Freudian Repression Conversation Creating The Unconscious:

Freudian Repression Michael Billig, 1999-11-04 This book presents a reinterpretation of Freud to show how language can be expressive and repressive

Freudian Repression Michael Billig, 1999 In *Freudian Repression* Michael Billig presents an original reformulation of Freud's concept of repression showing that in his theory of the unconscious he fails to examine how people actually repress shameful thoughts Drawing on recent insights from discursive psychology Billig suggests that in learning to speak we also learn what not to say language is thus both expressive and repressive He applies this perspective to some of Freud's classic case histories such as Dora and the Rat Man and the great psychologist's own life to show the importance of small words in speech By focusing on previously overlooked exchanges even Freud himself can be seen to be repressing

Freudian Repression also offers new insights on the current debate about recovered memories and the ideological background to psychoanalysis which will guarantee its interdisciplinary appeal to psychologists language theorists discourse analysts students of psychoanalysis literary studies and sociologists

Sinophobia Franck Billé, 2014-10-31 Sinophobia is a timely and groundbreaking study of the anti-Chinese sentiments currently widespread in Mongolia. Graffiti calling for the removal of Chinese from the urban landscape, songs about killing the Chinese are played in public spaces and rumors concerning Chinese plans to take over the country and exterminate the Mongols are rife. Such violent anti-Chinese feelings are frequently explained as a consequence of China's meteoric economic development, a cause of much anxiety for her immediate neighbors and particularly for Mongolia, a large but sparsely populated country that is rich in mineral resources. Other analysts point to deeply entrenched antagonisms and to centuries of hostility between the two groups, implying unbridgeable cultural differences. Franck Billé challenges these reductive explanations. Drawing on extended fieldwork interviews and a wide range of sources in Mongolian, Chinese and Russian, he argues that anti-Chinese sentiments are not a new phenomenon but go back to the late socialist period, 1960-1990, when Mongolia's political and cultural life was deeply intertwined with Russia's. Through an in-depth analysis of media discourses, Billé shows how stereotypes of the Chinese emerged through an internalization of Russian ideas of Asia and how they can easily extend to other Asian groups such as Koreans or Vietnamese. He argues that the anti-Chinese attitudes of Mongols reflect an essential desire to distance themselves from Asia overall and to reject their own Asianness. The spectral presence of China, imagined to be everywhere and potentially in everyone, thus produces a pervasive climate of mistrust, suspicion and paranoia. Through its detailed ethnography and innovative approach, *Sinophobia* makes a critical intervention in racial and ethnic studies by foregrounding Sinophobic narratives and by integrating psychoanalytical insights into its analysis. In addition to making a useful contribution to the study of Mongolia, it will be essential reading for anthropologists, sociologists and historians interested in ethnicity, nationalism and xenophobia. *Psychology in Black and White* Sergio

Salvatore, 2015-10-01 This book is long awaited within the contemporarily creative field of cultural psychologies. It is a theoretical synthesis that is at the level of innovations that Sigmund Freud, James Mark Baldwin, William Stern, Kurt Lewin
