**Breathing Fire** Jaime Lowe,2021-07-27 A dramatic revelatory account of the female inmate firefighters who battle California wildfires Shawna was overcome by the claustrophobia the heat the smoke the fire all just down the canyon and up the ravine She was feeling the adrenaline but also the terror of doing something for the first time She knew how to run with a backpack they had trained her physically But that s not training for flames That s not live fire California s fire season gets hotter longer and more extreme every year fire season is now year round Of the thousands of firefighters who battle California s blazes every year roughly 30 percent of the on the ground wildland crews are inmates earning a dollar an hour Approximately 200 of those firefighters are women serving on all female crews In *Breathing Fire* Jaime Lowe expands on her revelatory work for The New York Times Magazine She has spent years getting to know dozens of women who have participated in the fire camp program and spoken to captains family and friends correctional officers and camp commanders The result is a rare illuminating look at how the fire camps actually operate a story that encompasses California s underlying catastrophes of

climate change economic disparity and historical injustice but also draws on deeply personal histories relationships desires frustrations and the emotional and physical intensity of firefighting Lowe s reporting is a groundbreaking investigation of the prison system and an intimate portrayal of the women of California s Correctional Camps who put their lives on the line while imprisoned to save a state in peril The Great Fire of Ellsworth, 1933 Darlene Springer,2008-01-01 Eating Smoke Mark Tebeau,2012-09-01 During the period of America s swiftest industrialization and urban growth fire struck fear in the hearts of city dwellers as did no other calamity Before the Civil War sweeping blazes destroyed more than 200 million in property in the nation s largest cities Between 1871 and 1906 conflagrations left Chicago Boston Baltimore and San Francisco in ruins Into the twentieth century this dynamic hazard intensified as cities grew taller and more populous confounding those who battled it Firefighters death defying feats captured the popular imagination but too often failed to provide more than symbolic protection Hundreds of fire insurance companies went bankrupt because they could not adequately deal with the effects of even smaller blazes Firefighters and fire insurers created a physical and cultural infrastructure whose legacy in the form of heroic firefighters insurance policies building standards and fire hydrants lives on in the urban built environment In Eating Smoke Mark Tebeau shows how the changing practices of firefighters and fire insurers shaped the built landscape of American cities the growth of municipal institutions and the experience of urban life Drawing on a wealth of fire department and insurance company archives he contrasts the invention of a heroic culture of firefighters with the rational organizational strategies by fire underwriters Recognizing the complexity of shifting urban environments and constantly experimenting with tools and tactics firefighters fought fire ever more aggressively eating smoke when they ventured deep into burning buildings or when they scaled ladders to perform harrowing rescues In sharp contrast to the manly valor of firefighters insurers argued that the risk was quantifiable measurable and predictable Underwriters managed hazard with statistics maps and trade associations and they eventually agitated for building codes and other reforms which cities throughout the nation implemented in the twentieth century Although they remained icons of heroism firefighters cultural and institutional authority slowly diminished Americans had begun to imagine fire risk as an economic abstraction By comparing the simple skills employed by firefighters climbing ladders and manipulating hoses with the mundane technologies maps and accounting charts of insurers the author demonstrates that the daily routines of both groups were instrumental in making intense urban and industrial expansion a less precarious endeavor **Wartime Fires** National Fire Protection Association,1944 **Let Us Not Aid the Axis -- Prevent Fires** Denver (Colo.). Fire Prevention Bureau,1942 **The Forgotten War** Joseph F. Maraglino,2016-08-31 While in the process of writing this book a catastrophic event occurred in US firefighting history An elite force of firefighters nineteen in number eighteen men and one woman died while fighting a forest fire in Arizona A wind shift placed this raging inferno head on into this force One TV announcer claimed the winds were gushing up to fifty miles per hour Television programs showed viewers what these

firefighters had to protect themselves They lay flat on the ground and put this tentlike apparatus over them which was probably made of a fire retardant material but this could not protect these heroes from thousand degree temperatures and gusting winds which turned this inferno similar to a flamethrower As a firefighter even though you ve fought similar fires many times you never take anything for granted As you will see in this book fires thought to be under control were turned into second and larger alarms The red devil sometimes throws you a curve ball and it can cost you your life and civilians lives While you have this story fresh in your minds say a prayer for these firefighters who got burned alive And on the eighth day God created firefighters

**The Triangle Shirtwaist Factory Fire** Jacqueline Dembar Greene,2007-01-01 Discusses the 1911 fire that killed 146 New York garment factory workers the conditions that led up to it and reforms in legislation regarding workplace safety

American Fire Monica Hesse,2018-05-22 The arsons started on a cold November midnight and didn t stop for months Night after night the people of Accomack County waited to see which building would burn down next regarding each other at first with compassion and later suspicion Vigilante groups sprang up patrolling the rural Virginia coast with cameras and camouflage Volunteer firefighters slept at their stations The arsonist seemed to target abandoned buildings but local police were stretched too thin to surveil them all Accomack was desolate there were hundreds of abandoned buildings And by the dozen they were burning One of the year s best and most unusual true crime books Christian Science Monitor American Fire brings to vivid life the reeling county of Accomack Ace reporter Entertainment Weekly Monica Hesse spent years investigating the story emerging with breathtaking portraits of the arsonists troubled addict Charlie Smith and his girlfriend Tonya Bundick Tracing the shift in their relationship from true love to crime spree Hesse also conjures the once thriving coastal community decimated by a punishing economy and increasingly suspicious of their neighbors as the culprits remained at large Weaving the story into the history of arson in the United States the critically acclaimed American Fire re creates the anguished nights this quiet county lit up in flames evoking a microcosm of rural America a land half gutted before the fires began

MacLean,2014-01-07 When a jury returns to a packed courtroom to announce its verdict in a capital murder case every noise even a scraped chair or an opening door resonates like a high tension cable snap Spectators stop rustling in their seats prosecution and defense lawyers and the accused stiffen into attitudes of wariness and the judge looks on owlishly In that atmosphere of heightened expectation the jury entered a Riverside County Superior Court room in southern California to render a decision in the trial of Raymond Oyler charged with murder for setting the Esperanza Fire of 2006 which killed a five man Forest Service engine crew sent to fight the blaze Today wildland fire is everybody s business from the White House to the fireground Wildfires have grown bigger more intense more destructive and more expensive Federal taxpayers for example footed most of the 16 million bill for fighting the Esperanza Fire But the highest cost was the lives of the five man crew of Engine 57 the first wildland engine crew ever to be wiped out by flames They were caught in an area ignition which in seconds covered three quarters of a mile and swept the house they were defending on a dry ridge face where human dwellings chew into previously wild and still unforgiving

territory John Maclean award winning author of three previous books on wildfire disasters spent more than five years researching the Esperanza Fire and covering the trial of Raymond Oyler Maclean offers an insider s second by second account of the fire and the capture and prosecution of Oyler the first person ever to be found guilty of murder for setting a wildland fire
