French Revolution An Economic Interpretation:

The French Revolution Florin Aftalion, 1990-03-22 The economic history of revolutionary France is still a neglected area in studies of the Revolution of 1789 Whilst some attention has been given to the condition of the peasants the urban working classes and the financial crisis of the Ancien Régime there has been a general tendency to regard economic factors as external and somewhat peripheral to the truly political nature of the Revolution This book is designed to redress the balance providing a clear accessible and thought provoking guide to the economic background to the French Revolution Professor Aftalion analyses the policies followed by successive revolutionary assemblies examining in detail taxation the confiscation of church property the assignats and the siege economy of the Terror He shows how decisions taken in 1789 by the Constituent Assembly inevitably led to a deepening financial and economic crisis and to increasingly radical and disastrous policies The study is important also for its exposure of many of the economic fallacies propounded both at the time by many Frenchmen and later by many modern historians

Rethinking the French Revolution George C. Comninel, 1987 Historians generally and Marxists in particular have presented the revolution of 1789 as a bourgeois revolution one which marked the ascendance of the bourgeois as a class the defeat of a feudal aristocracy and the triumph of capitalism Recent revisionist accounts however have raised convincing arguments against the idea of the bourgeois class revolution and the model on which it is based In this provocative study George Comninel surveys existing interpretations of the French Revolution and the methodological issues these raise for historians He argues that the weaknesses of Marxist scholarship originate in Marx's own method which has led historians to fall back on abstract conceptions of the transition from feudalism to capitalism Comninel reasserts the principles of historical materialism that found their mature expression in *Das Kapital* and outlines an interpretation which concludes that while the revolution unified the nation and centralized the French state it did not create a capitalist society

[The Bourgeois Revolution in France, 1789-1815](#) Henry Heller,2006 In the last generation the classic Marxist interpretation of the French Revolution has been challenged by the so called revisionist school The Marxist view that the Revolution was a bourgeois and capitalist revolution has been questioned by Anglo Saxon revisionists like Alfred Cobban and William Doyle as well as a French school of criticism headed by François Furet Today revisionism is the dominant interpretation of the Revolution both in the academic world and among the educated public Against this conception this book reasserts the view that the Revolution the capital event of the modern age was indeed a capitalist and bourgeois revolution Based on an analysis of the latest historical scholarship as well as on knowledge of Marxist theories of the transition from feudalism to capitalism the work confutes the main arguments and contentions of the revisionist school while laying out a narrative of the causes and unfolding of the Revolution from the eighteenth century to the Napoleonic Age

The Challenge of Revolution Vladimir Mau, Irina Starodubrovskaya, 2001-02-22 This volume provides an challenging and controversial explanation of the recent events in Russia It examines the causes processes and consequences of Russia s recent political development Drawing on and criticizing the existing literature the book also shows how the recent Russian experience casts light on general theories of revolution and comparative political developments The transformation in Russia is usually compared with transformations in other post communist countries The authors argue that the Russian transformation should be explained in the logic of the great revolutions of the past such as the English Civil War the French Revolution and the Bolshevik Revolution The difficulties and inconsistency of Russian reforms are usually explained as a result of mistakes made by reformers This book argues however that these problems should be considered as a natural

consequence of the weak state In revolution the weakness of state power is inevitable resulting from social fragmentation property rights transformation changes in the interests of different social groups Hence the authors argue that most of the transitional problems in Russia were unavoidable The authors go on to argue that revolutions are usually considered as rapid change made through violence However the spontaneous character of change in the situation of a weak state is a much more important feature of any revolution than violence The book contains unique interviews with four leaders of the Russian transformation Mikhail Gorbachev Alexander Yakovlev Yegor Gaidar and Gennadii Burbulis as well as the personal experience of the authors who were deeply involved in the practical process of Russian transformation

Historical Dictionary of the French Revolution Paul R. Hanson, 2015-01-15 The French Revolution remains the most examined event or period in world history It was most historians would argue the first modern revolution an event so momentous that it changed the very meaning of the word revolution from restoration as in the Glorious Revolution of 1688 in England to its modern sense of connoting a political and or social upheaval that marks a decisive break with the past one that moves a society in a forward or progressive direction No revolution has occurred since 1789 without making reference to this first revolution and most have been measured against it One cannot utter the date 1789 without thinking of revolution and so significant were the changes unleashed in that year that it has come to mark the dividing line between early modern and late modern European history Kings This second edition of Historical Dictionary of the French Revolution covers its history through a chronology an introductory essay and an extensive bibliography The dictionary section has over 400 cross referenced entries on the causes and origins the roles of significant persons crucial events and turning points important institutions and organizations and the economic social and intellectual factors involved in the event that gave birth to the Declaration of the Rights of Man and Citizen This book is an excellent access point for students researchers and anyone wanting to know more about this period
