Wetlands of the World I: Inventory, Ecology and Management Dennis F. Whigham, D. Dykyjová, S. Hejný, 2013-03-09 The impetus for this volume was the 2nd International Wetlands Conference which was held in June 1984 at Trebon Czechoslovakia An overview of the worlds wetlands was one of the themes of the conference and it was decided that a useful follow up would be a publication on the same topic The initial goal was to cover as many of the worlds wetlands as possible in one volume and to have an emphasis on wetland ecology biota classification and management Individuals who made presentations at the Trebon conference were asked to prepare chapters and the editors also solicited other contributions For a variety of reasons the initial goal has been difficult to reach especially coverage of the entire globe and it has been necessary to publish the contributions in more than one volume Volume 1 represents the completion of the first phase of the project and it covers most of the Western Hemisphere Australia most of Africa the Indian subcontinent the Mediterranean region and Papua New Guinea Volume 2 will contain chapters on Western Europe Northern Europe Central Europe most of northern and It is our hope that Volume western Asia the Middle East and Indonesia 2 will appear in the near future and if possible a third volume will be published if authors can be secured to cover areas such as the Far East other parts of the Indo Pacific region and New Zealand
