**After Memory** Matthias Schwartz, Nina Weller, Heike Winkel, 2021-06-08 Even seventy five years after the end of World War II the commemorative cultures surrounding the War and the Holocaust in Central Eastern and South Eastern Europe are anything but fixed The fierce debates on how to deal with the past among the newly constituted nation states in these regions have already received much attention by scholars in cultural and memory studies The present volume posits that literature as a medium can help us understand the shifting attitudes towards World War II and the Holocaust in post Communist Europe in recent years These shifts point to new commemorative cultures shaping up after memory Contemporary literary representations of World War II and the Holocaust in Eastern Europe do not merely extend or replace older practices of remembrance and testimony but reflect on these now defunct or superseded narratives New narratives of remembrance are conditioned by a fundamentally new social and political context one that emerged from the devaluation of socialist commemorative rituals and as a response to the loss of private and family memory narratives The volume offers insights into the diverse literatures of Eastern Europe and their ways of depicting the area s contested heritage **The Routledge**

**Digging for the Disappeared** Adam Rosenblatt, 2015-04-01 The mass graves from our long human history of genocide massacres and violent conflict form an underground map of atrocity that stretches across the planet's surface In the past few decades due to rapidly developing technologies and a powerful global human rights movement the scientific study of those graves has become a standard facet of post conflict international assistance Digging for the Disappeared provides readers with a window into this growing but little understood form of human rights work including the dangers and sometimes unexpected complications that arise as evidence is gathered and the dead are named Adam Rosenblatt examines the ethical political and historical foundations of the rapidly growing field of forensic investigation from the graves of the disappeared in Latin America to genocides in

Rwanda and the former Yugoslavia to post Saddam Hussein Iraq In the process he illustrates how forensic teams strive to balance the needs of war crimes tribunals transitional governments and the families of the missing in post conflict nations Digging for the Disappeared draws on interviews with key players in the field to present a new way to analyze and value the work forensic experts do at mass graves shifting the discussion from an exclusive focus on the rights of the living to a rigorous analysis of the care of the dead Rosenblatt tackles these heady hard topics in order to extend human rights scholarship into the realm of the dead and the limited but powerful forms of repair available for victims of atrocity

**Representing Genocide** Rebecca Jinks, 2016-06-02 This book explores the diverse ways in which Holocaust representations have influenced and structured how other genocides are understood and represented in the West Rebecca Jinks focuses in particular on the canonical 20th century cases of genocide Armenia Cambodia Bosnia and Rwanda Using literature film photography and memorialisation she demonstrates that we can only understand the Holocaust's status as a benchmark for other genocides if we look at the deeper structural resonances which subtly shape many representations of genocide Representing Genocide pursues five thematic areas in turn how genocides are recognised as such by western publics the representation of the origins and perpetrators of genocide how western witnesses represent genocide representations of the aftermath of genocide and western responses to genocide Throughout the book distinguishes between mainstream and other more nuanced and engaged representations of genocide It shows how these mainstream representations the majority largely replicate the representational framework of the Holocaust including the way in which mainstream Holocaust representations resist recognising the rationality instrumentality and normality of genocide preferring instead to present it as an aberrant exceptional event in human society By contrast the more engaged representations often but not always originating from those who experienced genocide tend to revolve around precisely genocide's ordinariness and the structures and situations common to human society which contribute to and become involved in the violence

*Working in the Killing Fields* Howard Ball, 2015-04-15 While the specifics of individual wars vary they share a common epilogue the task of finding and identifying the disappeared The Bosnian war of the early 1990s which destroyed the sovereign state of Yugoslavia is no exception In *Working in the Killing Fields* Howard Ball focuses on recent developments in the technology of forensic science and on the work of forensic professionals in Bosnia following that conflict Ball balances the examination of complex features of new forensic technology with insights into the lives of the men and women from around the globe who are tasked with finding and excavating bodies and conducting pathological examinations Having found the disappeared however these same pathologists must then also explain the cause of death to international court criminal prosecutors and surviving families of the victims Ball considers the physical dangers these professionals regularly confront while performing their site excavations as well as the emotional pain including post traumatic stress disorder they contend with while in Bosnia and after they leave the killing fields *Working in the Killing Fields* integrates discussion of cutting edge

forensic technology into a wider view of what these searches mean the damage they do to people and the healing and good they bring to those in search of answers Even though the Balkan wars took place two decades ago the fields where so many men women and children died still have gruesome and disturbing stories to tell Ball puts the spotlight on the forensic professionals tasked with telling that story and on what their work means to them as individuals and to the wider world s understanding of genocide and war
