Freud A Man Of His Century:

Freud, a Man of His Century Gunnar Brandell, 1979 **Freud** Peter Gay, 1998 A biography and study of the psychoanalyst's career family personal life and professional struggles *Freud's Literary Culture* Graham Frankland, 2000-06-05 This original study investigates the role played by literature in Sigmund Freud's creation and development of psychoanalysis Graham Frankland analyses the whole range of Freud's own texts from a literary critical perspective providing a comprehensive reappraisal of his life's work Freud was steeped in classical European literature but seems initially to have repressed all literary influences on his scientific work Frankland traces their re-emergence examining in detail Freud's many literary allusions and quotations as well as the rhetoric and imagery of his writing He explores Freud's own attempts at analysing literature the influence of literary criticism on his approach to analysing patients and his creation of psychoanalytical novels quasi literary fictions fraught with profoundly personal subtexts Freud's *Literary Culture* sheds new light on a multi-faceted contradictory writer who continues to have an unparalleled impact on our postmodern culture precisely because he was so deeply rooted in European literary tradition **The Oxford Handbook of Philosophy and Psychoanalysis** Richard Gipps, Michael Lacewing, 2019-02-21 Psychoanalysis is often equated with Sigmund Freud but this comparison ignores the wide range of clinical practices observational methods general theories and cross-pollinations with other disciplines that characterise contemporary psychoanalytic work Central psychoanalytic concepts to do with unconscious motivation primitive forms of thought defence mechanisms and transference form a mainstay of today's richly textured contemporary clinical psychological practice In this landmark collection on philosophy and psychoanalysis leading researchers provide an evaluative overview of current thinking Written at the interface between these two disciplines *The Oxford Handbook of Philosophy and Psychoanalysis* contains original contributions that will shape the future of debate With 34 chapters divided into eight sections covering history clinical theory phenomenology science aesthetics religion ethics and political and social theory this Oxford Handbook displays the enduring depth breadth and promise of integrating philosophical and psychoanalytic thought Anyone interested in the philosophical implications of psychoanalysis as well as philosophical challenges to and re-statements of psychoanalysis will want to consult this book It will be a vital resource for academic researchers psychoanalysts and other mental health professionals graduates and trainees **Strindberg and Autobiography** Michael Robinson, 2013-05-31 This is a book about Strindberg and about autobiographical writing about how a particular writer projects himself in language the problems this entails the subterfuges it engenders about how he finds and loses himself there It therefore attempts to place this central aspect of Strindberg's project upon a more nuanced and substantial footing than the familiar tradition of biographical criticism in Strindberg studies normally permits and does not restrict itself only to those works singled out by Strindberg as explicitly autobiographical Nor I should perhaps add does it concern itself in any detailed way with the laborious examination of the relative accuracy of the life Strindberg attributed to

himself whether for example the description of his early years in *The Son of a Servant* as a time of fear and hunger is in fact belied by the evident plenitude in the way of food and drink as chronicled in his father's household accounts. In any case the myth a writer generates about his own experience is as significant a fact as any other and a writer like Strindberg merely accentuates the way in which all of us live our lives as fictions in terms of the available narrative and plot structures structures that incorporate those personal symbolic landscapes which as Strindberg well knew are in large part unconsciously fostered by the prevailing doxa or mythologies. I am aware however that the approach employed here remains partial. Notwithstanding his achievement in other fields all of which including his scientific preoccupations deserve to be taken seriously Strindberg's major achievement remains his drama. A consummate creator as well as player of roles the mosaic work of character which he elaborated in his theatrical projections is an essential complement to the life traced in his prose works and deserves to be studied as such. Moreover like Janine Chasseguet Smirgel in her analysis of Strindberg in *Pour une psychanalyse de l'art et de la créativité* Paris 1971 Je n'ai pas manqué toutefois d'être frappé par la pauvreté relative des thèmes des œuvres biographiques si on les compare à la richesse des laborations dont ces mêmes thèmes sont l'objet dans l'œuvre dramatique. Maybe the occasion to explore this elaborated wealth of drama will one day present itself. *The 20th Century A-GI* Frank N. Magill, 2013-05-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography. *Edinburgh Companion to Twentieth-Century Literatures in English* Brian McHale, 2006-06-28 An imaginatively constructed new literary history of the twentieth century. This companion with a difference sets a controversial new agenda for literary historical analysis. Far from the usual forced march through the decades genres and national literatures this reference work for the new century cuts across familiar categories focusing instead on literary hot spots: Freud's Vienna and Conrad's Congo in 1899; Chicago and London in 1912; the Somme in July 1916; Dublin, London and Harlem in 1922; and so on down to Bradford and Berlin in 1989; the fatwa against Salman Rushdie; the new digital media; Stockholm in 1993; Toni Morrison's Nobel Prize and September 11 2001. *The Sexual Century* Ethel Spector Person, 1999-01-01 Over the course of the past century sexual liberation has transformed the way in which most of us regard our bodies and live our sexual lives. Now a preeminent psychoanalytic theoretician on sex and gender discusses what has gone into this unquiet revolution: the roles played by sexologists and psychoanalysts; antibiotics and birth control; the liberation movements; and Freud's insight that sex has as much to do with the mind as with the genitals. In this collection of new and previously published papers Ethel Person writes of the centrality of sexuality to our identity. She

