## **Great Ascent The Rural Poor In South Asia:**

**The Great Ascent** Inderjit Singh, 1990 Poverty is the grim reality for some 400 million people mostly small farmers and agricultural laborers in India Pakistan and Bangladesh To remedy the problem South Asian governments and international agencies have focused on raising the productivity of small farms and increasing opportunities for rural employment This strategy however has long been criticized for doing the poor more harm than good The author challenges that pessimistic view by critically reviewing a wealth of evidence from recent academic literature and the World Bank's operational experience He shows that rapid agricultural growth has benefited all classes of the poor and that the great ascent from poverty to a more materially rewarding life has begun A variety of programs intended to help the poor directly are examined in detail Research extension and training activities are evaluated for their effectiveness in promoting the adoption of high yielding varieties of cereal spreading new farming technology encouraging multiple cropping and increasing the cultivation of high value crops The author also considers programs in dairying poultry farming commercial fishing and forestry and argues that policymakers have neglected these potentially profitable activities Finally he discusses the dismal failure of land reforms in reducing poverty *The Great Ascent* Inderjit Singh, 1990 *Poverty Orientated Agricultural and Rural Development* Hartmut Brandt, Uwe Otzen, 2006-12-20 Over the last twenty years the proportion of development cooperation resources earmarked for agricultural development has dwindled to between six and seven per cent of total bi and multilateral Official Development Assistance This is despite the fact that eighty per cent of the world's poor live in rural agricultural areas and that the poor are disproportionately affected when political military and natural events lead to regional or global food shortages Brandt and Otzen's key book fills a gap in current literature undertaking a wide ranging conceptual reorientation of development cooperation criticizing the current orthodoxy and its bias towards urban areas and arguing that in order to effectively alleviate poverty across the world agricultural and rural development measures need to be implemented both by central and subnational governments aid agencies and the private sector The authors investigate the world food question the current pressures it is under and its link to rural poverty and set out the policies that need to be undertaken to reduce global poverty **Reinventing India** Stuart Corbridge, John Harriss, 2013-05-28 When India was invented as a modern country in the years after Independence in 1947 it styled itself as a secular federal democratic Republic committed to an ideology of development Nehru's India never quite fulfilled this promise but more recently his vision of India has been challenged by two revolts of the elites those of economic liberalization and Hindu nationalism These revolts have been challenged in turn by various movements including those of India's Backward Classes These movements have exploited the democratic spaces of India both to challenge for power and to contest prevailing accounts of politics the state and modernity *Reinventing India* offers an analytical account of the history of modern India and of its contemporary reinvention Part One traces India's transformation under colonial rule and the ideas and social forces which underlay the deliberations of

the Constituent Assembly in 1946 to consider the shaping of the post colonial state Part Two then narrates the story of the making and unmaking of this modern India in the period from 1950 to the present day It pays attention to both economic and political developments and engages with the interpretations of India s recent history through key writers such as Francine Frankel Sudipta Kaviraj and Partha Chatterjee Part Three consists of chapters on the dialectics of economic reform religion the politics of Hindu nationalism and on popular democracy These chapters articulate a distinct position on the state and society in India at the end of the century and they allow the authors to engage with the key debates which concern public intellectuals in contemporary India Reinventing India is a lucid and eminently readable account of the transformations which are shaking India more than fifty years after Independence It will be welcomed by all students of South Asia and will be of interest to students of comparative politics and development studies      *The Other Argentina* Larry Sawers,2018-02-07 In the early part of this century Argentina was one of the most affluent nations in the world Since then the Argentine economy has experienced long periods of stagnation and recession Larry Sawers links the country s economic failure to the backwardness of the interior which comprises 70 percent of the area of the country and in which nearly one third of the population resides The interior s poverty according to Sawers is caused by the scarcity of agricultural resources and by serious inequalities in the distribution of those resources The region is poorly endowed land has been degraded through abuse and overuse and most farmers work tiny unproductive plots Moreover most of the products of the interior are produced for highly protected domestic markets and face stiff competition and falling prices in world markets Recent reforms in Argentina have dramatically aggravated the economic crisis of the interior Sawers shows how the poverty of the interior has contributed to the dismal performance of the Argentine economy as a whole He emphasizes the deleterious effects of extensive emigration from the interior to the major urban areas that are unable to absorb the human tide Additionally the national government has taxed the more prosperous regions in order to subsidize the interior placing a severe drain on the federal government budget and worsening inflation The effects of the interior s poverty on the nation are also political Sawers argues that the backward political system in the interior exacerbates the worst features of the national political culture and governance which in turn pose profound obstacles to economic progress      **Economic Management in Sub Saharan Africa** ,      The Economy of Modern India B. R. Tomlinson,2013-04-25 A unique examination of the development of the modern Indian economy over the past 150 years      *Women and Credit* Gail Campbell,Beverly Lemire,Ruth Pearson,2020-07-12 Credit can be instrumental in equalizing opportunity and alleviating poverty yet historically men and women have not had the same access Partly because of this women have been excluded from many previous economic histories This book fills a significant gap in exploring the vexed relationship between the women and credit across time and space Providing examples of credit agencies and initiatives in both the developing and developed world Women and Credit raises important policy issues and makes valuable suggestions for reconfiguring the relationship between women and credit

