

THE GREAT DISINFLATION OF THE 1980S

- Beginning in late 1979, the Federal Reserve imposed **strongly contractionary monetary policies**, which pushed the economy into its worst recession since the Great Depression. It cost 18% of our annual output.

Great Canadian Disinflation The Economics And Politics Of Monetary Policy In Canada 198893:

Canadian Policy Debates and Case Studies in Honour of David Laidler Robert Leeson, 2009-12-18 This volume brings together some of the world's leading economists to focus primarily on Canadian policy issues and case study debates in honour of David Laidler Commemorating his success and active participation in the research and analysis of monetary policy

The Canadian Encyclopedia James H. Marsh, 1999 This edition of The Canadian Encyclopedia is the largest most comprehensive book ever published in Canada for the general reader It is COMPLETE every aspect of Canada from its rock formations to its rock bands is represented here It is UNABRIDGED all of the information in the four red volumes of the famous 1988 edition is contained here in this single volume It has been EXPANDED since 1988 teams of researchers have been diligently fleshing out old entries and recording new ones as a result the text from 1988 has grown by 50% to over 4 000 000 words It has been UPDATED the researchers and contributors worked hard to make the information as current as possible Other words apply to this extraordinary work of scholarship AUTHORITATIVE RELIABLE and READABLE Every entry is compiled by an expert Equally important every entry is written for a Canadian reader from the Canadian point of view The finished work many years in the making and the equivalent of forty average sized books is an extraordinary storehouse of information about our country This book deserves pride of place on the bookshelf in every Canadian Home It is no accident that the cover of this book is based on the Canadian flag For the proud truth is that this volume represents a great national achievement From its formal inception in 1979 this encyclopedia has always represented a vote of faith in Canada in Canada as a separate place whose natural worlds and whose peoples and their achievements deserve to be recorded and celebrated At the start of a new century and a new millennium in an increasingly borderless corporate world that seems ever more hostile to national distinctions and aspirations this Canadian Encyclopedia is offered in a spirit of defiance and of faith in our future The statistics behind this volume are staggering The opening sixty pages list the 250 Consultants the roughly 4 000 Contributors all experts in the field they describe and the scores of researchers editors typesetters proofreaders and others who contributed their skills to this massive project The 2 640 pages incorporate over 10 000 articles and over 4 000 000 words making it the largest some might say the greatest Canadian book ever published There are of course many special features These include a map of Canada a special page comparing the key statistics of the 23 major Canadian cities maps of our cities a variety of tables and photographs and finely detailed illustrations of our wildlife not to mention the colourful informative endpapers But above all the book is encyclopedic which the Canadian Oxford Dictionary describes as embracing all branches of learning This means that with rare exceptions there is satisfaction for the reader who seeks information on any Canadian subject From the first entry A mari usque ad mare from sea to sea which is Canada's motto and a good description of this volume's range to the Zouaves who mustered in Quebec to fight for the beleaguered Papacy there is the required summary of information clearly and accurately presented For the browser the

constant variety of entries and the lure of regular cross references will provide hours of fascination The word encyclopedia derives from Greek expressions alluding to a grand circle of knowledge Our knowledge has expanded immeasurably since the time that one mind could encompass all that was known Yet now Canada's finest scientists academics and specialists have distilled their knowledge of our country between the covers of one volume The result is a book for every Canadian who values learning and values Canada

The Great Canadian Disinflation David E. W. Laidler, William Bertie Provost Robson, C.D. Howe Institute, 1993 This document provides a general overview of the main problems addressed It reviews the costs of inflation and the costs that arise when uncertainty about politically motivated changes in inflation rates and central bank policies becomes important in citizens thinking It provides some theoretical background to the study of monetary policy in Canada It also describes the disinflation experiment itself Finally it assesses the outcome of the experiment to date and draws lessons relevant to the conduct of monetary policy in the years ahead

The Political Economy of Canada Michael Howlett, Alex Netherton, M. Ramesh, 1999 Debates on the role of the state and the viability of Canadian economic development are especially intense during periods of change such as the contemporary era of globalization In this completely revised updated and enlarged second edition of *The Political Economy of Canada* Professors Howlett Netherton and Ramesh outline the principal structural elements of the Canadian political economy and describe the importance of such factors as resources social class and international trade The authors stress the significance of political institutions at the national international and subnational levels that substantially affect the production and distribution of wealth Three chapters consider the strengths and weaknesses of major approaches to Canada's political economy the liberal and socialist theories

as well as the staples approach pioneered by Harold Innis. Subsequent chapters explore the structure and organization of and the interrelationships between the state, labour and capital in Canada and show how their fragmented and decentralized nature limits the capacity of governments to manage a globalized economy. The book outlines the history of the domestic political economy and examines how Canada is linked to the international political economy through the World Trade Organization and NAFTA. Particular attention is devoted to the constraints imposed on the Canadian state by a market oriented resource exporting economy and by growing reliance on US trade. The final chapters examine monetary and fiscal management and industrial policy demonstrating how these policy arenas are shaped by ideology, new globalizing and regionalizing constraints and the disorganization of the major policy actors.

A History of the Canadian Economy

Kenneth Harold Norrie, Doug Owsen, John Charles Herbert Emery, 2002. *Production, Distribution and Trade* Adriano Birolo, Duncan Foley, Heinz D. Kurz, Bertram Schefold, Ian Steedman, 2010-06-30. This collection brings together significant new contributions to the Sraffa based theories of production and distribution from post Keynesian arguments concerning monetary and macro economics to the history of thought and methodology. All of the authors are well established authorities in their field and in this book they add stimulating and original pieces of analysis to the contemporary literature. *Production Distribution and Trade* is divided into three parts. The first explores analytical issues in production and exchange theory, the second examines Postkeynesian Macroeconomics and the final part includes essays on the history of economic thought and methodology. This collection has been written in honour of Sergio Parrinello and is a fitting tribute to his untiring efforts to stimulate discussion among Classicists, Marxists, Postkeynesians and Evolutionists. The book is a clear and convincing attempt to prove that an alternative paradigm to mainstream economics is alive and thriving and to argue that these perspectives shed better light on current economic problems both as diagnosis and in terms of policy conclusions. The book will be of interest to Economics postgraduate students and researchers working in the Classical and Postkeynesian tradition.