describes the role of fantasy in desire its different expression in the sexes and the way in which desire is inevitably intertwined with power Her classic papers on transvestism transsexualism and cross dressing homosexuals written with Lionel Ovesey help us to understand how gender and sex develop in all of us The public acceptance of the transsexual says Person is emblematic of the profound scientific and intellectual shifts that have taken place in the past hundred years The way that sex and gender develop and are experienced and expressed is the result not only of nature and nurture but also of the cultural zeitgeist its unspoken values and biases Einstein and Twentieth-Century Politics Richard Crockatt, 2016-09-22 Albert Einstein world renowned as a physicist was also publicly committed to radical political views Despite the vast literature on Einstein Einstein and Twentieth Century Politics is the first comprehensive study of his politics covering his opinions and campaigns on pacifism Zionism control of nuclear weapons world government freedom and racial equality Most studies look at Einstein in isolation but here he is viewed alongside a liberal international of global intellectuals including Gandhi Albert Schweitzer Bertrand Russell H G Wells George Bernard Shaw Romain Rolland Thomas Mann and John Dewey Frequently called upon to join campaigns on great issues of war peace and social values they all knew or corresponded with Einstein This volume examines how Einstein and comparable intellectuals sought to exert a salutary influence as Einstein put it in a letter to Freud Close attention is given to the unique qualities Einstein brought to his interventions in political debate His influence derived in the first instance from his celebrity status as the scientist of genius whose theory of relativity was both incomprehensible to most and seemingly relevant to many aspects of aspects of culture and the cosmos Einstein's complex and enigmatic personality which combined intense devotion to privacy and a capacity to perform on the public stage also contributed to the Einstein myth Studying Einstein's politics it is argued here takes us not only into the mind of Einstein but to the heart of the great public issues of the twentieth century Women and Science, 17th Century to Present Véronique Molinari, 2011-05-25 If women's interest and participation in the advancement of science has a long history the academic study of their contributions is a far more recent phenomenon to be placed in the wake of second wave feminism in the 1970s and the advent of women's studies which have since then given impetus to research on female figures in specific fields or more generally speaking on women's battles to gain access to knowledge education and recognition in the scientific world These studies while providing a useful insight into the contributions of a few more or less well known figures have mostly focused however on the obstacles that women have had to overcome in the field of education and employment or in their quest for acknowledgement by their male peers The aim of this volume is to try and approach the issue from a different and more comprehensive point of view taking into account not only the position of women in science but also the link between women and science through the analysis of various kinds of discourse and representation such as the press poetry fiction biographies and autobiographies or professional journals including that of women themselves The questions of the presentation or re presentation of science by women are thus at the core of this study as well as that of the

portrayal and self portrayal of women in the sciences whether in the educational or the professional field A final part examines how women are represented in science fiction which like science itself has traditionally been a field dominated by men

The Formation of 20th-Century Queer Autobiography G. Johnston, 2016-04-30 In their literary autobiographies modernists Vita Sackville West Gertrude Stein Virginia Woolf and H D Hilda Doolittle challenge the scientific figures of the perverse lesbian particularly those promulgated by Havelock Ellis and Sigmund Freud By multiplying their I s manipulating subject and object divisions undermining boundaries between writer and audience and using repetition to code erotic moments these writers queer the terms of autobiography That queering requires understanding autobiography as more institutional than introspective and the autobiographies themselves question the very theories that determine them theories of lesbianism female development and memory
