Strategies and Options for Increasing and Sustaining Fisheries and Aquaculture Production to Benefit Poorer Households in Asia, 2008

Water Resources of North America Asit K. Biswas, 2013-12-17 Leonardo da Vinci the eminent Renaissance scholar and philosopher said water is the driver of nature Many may have considered it to be an overstatement in the past but at the beginning of the third millennium no sane individual would disagree with Leonardo s view Water is becoming an increasingly scarce resource for most of the world s citizens The current trends indicate that the overall situation is likely to deteriorate further at least for the next two decades unless the water profession eschews its existing business as usual practices which can only allow incremental changes to occur Somewhat surprisingly the water profession as a whole neither realised nor appreciated the gravity of the

global water situation as late as 1990 even though a few serious scholars have been pointing out the increasing criticality of the situation from around 1982 For example the seriousness of the crisis was not a major issue either at the International Conference on Water and the Environment which was organised by the UN system in Dublin and also at the UN Conference on Environment and Development at Rio de Janeiro Held in 1992 both are considered to be important events for the water sector of the past decade It is now being increasingly recognised that the Dublin Conference was poorly planned and organised and thus not surprisingly it produced very little if any worthwhile and lasting results Brief Introduction to Fisheries Xinjun Chen,Yingqi Zhou,2020-05-28 This book offers an introduction to aquaculture sciences and fisheries discussing the concepts and basic characteristics of fisheries fishery resources and the related industries as well as the status of fisheries in various countries around the globe The book also examines aquaculture aquatic product processing and utilization fishery information technology and fishery economics and management in addition to hot topics such as blue growth in fisheries carbon sink fisheries and global environmental changes in the context of fisheries Given its scope it is a valuable resource for undergraduate students in the field as well professional requiring a basic understanding of fisheries

Sustainable Blue Revolution in India Latha Shenoy,Shridhar Rajpathak,2021-05-31 This book provides comprehensive information on several dimensions of blue revolution in a structured form Material provided in the book has been gathered from several relevant published sources and views expressed are based on practical field experience of the authors Blue revolution would be one of the big game changers for the Indian economy The subject of sustainable development of fisheries sector being very vast concerted efforts have been made to accommodate all the relevant elements Very little reading material with proper analysis is currently available and this book is expected to bridge the gap and project way forward to achieve sustainable development of fisheries and aquaculture in India under the blue revolution The book is organised under 13 chapters covering wide ranging subjects that include fish production processing marketing exports imports of fishery products ecolabelling role of industry in promoting sustainability in fishing and aquaculture sustainability issues in marine inland fisheries aquaculture and fisheries regulations and legislations Information has been provided on Sustainable Development Goals SDGs particularly SDG 14 Life Below Water components of blue economy Government of India fisheries development initiatives and executive summary of recently launched PMMSY Emerging plant and cell based seafood segment overall impacts of climate change and impact of recent pandemic COVID 19 on fisheries and aquaculture are discussed under separate chapters Finally a chapter on Way Forward is included that suggests practical management measures technology infusion technical interventions along with few innovative concepts and approaches towards achieving blue revolution Note T F does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

Ecology and Classification of North American Freshwater Invertebrates James H. Thorp,Alan P. Covich,2001-05-11 The First Edition of Ecology and Classification of North American Freshwater Invertebrates has been immensely popular with

students and researchers interested in freshwater biology and ecology limnology environmental science invertebrate zoology and related fields The First Edition has been widely used as a textbook and this Second Edition should continue to serve students in advanced classes The Second Edition features expanded and updated chapters especially with respect to the cited references and the classification of North American freshwater invertebrates New chapters or substantially revised chapters include those on freshwater ecosystems snails aquatic spiders aquatic insects and crustaceans Most up to date and informative text of its kind Written by experts in the ecology of various invertebrate groups coverage emphasizes ecological information within a current taxonomic framework Each chapter contains both morphological and taxonomic information including keys to North American taxa usually to the generic level as well as bibliographic information and a list of further readings The text is geared toward researchers and advanced undergraduate and graduate students

Fisheries and Aquacultures Development in Sabah Fadzilah Majid Cooke, Ejria Salleh, Lee Hock Ann, 2017-06-18 Fisheries and Aquaculture Development in Sabah implications for Society Culture and Ecology builds on a trend in studies of social change of taking the environment seriously Coming from the disciplines of sociology economics and marine science the authors deal with issues of sustainability in economic social and ecological terms The overall political ecology approach of the book diversifies into sub themes as the chapters engage with frameworks on the ecological limits of economic development entitlements and well being participatory development gender and knowledge production science and citizenship as well as the symbolic and material value of national and international borders Ecological aquaculture introduces new livelihood opportunities as well as losses And it has a degree of ecological costs depending on environmental conditions and power relations that affect local production We argue in this book that social and environmental justice issues are connected so that effective solutions to environmental problems can only be devised if the social justice issues are paid attention to This general thrust in placing centre stage social and environmental justice issues is not unique to Sabah since these are issues experienced by developing countries similarly positioned in their dependence on natural resources for economic development
