The Great Armies of Antiquity Richard A. Gabriel, 2002-11-30 Gabriel examines 18 ancient army systems examining the organizational structure and weapons employed and the degree to which cultural values and imperatives shaped the form and application of military force The tactical doctrines and specific operational capabilities of each army are analyzed to explain how certain technical limitations and societal cultural imperatives affected the operational capabilities of ancient armies Cross cultural and cross historical connections ground the analysis in the larger historical context of the ancient world Sumer and Akkad The Armies of the Pharaohs The Hittites The Mitanni Armies of the Bible The Iron Army of Assyria Chinese Armies Persia and the Art of Logistics The Greeks Carthaginian Armies Armies of India Rome The Iberians Celts Germans and Goths The Army of Byzantium The Vikings The Arab Armies The Japanese Way of War The Mongols The Ottomans This book also provides an introductory overview of war in the ancient world from 2500 B C E to 1453 C E as well as an examination of the evolution of modern warfare from 1453 to 2002 C E

The Madness of Alexander the Great Richard A. Gabriel, 2015-03-31 Over the years some 20 000 books and articles have been written about Alexander the Great the vast majority hailing him as possibly the greatest general that ever lived Richard A Gabriel however argues that while Alexander was clearly a succesful soldier adventurer the evidence of real greatness is simply not there The author presents Alexander as a misfit within his own warrior society attempting to overcompensate Thoroughly insecure and unstable he was given to episodes of uncontrollable rage and committed brutal atrocities that would today have him vilified as a monstrous psychopath The author believes some of his worst excesses may have been due to what we now call Post Traumatic Stress Disorder of which he displays many of the classic symptoms brought on by extended exposure to violence and danger Above all the author thinks that Alexander s military ability has been flattered by History Alexander was tactically competent but contributed nothing truly original while his strategy was often flawed and distorted by his obsession with personal glory This radical reappraisal is certain to provoke debate

God's Generals Richard A. Gabriel, 2016-09-19 It is one of the more startling facts of military history that the founders of three of the four great religions Judaism Buddhism and Islam were also accomplished field generals with extensive experience in commanding men in battle One of these Muhammad fought eight battles and was wounded twice once almost fatally Another Siddhartha Gautama later to become the Buddha witnessed so much battlefield carnage that he suffered a psychological collapse Moses had become so much a god intoxicated personality it is a reasonable suspicion that he like the Buddha was murdered Indeed had the experiences of these men in war not been so successful it is quite possible that their achievements as religious leaders would never have occurred For all three war and religion were so closely intertwined in their personalities that it is difficult to discern where the influence of one ended and the other began This book attempts to explore the military lives of Moses the Buddha and Muhammad and the role their war experiences played in their religious lives

This book presents a comprehensive survey of warfare in India up to the point where the British began to dominate the sub continent It discusses issues such as how far was the relatively bloodless nature of pre British Indian warfare the product of stateless Indian society How far did technology determine the dynamics of warfare in India Did warfare in this period have a particular Indian nature and was it ritualistic The book considers land warfare including sieges naval warfare the impact of horses elephants and gunpowder and the differences made by the arrival of Muslim rulers and by the influx of other foreign influences and techniques The book concludes by arguing that the presence of standing professional armies supported by centralised bureaucratic states have been underemphasised in the history of India [New Perspectives on Ancient Warfare\[electronic Resource\]](#)

Garrett G. Fagan,Matthew Freeman Trundle,2010 [New Perspectives on Ancient Warfare](#) explores the armies of antiquity from Assyria and Persia to classical Greece and Rome The studies illustrate the ways in which technology innovation cultural exchange and tactical developments transformed ancient warfare by land and sea

British Museum Commission Coventry Kersey Dighton Patmore,1850 **Napoleon: On War** Bruno Colson,2015-05-14 This is the book on war that Napoleon never had the time or the will to complete In exile on the island of Saint Helena the deposed Emperor of the French mused about a great treatise on the art of war but in the end changed his mind and ordered the destruction of the materials he had collected for the volume Thus was lost what would have been one of the most interesting and important books on the art of war ever written by one of the most famous and successful military leaders of all time In the two centuries since several attempts have been made to gather together some of Napoleon s military maxims with varying degrees of success But not until now has there been a systematic attempt to put Napoleon s

thinking on war and strategy into a single authoritative volume reflecting both the full spectrum of his thinking on these matters as well as the almost unparalleled range of his military experience from heavy cavalry charges in the plains of Russia or Saxony to counter insurgency operations in Egypt or Spain To gather the material for this book military historian Bruno Colson spent years researching Napoleon s correspondence and other writings including a painstaking examination of perhaps the single most interesting source for his thinking about war the copy book of General Bertrand the Emperor s most trusted companion on Saint Helena in which he unearthed a Napoleonic definition of strategy which is published here for the first time The huge amount of material brought together for this ground breaking volume has been carefully organized to follow the framework of Carl von Clausewitz s classic On War allowing a fascinating comparison between Napoleon s ideas and those of his great Prussian interpreter and adversary and highlighting the intriguing similarities between these two founders of modern strategic thinking

