examines variability among custodial grandparent caregivers It focuses on diversity among grandparent headed families in domestic and international settings with over 35 contributors exploring the many factors that contribute to such diversity It also examines diversity across individual differences especially those of gender and age ethnicity and race and culture An awareness of their uniqueness is essential to the process of understanding the demands of custodial grandparents new roles and in providing appropriate services to them Whatever the reason most grandparents raising grandchildren never anticipated that they would parent again For most this new role causes significant upheaval in their lives Problems contributing to stress may include having to give up or reduce hours of work early retirement and providing financial and emotional support for their grandchildren This book is a valuable resource for practitioners and extension educators who work with grandparents raising their grandchildren It provides a wealth of information and a basis on which national and state run services can evaluate their current policies and devise funds services and programs that will help this growing population successfully raise their grandchildren *Resilient Grandparent Caregivers* Bert Hayslip, Gregory C. Smith, 2013

The study of grandparents raising grandchildren now almost two decades old has tended to have a negative bias emphasizing the difficulties such people face and the negative impact that grandparent caregiving has on them physically socially and emotionally This edited book seeks to reverse this trend by taking a positive approach to understanding grandparent caregivers focusing on their resilience and resourcefulness This method reflects a strengths based approach and the importance of benefit finding and positive coping Chapters feature information from both qualitative and quantitative studies and are written by a diverse range of professionals such as counselors psychologists geriatric social workers and nurse practitioners to provide multidisciplinary perspectives for practitioners working with grandparent caregivers Part one discusses the positive qualities that custodial grandparents possess resilience resourcefulness and benefit finding The second

part considers the sociocultural aspects of resilience and resourcefulness in grandparent caregivers Finally part three presents strengths based interventions for working with custodial grandparents Practitioners will find this to be a valuable resource in their work and the field as a whole stimulating positive changes in attitudes toward and practices with grandparent caregivers

Family Stories and the Life Course Michael W. Pratt, Barbara H. Fiese, 2004-04-26 This edited book draws from work that focuses on the act of telling family stories as well as their content and structure The process of telling family stories is linked to central aspects of development including language acquisition affect regulation and family interaction patterns This book extends across traditional developmental psychology personality theory and family studies Drawing broadly on the epigenetic framework for individual development articulated by Erik Erikson as well as on conceptions of the family life cycle the editors bring together contemporary examples of psychological research on family stories and their implications for development and change at different points in the life course The book is divided into sections that focus on family stories at different points in the life cycle from early childhood and the beginnings of narrative skill through adolescence young adulthood midlife and then mature adulthood and its intergenerational meaning During each of these periods of the life cycle research focusing on individual development within an Eriksonian framework of ego strengths and virtues is highlighted The dynamic role of family stories is also featured here with work exploring the links between family process intergenerational attachment and storytelling Sociocultural theories that emphasize how such

development is situated in the wider cultural context are also featured in several chapters This broad lifespan developmental focus serves to integrate the exciting diversity of this work and foster further questions and research in the emerging field of family narrative The book is intended primarily for researchers and advanced level students in the fields of developmental and personality psychology as well as those in family studies and in gerontology It may also be of interest to those in the helping professions who are concerned with family therapy and family issues and may due to its content and illustrative material have appeal to a wider market of the lay public The chapters are written in a readily accessible style and the analyses are presented in a fairly non technical way Because family stories are charted across the lifespan it would be a suitable companion book to a more traditional lifespan textbook in certain courses

groundbreaking collection has targeted the essence of what occurs in the context of grandparents efforts at parenting their grandchildren as well as the nature of these interactions. Indeed, grandparent's views on the adequacy of their parenting skills and the nature of their relationships with their grandchildren are at the heart of many of the difficulties and satisfactions associated with the resumption of the parenting role in middle and later life and are of central importance in the lives and well being of both custodial grandparents and their grandchildren. The volume, which will be of vital interest to family counselors, mental health practitioners, educators, school counselors, social workers, psychologists, and social service providers, approaches this issue from novel theoretical perspectives, presents new empirical data, and provides valuable suggestions for therapists who are treating grandparent-grandchild dyads. It is methodologically diverse, relying upon case studies, empirical findings, and national datasets. Additionally, it incorporates longitudinal work, which has been absent in research with grandparent caregivers to date. Most importantly, it defines new areas of understanding of custodial grandparents that are relevant to both researchers and practitioners, e.g., dealing with grief and loss, a focus on grandchildren, the interactional style of caregiving, parenting education, intergenerational ambivalence, and therefore should provide fertile ground for work regarding these issues, which are so central to the lives of custodial grandparents and their grandchildren. Highlighted coverage includes intergenerational relationships, intergenerational transmission of values and their implications for parenting among custodial grandparents, the adjustments custodial grandchildren must make in the school system viewed from the perspective of school personnel, an assistant principal, and school counselor, the experiences/perceptions of adult children raised by their grandparents, impact on relationships with grandparents and the parenting of their own children, the role of the adult parent in the context of grandparents raising grandchildren. Each of these chapters will be written from an applied practitioner perspective and stress the clinical implications of each issue.

Grandparents in Cultural Context

David W. Shwalb, Ziarat Hossain, 2017-07-20. *Grandparents in Cultural Context* gives a long overdue global view of the changing roles of grandparents. The eleven main chapters are by experts in the Americas, Europe, and Russia, Asia, and Africa, and the Middle East, and the editors integrate their chapters with previous writings on grandparenthood. Rather than technical or statistical research reports, each chapter provides a thought-provoking and comprehensive review of research, real-life case stories, cultural influences, and applied implications for grandparenthood across and within societies. Calling special attention to the roles of grandfathers and grandparenthood in societies previously unrepresented in the literature, it provides several hundred new citations of work previously unavailable in English language publications. Accessible to both scholars and students, it has several pedagogical features, e.g., web links, discussion questions, that make it useful as a text for upper division undergraduate or graduate level classes in behavioral, social, and family sciences. It is relevant to psychology, gerontology, family studies, anthropology, family comparative sociology, education, social work, gender studies, ethnic studies, psychiatry, and diversity and international studies programs. Practitioners, service providers, policymakers, and internationally

minded grandparents will also enjoy this book **Child and Adolescent Psychopathology** Linda Wilmschurst, 2010-09-29 Providing an abundance of realistic cases illustrating issues in assessing and treating child psychopathologies this casebook provides students with an opportunity to apply skills in case formulation and diagnosis using fully developed actual practice cases It assists students in developing their decision making and problem solving skills in face of the full complexities of childhood psychopathologies It is only through exploring realistic complex cases that students learn to integrate the theory and research based assessments and interventions they've been learning from textbooks and previous course work
