Mv Sheena Mackay Wendy Kerr, 2012-10-31 For five years the River Medway was a second home cruising right up to the top reaches of the river in an 18ft motor boat but soon bigger things beckoned Robin fell in love with a very sad looking Sheena Mackay originally built in 1932 but now neglected and really in need of loads of tender loving care not to mention a money tree in the back garden But after quite a few years Sheena Mackay was ready for the water and the start of all the adventures Even though I was one hundred percent behind Robin's dreams of sailing away I was positively scared to death of actually doing it So it was with great trepidation that we were now ready to do all the short trips in anticipation of saying farewell to home for a year or two MV SHEENA MACKAY is my book about our adventures and how I slowly overcame my sheer terror Well maybe not totally but I am a lot better All the places that we have seen from the south east coast along the west coast to sailing around Lands End Then up the west coast of Britain to Scotland with all the delights of some of the Islands passing along the Crinan and Caledonian Canals before heading down the east coast absolutely amazing We received several lovely comments about the way Robin had lovingly renovated Sheena Mackay and it thrilled us when she was recognised as a Zulu Scottish Trawler My confidence in myself has grown and I am doing things that I would never have dreamt which includes writing this book

contested issue in international politics By focusing on the great powers the US the EU Russia and China studies in the field
often fail to capture the specific politics of cybersecurity in the Middle East especially in Egypt and the GCC states For these
countries cybersecurity policies and practices are entangled with those of long standing allies in the US and Europe and are
built on reciprocal flows of data capital technology and expertise At the same time these states have authoritarian systems of
governance more reminiscent of Russia or China including approaches to digital technologies centred on sovereignty and
surveillance This book is a pioneering examination of the politics of cybersecurity in the Middle East Drawing on new
interviews and original fieldwork James Shires shows how the label of cybersecurity is repurposed by states companies and
other organisations to encompass a variety of concepts including state conflict targeted spyware domestic information
controls and foreign interference through leaks and disinformation These shifting meanings shape key technological systems
as well as the social relations underpinning digital development But however the term is interpreted it is clear that
cybersecurity is an integral aspect of the region s contemporary politics
