Coupland, R. T. Coupland, 1979-05-10 Background The nature of grassland Problems in studying grassland ecosystems Natural temperate grasslands Semi natural temperate meadows and pastures Tropical grasslands Arable grasslands Croplands *Grasslands of the World* Food and Agriculture Organization of the United Nations, 2005-01-01 This book brings together information on the contrasting characteristics condition present use and

problems of the world's main natural grasslands. Since grassland is commercialized through the grazing animal, particular attention is paid to the livestock production systems associated with each main type. Grazing resources are more than simply edible herbage; many other factors have to be taken into account, notably water in all areas and shelter in winter cold climates. Seasonality of forage supply is a characteristic of almost all grazing lands, so the strategies for dealing with lean seasons are described. The main problems of each type are mentioned and possible strategies for their sustainable management discussed, taking into account their multiple functions, not only livestock production. The book is primarily aimed at agricultural scientists, educationalists, extensionists, and decision makers with interests in responsible use of extensive grasslands.

Grassland Habitats, **Encyclopedia of the World's Biomes**, 2020-06-26. The Encyclopedia of the World's Biomes is a unique five-volume reference that provides a global synthesis of biomes, including the latest science. All of the book's chapters follow a common thematic order that spans biodiversity, importance, principal anthropogenic stressors, and trends, changing climatic conditions, and conservation strategies for maintaining biomes in an increasingly human-dominated world. This work is a one-stop shop that gives users access to up-to-date, informative articles that go deeper in content than any currently available publication. Offers students and researchers a one-stop shop for information currently only available in scattered or non-technical sources. Authored and edited by top scientists in the field. Concisely written to guide the reader through the topic. Includes meaningful illustrations and suggests further reading for those needing more specific information.

Grasslands on the Third Pole of the World Shikui Dong, Yong Zhang, Hao Shen, Shuai Li, Yudan Xu, 2023-10-09. This book comprehensively covers the topics of origin and distribution, evolution and types, regional and global importance, biodiversity, conservation, plant-soil interfaces, ecosystem functions and services, social-ecological systems, climate change, adaptations, land degradation and restoration, grazing management, and pastoral production and sustainable future of the grasslands on the Qinghai-Tibetan Plateau (QTP), which is a globally unique eco-region called the Roof of the World because of its high elevation. The Third Pole on Earth because of its alpine environment and the Water Tower in Asia because of its headwater location. The grassland ecosystem covers above 60% of QTP, which is about 2.5 million km², 1/4 of Chinese total territorial lands. The grassland ecosystem of the QTP, the Third Pole, is an important part of the Palaearctic region, which features alpine cover and low oxygen. The Third Pole's grasslands not only provide important ecosystem functions, such as biodiversity conservation, carbon storage, water resource regulation, climate control, and natural disaster mitigation at a global scale, but also provide critical ecosystem services, such as pastoral production, cultural inheritance, and tourism and recreation at local and regional scales. The purposes of this monograph are to address the following questions: 1. What are the special features of the Third Pole's grasslands? 2. How have climate changes and human activities changed the structures and functions of the Third Pole's grasslands? 3. How can we cope with land degradation and climate change through innovative restoration and protective

actions for Third Pole's grasslands And 4 How can we promote the sustainable development of social ecological systems of the Third Pole's grasslands through best management practices including grazing The goal of this book is to attract the attention of international audiences to realize the importance of the Third Pole's grasslands and to call for the actions of global communities to effectively protect and sustainably use the Third Pole's grasslands This book can be served as textbooks teaching materials and documentaries for different audiences The target audiences include students teachers researchers policy makers planners government officials and NGOs in agricultural environmental and natural resources sectors

Speculative Everything Anthony Dunne,Fiona Raby,2013-12-06 How to use design as a tool to create not only things but ideas to speculate about possible futures Today designers often focus on making technology easy to use sexy and consumable In Speculative Everything Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas For them design is a means of speculating about how things could be to imagine possible futures This is not the usual sort of predicting or forecasting spotting trends and extrapolating these kinds of predictions have been proven wrong again and again Instead Dunne and Raby pose what if questions that are intended to open debate and discussion about the kind of future people want and do not want Speculative Everything offers a tour through an emerging cultural landscape of design ideas ideals and approaches Dunne and Raby cite examples from their own design and teaching and from other projects from fine art design architecture cinema and photography They also draw on futurology political theory the philosophy of technology and literary fiction They

show us for example ideas for a solar kitchen restaurant a flypaper robotic clock a menstruation machine a cloud seeding truck a phantom limb sensation recorder and devices for food foraging that use the tools of synthetic biology Dunne and Raby contend that if we speculate more about everything reality will become more malleable The ideas freed by speculative design increase the odds of achieving desirable futures *Grasslands Under Threat* Paul Mason, 2009 Describes how farming and other threats to grasslands affect the environment contributing to animal endangerment world hunger and other situations and discusses ways to make a difference
