Cultures of Confinement Frank Dikötter, Ian

Brown,2018-07-05 Prisons are on the increase from the United States to China as ever larger proportions of humanity find themselves behind bars While prisons now span the world we know little about their history in global perspective Rather than interpreting the prison s proliferation as the predictable result of globalization Cultures of Confinement underlines the fact that the prison was never simply imposed by colonial powers or copied by elites eager to emulate the West but was reinvented and transformed by a host of local factors its success being dependent on its very flexibility Complex cultural negotiations took place in encounters between different parts of the world and rather than assigning a passive role to Latin America Asia and Africa the authors of this book point out the acts of resistance or appropriation that altered the social practices associated with confinement The prison in short was understood in culturally specific ways and reinvented in a variety of local contexts examined here for the first time in global perspective *The Social City* Mats Deland,2001

Making Social Knowledge in the Victorian City Martin Hewitt,2019-07-02 This study explores the ecology of knowledge of urban Britain in the Victorian period and seeks to examine the way in which Victorians comprehended the nature of their urban society through an exploration of the history of Victorian Manchester and two specific case studies on the fiction of Elizabeth Gaskell and the campaigns for educational extension which emerged out of the city It argues that crucial to the Victorians approaches was the visiting mode as a particular discursive formation including its institutional foundations its characteristic modes and assumptions and the texts which exemplify it Recognition of the importance of the visiting mode it is argued offers a fundamental challenge to established Foucauldian interpretations of nineteenth century society and culture and provides an important corrective to recent scholarship of nineteenth century technologies of knowing *Making Social Science Matter* Bent Flyvbjerg,2001-01-15 New approach demonstrating how social science can be successful focusing on context values and power *Post-Soviet Social* Stephen J. Collier,2011-08-08 The Soviet Union created a unique form of urban modernity developing institutions of social provisioning for hundreds of millions of people in small and medium sized industrial cities spread across a vast territory After the collapse of socialism these institutions were profoundly shaken casualties in the eyes of many observers of market oriented reforms associated with neoliberalism and the Washington Consensus In Post Soviet Social Stephen Collier examines reform in Russia beyond the Washington Consensus He turns attention from the noisy battles over stabilization and privatization during the 1990s to subsequent reforms that grapple with the mundane details of pipes wires bureaucratic routines and budgetary formulas that made up the Soviet social state Drawing on Michel Foucault s lectures from the late 1970s Post Soviet Social uses the Russian case to examine neoliberalism as a central form of political rationality in contemporary societies The book s basic finding that neoliberal reforms provide a justification for redistribution and social welfare and may work to preserve the norms and forms of social modernity lays the groundwork for a critical revision of conventional understandings of these topics **Urban Modernity** Miriam R.

Levin,Sophie Forgan,Martina Hessler,Robert H. Kargon,Morris Low,2010-04-16 How Paris London Chicago Berlin and Tokyo

created modernity through science and technology by means of urban planning international expositions and museums At the close of the nineteenth century industrialization and urbanization marked the end of the traditional understanding of society as rooted in agriculture Urban Modernity examines the construction of an urban centered industrial based culture an entirely new social reality based on science and technology The authors show that this invention of modernity was brought about through the efforts of urban elites businessmen industrialists and officials to establish new science and technology related institutions International expositions museums and other such institutions and projects helped stem the economic and social instability fueled by industrialization projecting the past and the future as part of a steady continuum of scientific and technical progress The authors examine the dynamic connecting urban planning museums educational institutions and expositions in Paris London Chicago Berlin and Tokyo from 1870 to 1930 In Third Republic Paris politicians administrators social scientists architects and engineers implemented the future city through a series of commissions agencies and organizations in rapidly expanding London cultures of science and technology were both rooted in and constitutive of urban culture in Chicago after the Great Fire Commercial Club members pursued civic ideals through scientific and technological change in Berlin industry scientific institutes and the popularization of science helped create a modern metropolis and in Meiji era Tokyo Edo modernization and Westernization went hand in hand
