The Great Apes Chris Herzfeld, 2017-01-01 Foreword by Jane Goodall The uncanniness of similar wild men similars and hybrid beings Skeletons skins and skulls apes in the age of colonial expansion and natural history collections Apes as guinea pigs primates and experimental research Great apes in the eyes of scientists what does it mean to be an ape Apes that think they are human astronaut apes painting apes talking apes Conquering the field pioneers the quest for origins and primates Socialities culture and traditions among primates when the boundary between humans and apes blurs Women and apes sex gender and primatology Becoming human being ape Understanding Herpes, 1st ed. Lawrence R. **Primates** Kurt Benirschke, 2012-12-06 This conference represents the first time in my life when I felt it Stanberry, 2006 was a misfor tune rather than a major cause of my happiness that I do conservation work in New Guinea Yes it is true that New Guinea is a fascinating microcosm it has fascinating birds and people and it has large expanses of undisturbed rainforest In the course of my work there helping the Indonesian government and World Wildlife Fund set up a comprehensive national park system I have been able to study animals in areas without any human population But New Guinea has one serious drawback it has no primates except for humans Thus I come to this conference on primate conservation as an underprivileged and emotionally deprived observer rather than as an involved participant Nevertheless it is easy for anyone to become interested in primate conservation The public cares about primates More specifically to state things more realistically many people care some of the time about some primates Primates are rivaled only by birds pandas and the big cats in their public appeal For some other groups of animals the best we can say is that few people care about them infrequently For most groups of animals no one cares about them ever Catalog of Copyright Entries. **The Publishers Weekly**,1924 *Origins of Altruism and Cooperation* Robert W. Sussman,C. Robert Cloninger,2011-08-02 This book is about the evolution and nature of cooperation and altruism in social living animals focusing especially on non human primates and on humans Although cooperation and altruism are often thought of as ways to attenuate competition and aggression within groups or are related to the action of selfish genes there is increasing evidence that these behaviors are the result of biological mechanisms that have developed through natural selection in group

living species This evidence leads to the conclusion that cooperative and altruistic behavior are not just by products of competition but are rather the glue that underlies the ability for primates and humans to live in groups The anthropological primatological paleontological behavioral neurobiological and psychological evidence provided in this book gives a more optimistic view of human nature than the more popular conventional view of humans being naturally and basically aggressive and warlike Although competition and aggression are recognized as an important part of the non human primate and human behavioral repertoire the evidence from these fields indicates that cooperation and altruism may represent the more typical normal and healthy behavioral pattern The book is intended both for the general reader and also for students at a variety of levels graduate and undergraduate it aims to provide a compact accessible and up to date account of the current scholarly advances and debates in this field of study and it is designed to be used in teaching and in discussion groups The book derived from a conference sponsored by N S F the Wenner Gren Foundation for Anthropological Research the Washington University Committee for Ethics and Human Values and the Anthropedia Foundation for the study of well being Oxford Handbook of Comparative Evolutionary Psychology Jennifer Vonk, Todd K. Shackelford, 2012-02-13 This volume brings together leading experts in comparative and evolutionary psychology Top scholars summarize the histories and possible futures of their disciplines and the contribution of each to illuminating the evolutionary forces that give rise to unique abilities in distantly and closely related species **Gorillas** Kate Riggs, 2021-01-15 This revised edition surveys key aspects of gorillas describing the great apes appearance behaviors and habitats A folk tale explains why these creatures do nothing but eat and sleep The Animal Mind Kristin Andrews, 2020-05-17 The philosophy of animal minds addresses profound questions about the nature of mind and the relationships between humans and other animals In this fully revised and updated introductory text Kristin Andrews introduces and assesses the essential topics problems and debates as they cut across animal cognition and philosophy of mind citing historical and cutting edge empirical data and case studies throughout The second edition includes a new chapter on animal culture There are also new sections on the evolution of consciousness and tool use in animals as well as substantially revised sections on mental representation belief communication theory of mind animal ethics and moral psychology Further features such as chapter summaries annotated further reading and a glossary make The Animal Mind an indispensable introduction to those teaching philosophy of mind philosophy of animal minds or animal cognition It will also be an excellent resource for those in fields such as ethology biology and psychology American Book Publishing Record Cumulative, 1950-1977 R.R. Bowker Company. Department of Bibliography, 1978 The Primate Origins of Human Nature Carel P. Van Schaik, 2016-01-22 The Primate Origins of Human Nature Volume 3 in The Foundations of Human Biology series blends several elements from evolutionary biology as applied to primate behavioral ecology and primate psychology classical physical anthropology and evolutionary psychology of humans However

unlike similar books it strives to define the human species relative to our living and extinct relatives and thus highlights

