French And Other Perspectives In Praxiology:

French and Other Perspectives in Praxiology Wojciech W. Gasparski, 2018-01-18 Volume 12 in this distinguished series explores current topics in praxiology as studied in France and elsewhere. As is characteristic of contemporary praxiology, contributors both investigate new topics and use new methods to re-examine older approaches. Part 1 is composed of three sections by French scholars. These deal with humans as a subject of action as well as a subject of knowledge. In respecting the particular domains of psychology and praxiology, they demonstrate how they converge to shed light on the human being as an individual or as part of a group. The first section discusses relations between individual action and collective action, while the second section is concerned with relations between the act, objects and space and explores work spaces, production spaces, office spaces and social spaces. The third section examines relations between action and cognition, a domain considered to be little understood in general. Finally, the role of mathematics in decision making is discussed as a determinate of the praxiological process. The second part is composed of contributions by scholars from Finland, Great Britain, Poland, Portugal, Spain and the United States. The topics are how praxiology helps economists understand cooperative actions and related issues of different responsibilities, how and to what extent university education creates conditions for competitive advantage in the countries of Central and Eastern Europe and how problems of corporate governance are approached in the region, how innovation influences competence in the region of established economy in Spain and how information systems constitute a multi-agent system. Finally, a formal analysis of praxiological dimensions in light of the fuzzy logic approach is discussed.

Global Perspectives on Ethics of Corporate Governance G. Rossouw, A. Sison, 2006-11-27 This volume takes a hard look at the soft practice of corporate governance. It grew out of a series of contributions from the Third ISBEE World Congress on Business Ethics that took place on July 2004 in Melbourne.

Praxiology and the Philosophy of Technology Wojciech W. Gasparski, Timo Airaksinen, 2008 Addresses useful questions about the philosophy and ethics of technology. This book discusses general questions about the theory of technology. It focuses on special topics like information and communication technologies and work systems as well as the foundations of problem solving and the history of innovation in the age of enlightenment.

Praxiological Essays Wojciech W. Gasparski, 2017-09-26 The 25th volume in the series *Praxiology: The International Annual of Practical Philosophy and Methodology* brings a praxiological perspective to current issues facing our society. In sixteen brand new essays, a team of international scholars expands praxiology beyond the borders of its historically philosophical application and uses it to address real world problems in a variety of fields. The volume outlines new approaches and reflections on traditional praxiological method and then applies these developments as tools in fields as diverse as ethics, psychology, sociology, economics, management and entrepreneurship. Grounded in the tradition of the Polish praxiologist Tadeusz Kotarbiński (1886-1981), the 25th volume entitled *Praxiological Essays: Texts and Contexts* highlights the rich mosaic of issues perceived in the practice of human action and carries a tradition of Praxiological