The Barbarian North in Medieval Imagination Robert Rix, 2014-11-13 This book examines the sustained interest in legends of the pagan and peripheral North tracing and analyzing the use of an out of Scandinavia legend Scandinavia as an ancestral homeland in a wide range of medieval texts from all over Europe with a focus on the Anglo Saxon tradition The pagan North was an imaginative region which attracted a number of conflicting interpretations To Christian Europe the pagan North was an abject Other but it also symbolized a place from which ancestral strength and energy derived Rix maps how these discourses informed national legends of ancestral origins showing how an out of Scandinavia legend can be found in works by several familiar writers including Jordanes Bede Fredegar Paul the Deacon Freculph and thelweard The book investigates how legends of northern warriors were first created in classical texts and since re calibrated to fit different medieval understandings of identity and ethnicity Among other things the out of Scandinavia tale was exploited to promote a legacy of barbarian vigor that could withstand the negative cultural effects of Roman civilization This volume employs a variety of perspectives cutting across the disciplines of poetry history rhetoric linguistics and archaeology After years of intense critical interest in medieval attitudes towards the classical world Africa and the East this first book length study of the North will inspire new debates and repositionings in medieval studies

Soldiers' Lives through History - The Ancient World Richard A. Gabriel, 2006-11-30 Once warfare became established in ancient civilizations it s hard to find any other social institution that developed as quickly In less than a thousand years humans brought forth the sword sling dagger mace bronze and copper weapons and fortified towns The next thousand years saw the emergence of iron weapons the chariot the standing professional army military academies general staffs military training permanent arms industries written texts on tactics military procurement logistics systems conscription and military pay By 2 000 B C E war was an important institution in almost all major cultures of the world This book shows readers how soldiers were recruited outfitted how they fought and how they were cared for when injured or when they died It covers soldiers in major civilizations from about 4000 B C E to about 450 C E Topics are discussed cross culturally drawing examples from

several of the cultures armies and time periods within each chapter in order to provide the reader with as comprehensive an understanding as possible and to avoid the usual Western centric perspective too common in analyses of ancient warfare

The Military History of Ancient Israel Richard A. Gabriel, 2003-10-30 Exactly how did the Israelites cross the desert How did Moses cross the Red Sea How did Joshua take Jericho and how did the sun appear to stand still at the Ajjlon Valley No one has ever analyzed the Bible as a military history Gabriel provides the first attempt at a continuous historical narrative of the military history of ancient Israel He begins with a military analysis of Exodus an unprecedented and hugely significant contribution to Exodus Studies This book includes collaborative findings from archaeology demography ethnography and other relevant disciplines As a seasoned infantry officer and military historian Gabriel brings a soldier s eye to the infantry combat described in the Bible Seeking to make military sense of the Biblical narrative as preserved in Hebrew he renders comprehensible some of the mysterious explanations for famous events

Jesus the Egyptian Richard Gabriel, 2005 Jesus The Egyptian is a revolutionary attempt to examine the origins of Christianity as historical artifacts and not theological ones The author offers the theory that Christianity is historically rooted in the ancient Egyptian creed of Osiris and not only as is often claimed in Judaism presenting a radical break with established Christian tradition Professor Gabriel offers an intriguing analysis of Jesus psychological motivation to explain Jesus rejection of Judaism and his adoption of the Osiran Isis creed the most popular and practiced pagan theology of Christ s time

Man and Wound in the Ancient World Richard A. Gabriel, 2012 Examines the fascinating role of medicine in ancient military cultures Shows how the ancients understood the body patched up their warriors and sent them back into battle Reveals medical secrets lost during the Dark Ages Explores how ancient civilizations technologies have influenced modern medical practices

