Daughters of 1968 Lisa Greenwald, 2019 Daughters of 1968 is the story of French feminism between 1944 and 1981 when feminism played a central political role in the history of France The key women during this epoch were often leftists committed to a materialist critique of society and were part of a postwar tradition that produced widespread social change revamping the workplace and laws governing everything from abortion to marriage The May 1968 events with their embrace of radical individualism and antiauthoritarianism triggered a break from the past and the women's movement split into two strands One became universalist and intensely activist the other particularist and less activist distancing itself from contemporary feminism This theoretical debate manifested itself in battles between women and organizations on the streets and in the courts The history of French feminism is the history of women's claims to individualism and citizenship that had been granted their male counterparts at least in principle in 1789 Yet French women have more often donned the mantle of particularism advancing their contributions as mothers to prove their worth as citizens than they have thrown it off claiming absolute equality The few exceptions such as Simone de Beauvoir or the 1970s activists illustrate the diversity and tensions within French feminism as France moved from a corporatist and tradition minded country to one marked by individualism and modernity      *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences* ,2000      **Current Contents. Muslims integrating in France but rather how do French Muslims think about Islam In particular Bowen examines how French Muslims are fashioning new Islamic institutions and developing new ways of reasoning and teaching He looks at some of the quite distinct ways in which mosques have connected with broader social and political forces how Islamic educational entrepreneurs have fashioned niches for new forms of schooling and how major Islamic public actors have set out a specifically French approach to religious norms from publisher description