uniquely derived human features. The book features a truly multi disciplinary multi theory and comparative species approach to subjects not usually presented in textbooks focused on humans such as the evolution of culture life history parenting and Post-Koiné: Studies of Non-Anthropocentric (Poetic) Languages Anita Jarzyna, 2025-09-25 In social organization this book you will come across an authorial formula of extrahuman community and communication The formula includes languages polemical with the narrow model of community that often excludes certain human and non human beings Alternative languages are sensitive to the codes of violence directed against animals so as to inclusively create a new interspecies non antagonistic collectivity What especially seeks such alternative languages is poetry It not only represents the true character of existing relationships with animals or determines their shape but also can interfere in them suspend the control of logocentric order and as a result reduce the ambiguous human guardianship over animals that in turn requires the verification and questioning of the guardianship's position in language This publication treats Polish poetry as a statement equal with if not precursory for the discursive calls for the abolition of anthropocentric dominance. The book proves that critical reflection on the language that consolidates the community redefines our attitude toward animals and the Question of Personhood Gregory F. Tague, 2020-03-05 Gregory F Tague s An Ape Ethic and the Question of Personhood argues that great apes are moral individuals because they engage in a land ethic as ecosystem engineers to generate ecologically sustainable biomes for themselves and other species Tague shows that we need to recognize apes as eco engineers in order to save them and their habitats and that in so doing we will ultimately save earth s biosphere The book draws on extensive empirical research from the ecology and behavior of great apes and synthesizes past and current understanding of the similarities in cognition social behavior and culture found in apes Importantly this book proposes that differences between humans and apes provide the foundation for the call to recognize forest personhood in the great apes While all ape species are alike in terms of cognition intelligence and behaviors there is a vital contrast unlike humans great apes are efficient ecological engineers Therefore simian forest sovereignty is critical to conservation efforts in controlling global warming and apes should be granted dominion over their tropical forests Weaving together philosophy biology socioecology and elements from eco psychology this book provides a glimmer of hope for future acknowledgment of the inherent ethic that ape species embody in their eco centered existence on this planet First Migrants Peter Bellwood, 2014-01-13 The first publication to outline the complex global story of human migration and dispersal throughout the whole of human prehistory Utilizing archaeological linguistic and biological evidence Peter Bellwood traces the journeys of the earliest hunter gatherer and agriculturalist migrants as critical elements in the evolution of human lifeways The first volume to chart global human migration and population dispersal throughout the whole of human prehistory in all regions of the world An archaeological odyssey that details the initial spread of early humans out of Africa approximately two million years ago through the Ice Ages and down to the continental and island migrations of agricultural populations within the past

10 000 years Employs archaeological linguistic and biological evidence to demonstrate how migration has always been a vital and complex element in explaining the evolution of the human species Outlines how significant migrations have affected population diversity in every region of the world Clarifies the importance of the development of agriculture as a migratory imperative in later prehistory Fully referenced with detailed maps throughout Climate change and sustainable development Thomas Potthast, Simon Meisch, 2012-08-13 Climate change is a major framing condition for sustainable development of agriculture and food Global food production is a major contributor to global greenhouse gas emissions and at the same time it is among the sectors worst affected by climate change This book brings together a multidisciplinary group of authors exploring the ethical dimensions of climate change and food Conceptual clarifications provide a necessary basis for putting sustainable development into practice Adaptation and mitigation demand altering both agricultural and consumption practices Intensive vs extensive production is reassessed with regard to animal welfare efficiency and environmental implications Property rights pay an ever increasing role as do shifting land use practices agro energy biotechnology food policy to green consumerism And last but not least tools are suggested for teaching agricultural and food ethics Notwithstanding the plurality of ethical analyses and their outcome it becomes apparent that governance of agri food is faced by new needs and new approaches of bringing in the value dimension much more explicitly. This book is intended to serve as a stimulating collection that will contribute to debate and reflection on the sustainable future of agriculture and food Industrial Agriculture and Ape Conservation Helga Rainer, Alison R. T. production in the face of global change White, Arcus Foundation, Annette Lanjouw, 2015-12-17 Presents new research and analysis along with case studies to examine the interface between ape conservation and industrial agriculture This title is available as Open Access Handbook of Human Symbolic Evolution Nathalie Gontier, Andy Lock, Chris Sinha, 2024 The Oxford Handbook of Human Symbolic Evolution explores the origins of our characteristically human abilities our ability to speak create images play music and read and write The book investigates how symbolization evolved in human evolution and how symbolism is expressed across the various areas of human life Man's Place in Nature; and a Supplementary Essay Thomas Henry Huxley, 1908

**Peter Singer Under Fire** Jeffrey A. Schaler,2011-09-30 One of the leading ethical thinkers of the modern age Peter Singer has repeatedly been embroiled in controversy Protesters in Germany closed down his lectures mistakenly thinking he was advocating Nazi views on eugenics Conservative publisher Steve Forbes withdrew generous donations to Princeton after Singer was appointed professor of bioethics His belief that infanticide is sometimes morally justified has appalled people from all walks of life Peter Singer Under Fire gives a platform to his critics on many contentious issues Leaders of the disability rights group Not Dead Yet attack Singer s views on disability and euthanasia Economists criticize the effectiveness of his ideas for solving global poverty Philosophers expose problems in Singer s theory of utilitarianism and ethicists refute his position on abortion Singer s engaging Intellectual Autobiography explains how he came by his controversial views while

detailed replies to each critic reveal further surprising aspects of his unique outlook
