Graphic Methods for Presenting Facts (Classic Reprint) Willard C. Brinton, 2015-07-22 Excerpt from Graphic Methods for Presenting Facts In the preparation of this book there has been a constant effort to present the subject to suit the point of view of the business man the social worker and the legislator Mathematics have been entirely eliminated Technical terms are used practically not at all Since the readers whom it is most desired to reach are those who have never had any statistical training consistent effort has been made to keep the whole book on such a plane that it may be found readable and useful by anyone dealing with the complex facts of business or government Though written primarily for the non technical man it is hoped that this book may nevertheless prove convenient to the engineer the biologist and the statistician A definite effort has been made to produce a work which can serve as a hand book for anyone who may have occasional charts to prepare for reports for magazine illustration or for advertising Unfortunately there are extremely few draftsmen who know how to plot a curve or prepare any kind of a chart from data presented to them in the form of tabulated figures Most draftsmen can plot a curve if they are given the data and an example showing the general type of chart desired The executive who desires a chart is usually too busy to stand by a draftsman and explain in detail just how the chart should be prepared as concerns those all important details of proportion scale width of line etc It is believed that the owner of this book will find it feasible to run through the various chapters and pages until he finds a chart most nearly like that which he desires to have made from his own data A sample chart placed before any draftsman of average ability should give the draftsman practically all the instruction needed for the preparation of a similar chart from other data Much careful labor has been expended in so arranging the book that a busy reader may get the gist of the matter by looking at the illustrations and reading only the titles and the sub titles The main title under each illustration is intended to show exactly what the chart represents just as if it were used in some publication relating to the particular subject matter of the chart The sub titles relate to method and give criticism of each chart as a whole Though the text gives much more detailed information concerning method than can possibly be put into any sub titles the reader who examines only the illustrations and the titles without any reference to the text will undoubtedly get a major portion of the vital material in the book It is believed that an average reader may go

through the illustrations and the titles in about one hour About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works [Graphic Methods for Presenting Facts](#) Willard Cope Brinton,1914 *Graphic Methods for Presenting Facts* Brinton Willard Cope,2022-10-26 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **Graphic Methods for Presenting Facts - Scholar's Choice Edition** Willard C.