Scipio Africanus Richard A. Gabriel, 2008-06-30 The world often misunderstands its greatest men while neglecting others entirely Scipio Africanus surely the greatest general that Rome produced suffered both these fates Today scholars celebrate the importance of Hannibal even though Scipio defeated the legendary general in the Second Punic War and was the central military figure of his time In this scholarly and heretofore unmatched military biography of the distinguished Roman soldier Richard A Gabriel establishes Scipio s rightful place in military history as the greater of the two generals Before Scipio few Romans would have dreamed of empire and Scipio himself would have regarded such an ambition as a danger to his beloved republic And yet paradoxically Scipio s victories in Spain and Africa enabled Rome to consolidate its hold over Italy and become the dominant power in the western Mediterranean virtually ensuring a later confrontation with the Greco Macedonian kingdoms to the east as well as the empire s expansion into North Africa and the Levant The Roman imperium was being born and it was Scipio who had sired it Gabriel draws upon ancient texts including those from Livy Polybius Diodorus Silius Italicus and others as primary sources and examines all additional material available to the modern scholar in French German English and Italian His book offers a complete bibliography of all extant sources regarding Scipio s life The result is a rich detailed and contextual

treatment of the life and career of Scipio Africanus one of Rome's greatest generals if not the greatest of them all

Combat-Ready Kitchen Anastacia Marx de Salcedo, 2015-08-04 Americans eat more processed foods than anyone else in the world. We also spend more on military research. These two seemingly unrelated facts are inextricably linked. If you ever wondered how ready to eat foods infiltrated your kitchen, you'll love this entertaining romp through the secret military history of practically everything you buy at the supermarket. In a nondescript Boston suburb in a handful of low buildings buffered by trees and a lake, a group of men and women spend their days researching, testing, tasting, and producing the foods that form the bedrock of the American diet. If you stumbled into the facility, you might think the technicians dressed in lab coats and the shiny kitchen equipment belonged to one of the giant food conglomerates responsible for your favorite brand of frozen pizza or microwavable breakfast burritos. So you'd be surprised to learn that you've just entered the U.S. Army Natick Soldier Systems Center, ground zero for the processed food industry. Ever since Napoleon, armies have sought better ways to preserve, store, and transport food for battle. As part of this quest, although most people don't realize it, the U.S. military spearheaded the invention of energy bars, restructured meat, extended-life bread, instant coffee, and much more. But there's been an insidious mission creep because the military enlisted industry huge corporations such as ADM, ConAgra, General Mills, Hershey, Hormel, Mars, Nabisco, Reynolds, Smithfield, Swift, Tyson, and Unilever to help develop and manufacture food for soldiers on the front line. Over the years, combat rations or the key technologies used in engineering them have ended up dominating grocery store shelves and refrigerator cases: TV dinners, the cheese powder in snack foods, cling wrap. The list is almost endless. Now food writer Anastacia Marx de Salcedo scrutinizes the world of processed food and its long relationship with the military, unveiling the twists, turns, successes, failures, and products that have found their way from the armed forces and contractors' laboratories into our kitchens. In developing these rations, the army was looking for some of the very same qualities as we do in our hectic, fast-paced, twenty-first-century lives: portability, ease of preparation, extended shelf life, at-room-temperature affordability, and appeal to even the least adventurous eaters. In other words, the military has us chowing down like special ops. What is the effect of such a diet eaten as it is by soldiers and most consumers day in and day out, year after year? We don't really know. We're the guinea pigs in a giant public health experiment, one in which science and technology at the beck and call of the military have taken over our kitchens.

Thutmose III Richard A. Gabriel, 2009-08-31 In the course of his thirty-two-year reign over ancient Egypt, Thutmose III fought an impressive seventeen campaigns. He fought more battles over a longer period of time and experienced more victories than Alexander the Great and Julius Caesar did. Despite Thutmose III's surprisingly illustrious record, his name does not command the same immediate recognition as these highly visible military leaders. In *Thutmose III*, Richard Gabriel deftly brings to life the character and ability of ancient Egypt's warrior king and sheds light on Thutmose's key contributions to Egyptian history. Considered the father of the Egyptian navy, Thutmose created the first combat navy in the ancient world and built an enormous shipyard near Memphis to construct

troop horse and supply transports to support his campaigns in Syria and Iraq He also reformed the army establishing a reliable conscript base creating a professional officer corps equipping it with modern weapons and integrating chariotry s combat arm into new tactical doctrines Politically he introduced strategic principles of national security that guided Egyptian diplomatic commercial and military policies for half a millennium and created the Egyptian empire Through these crowning achievements Thutmose set into motion events that shaped and influenced the Levant and Egypt for the next four hundred years His reign can be regarded as a watershed in the military and imperial history of the entire eastern Mediterranean