It also answers questions previously ignored by scholars yet of vital significance to women's studies and economic history. What contribution did women make to the development of industrial capitalism? How does women's access to credit vary across time and cultures? How has the development of micro credit initiatives affected women's economic position and what role will such initiatives play in the future? This book is an invaluable resource for anyone in the fields of Women's studies, economic history, anthropology or development. **Maize Technology in Malawi** Paul W. Heisey, Melinda Smale, 1995

India John N. Mayar, 2003 India long known for its huge population, religious conflicts and its status as not quite best friend ally of the United States has moved from the backwaters of world attention to centre stage. Afghanistan and Pakistan with whom India is in almost conflict are neighbours. India has developed a nuclear capability which also has a way of grabbing attention. This book discusses current issues and historical background and provides a thorough index important to a better understanding of this diverse country. *Historical Dictionary of the World Bank* Sarah Tenney, Anne C.

Salda, 2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank, known more formally as the International Bank for Reconstruction and Development (IBRD), would flourish. Today with 188 members it is by far the largest lender for projects in agriculture, health, infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute. This second edition of the *Historical Dictionary of the World Bank* shows the substantial progress the Bank has made, this mainly through the dictionary section with concise entries on its component institutions, related organizations, its achievements in various fields, some of the major projects and member countries and its various presidents. The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years. Meanwhile the list of acronyms reminds us just who the main players are. And the bibliography directs readers to useful internal documentation and outside studies. **Economic**

**Development in Palanpur over Five Decades** Peter Lanjouw, Nicholas Stern, 1998-11-19 This book provides an account of economic development in Palanpur, a village in rural North India, based on five detailed surveys of the village over the period 1957 to 1993. These five decades have seen economic well-being rise in some important respects but stagnation and even decline in other areas. The analysis presented here focuses on the reasons behind this uneven progress. The authors tie in the background issues of the evolution of poverty and inequality and mobility over time with causal factors such as technological progress, demographic and sectoral changes, the operation of markets and the role of public action. The richness and unique nature of the qualitative and quantitative data collected and presented by Lanjouw and Stern yields an analysis which illuminates questions of direct importance to researchers in a wide variety of disciplines. **Historical Dictionary of India** Surjit Mansingh, 2006-05-09 The Republic of India is the second most populous, the seventh largest by geographical area and has the fourth largest economy in terms of purchasing power parity in the world. While it has always been an important

country it has often been neglected Of late however there has been much talk of the new India one with greater economic dynamism a more active foreign policy and the emergence of a huge middle class With over a hundred new cross referenced dictionary entries the majority of which pertain to the last decade and updating others the second edition of the Historical Dictionary of India illustrates the rapidly evolving situation without neglecting the country's ancient past The chronology has been brought up to date the introduction expanded and the bibliography includes numerous new titles      **Economic**

