria and the properties of surfaces and phases of small sizes Macroscopic and microscopic models are in turn covered with a constant correlation between the two scales Particular attention has been given to the rigor of mathematical developments This fifth volume is devoted to the study of transformations and equilibria between phases First and second order pure phase transformations are presented in detail just as with the macroscopic and microscopic approaches of phase equilibria In the presentation of binary systems the thermodynamics of azeotropy and demixing are discussed in detail and applied to strictly regular solutions Eutectic and peritectic points are examined as well as the reactions that go with them The study of ternary systems then introduces the concepts of ternary azeotropes and eutectics For each type of solid liquid system the interventions of definite compounds with or without congruent melting are taken into account The particular properties of the different notable points of a diagram are also demonstrated

Chemical Equilibria Michel Soustelle, 2015-10-26 The book offers advanced students in 7 volumes successively characterization tools phases the

study of all types of phase liquid gas and solid pure or multi component process engineering chemical and electrochemical equilibria the properties of surfaces and phases of small sizes Macroscopic and microscopic models are in turn covered with a constant correlation between the two scales Particular attention was given to the rigor of mathematical developments Besides some very specialized books the vast majority of existing works are intended for beginners and therefore limited in scope There is no obvious connection between the two categories of books general books does not go far enough in generalizing concepts to enable easy reading of advanced literature The proposed project aims to give readers the ability to read highly specialized publications based on a more general presentation of the different fields of chemical thermodynamics Consistency is ensured between the basic concepts and applications So we find in the same work the tools their use and comparison for a more general macroscopic description and a microscopic description of a phase

Non-destructive Testing and Evaluation of Civil Engineering Structures Jean-Paul Balayssac,Vincent Garnier,2017-11-22 The non destructive evaluation of civil engineering structures in reinforced concrete is becoming an increasingly important issue in this field of engineering This book proposes innovative ways to deal with this problem through the characterization of concrete durability indicators by the use of non destructive techniques It presents the description of the various non destructive techniques and their combination for the evaluation of indicators The processing of data issued from the combination of NDE methods is also illustrated through examples of data fusion methods The identification of conversion models linking observables obtained from non destructive measurements to concrete durability indicators as well as the consideration of different sources of variability in the assessment process are also described An analysis of in situ applications is carried out in order to highlight the practical aspects of the methodology At the end of the book the authors provide a methodological guide detailing the proposed non destructive evaluation methodology of concrete indicators Presents the latest developments performed in the community of NDT on different aspects Provides a methodology developed in laboratory and transferred onsite for the evaluation of concrete properties which are not usually addressed by NDT methods Includes the use of data fusion for merging the measurements provided by several NDT methods Includes examples of current and potential applications