**Development** E. Wayne Nafziger, 2012-03-26 E Wayne Nafziger analyzes the economic development of Asia Africa Latin America and East Central Europe The book is suitable for those with a background in economics principles Nafziger explains the reasons for the recent fast growth of India Poland Brazil China and other Pacific Rim countries and the slow yet essential growth for a turnaround of sub Saharan Africa The fifth edition of the text written by a scholar of developing countries is replete with real world examples and up to date information Nafziger discusses poverty income inequality hunger unemployment the environment and carbon dioxide emissions and the widening gap between rich including middle income and poor countries Other new components include the rise and fall of models based on Russia Japan China Taiwan Korea and North America randomized experiments to assess aid an exploration of whether information technology and mobile phones can provide poor countries with a shortcut to prosperity and a discussion of how worldwide financial crises debt and trade and capital markets affect developing countries      **Exchange Rate Parity for Trade and Development** Pan A.

Yotopoulos, 1996 This book extends recent theories of incomplete markets to investigate empirically the appropriate balance between the market and the state in the trade relations between developed and developing countries The conclusion is that in an ideal world government intervention in foreign exchange and trade is necessary in developing countries in the early stages and inevitably decreases as development occurs Rationing of foreign exchange prevents a soft currency distortion that commonly afflicts developing countries and can turn comparative advantage trade into competitive devaluation trade with severe losses of income and welfare Yotopoulos finds that the level of underdevelopment narrowly circumscribes and conditions the extent to which free market free trade laissez faire can be beneficial contrary to the mainstream policy paradigm as currently applied The analysis and tests draw on empirical research from seventy countries and four extended country studies to confirm the usefulness and validity of the theoretical framework      *Rural Poverty, Community and Land Use* Jennifer Sherman, 1999

**A Framework for Survival** Kevin M. Cahill, 2013-10-28 Wars and natural disasters from the Balkans to the Sudan and from Afghanistan to Central Africa have increasingly placed humanitarian workers in the crossfire Kevin M Cahill has assembled an international team of renowned experts to offer a much needed assessment of the moral legal and political dilemmas and consequences of humanitarian assistance Focusing on health issues A Framework for Survival takes an unflinching look at the reality facing the nations and people involved from refugees to relief organizations In contrast to conventional military economic and geopolitical strategies it suggests rational and effective solutions and

foreign policy recommendations With the collapse of many government infrastructures since the end of the Cold War the success or failure of humanitarian efforts may to a large extent define the world's chances for survival      **India** Jean Drèze, Amartya Sen, 2002 This book explores the role of public action in eliminating deprivation and expanding human freedoms in India The analysis is based on a broad and integrated view of development which focuses on well being and freedom rather than the standard indicators of economic growth The authors place human agency at the centerstage and stress the complementary roles of different institutions economic social and political in enhancing effective freedoms

**Urban Land Markets and Land Price Changes** Amitabh Kundu, 2019-06-04 First published in 1997 this study is one of the forerunners in the area of urban land market and land price studies on a Third World city focusing on Lucknow City in Uttar Pradesh India and exploring house prices economic changes and construction Amitabh responds to the 2nd Habitat Conference of 1996 which realised that housing conditions for lower income group people in most Third World cities have not improved especially with regards to tenure affordability and overall housing quality      *The Marshall Plan Today* John Agnew, J. Nicholas Entrikin, 2004-06-24 This volume has as its focus the role of the Marshall Plan as both a force in the transformation of European Economic practices and a stimulus to political integration in Europe This organizing theme is framed in terms of two other issues that are central to contemporary debates in international political economy and geopolitical studies the origins and development of the Cold War and the growing globalisation of the world economy In relating the Marshall Plan to these issues this book goes beyond the typical diplomatic history approach to place the Plan in the context of both the political economy of late twentieth century Europe and the impact of American models of business and government that came with the Plan
