Luria** Michael Cole, 2017-10-03 This volume contains various articles that are a sample of the ideas constructed and facts collected by Alexander Romanovich Luria during more than half a century of psychological research *Sport and American Society: Selected Readings* George Harvey Sage, 1974 **The Selected Writings of Marc Bloch** Iona Singh, 2025-02-20 This book brings a selection of the influential writings of Marc Bloch into the English language largely for the very first time Chronologically arranged to trace the developmental arc of Bloch's historical philosophy the translations in *The Selected Writings of Marc Bloch* offer an illuminating insight into the theories of a pioneer historian and original founder of the renowned Annales school of French social history The carefully curated translations in this volume reveal Bloch's thoughts on questions that historical studies has grappled with since the birth of the discipline Why should history exist at all What value does it have What exactly is a science of history What is the actual role of the historian in historical studies This collection presents Bloch's precise understanding of the contours of the discipline of history defined by the abutment and transgression of its borders by other subjects Consequently it provides a theoretical underpinning for multidisciplinary and interdisciplinary concepts via historical studies pulling into its fold diverse themes such as customs agriculture economics nutrition technology manners art fashion and countless other topics explored

by Bloch himself in the process Selected Writings of Edward Sapir Edward Sapir,1981 The Selected Writings of Maurice O'Connor Drury Maurice O'Connor Drury,2017-09-21 Maurice O Connor Drury was among Wittgenstein s first students after his return to Cambridge in 1929 The subsequent course of Drury s life and thought was to be enormously influenced by his teacher from his decision to become a doctor to his later work in psychiatry The Selected Writings of Maurice O Connor Drury brings together the best of his lectures conversations and letters on philosophy religion and medicine Central to the collection is the *Danger of Words* the 1973 text described by Ray Monk as the most truly Wittgensteinian book published by any of Wittgenstein s students Through notes on conversations with Wittgenstein letters to a student of philosophy and correspondence of almost 30 years with Rush Rhees Drury gives shape to what he had learned from Wittgenstein Whether discussing methods of philosophy Simone Weil or the power of hypnosis he makes fascinating excursions into the bearing of Wittgenstein s thought on philosophy and the practice of medicine and psychiatry With an introduction presenting a new biography of Drury analysing the relationship between him and Wittgenstein The Selected Writings of Maurice O Connor Drury features previously unpublished archival sources Beautifully written and carefully selected each piece reveals the impact of Wittgenstein s teachings shedding light on the friendship and thinking of one of the most important philosophers of the 20th century Psychoanalytic Accounts of Consuming Desire John Desmond,2012-11-28 Provides an accessible introduction to psychoanalytic explanations of consumer desire Topics are drawn widely to reflect the scope of Freud s vision and include dreams sexuality and hysteria Discussion is widened to selectively include authors such as Melanie Klein and Jacques Lacan and to include evaluation of current research *The Emperor's New Nudity* Yuval Kreminitzer,2024-12-10 An analysis of contemporary authoritarianism and the medium in which it flourishes the internet as well as what lies at the complex intersection of authority and technology In recent decades a new style of authoritarian politics has taken hold throughout the liberal democratic world The new authority figures are characterized by obscene transgressive behavior reminiscent of the crowd leader as theorized by Freud only far less transient In *The Emperor s New Nudity* Yuval Kreminitzer considers the fraught intersection of authority and technology the internet being the medium that has allowed contemporary authoritarianism to thrive asking foundational questions such as How can we think of the network as a social phenomenon What can social and political phenomena teach us about the nature of the new technology And how does technology reshape the very fabric of social and political life Technology Kreminitzer writes leads us toward an impersonal and hyperrational world to such an extent that it renders human subjectivity outmoded Authority on the other hand anchors our subjective identifications to certain figures and seems to be hopelessly primitive and irrational What is required then is a dialectics of the primal a study of the way in which what strikes us as essential enters into the dynamics of historical change From this perspective authority and technology can be said to be divided by a common object the unwritten law and the special knowledge that pertains to it a knowledge without knowers **When We Deal**

with Children Selected Writings Fritz Redl, 1972-09 From Simon Schuster When We Deal with Children is Fritz Redl's exploration of the children as addressed in selected writings covering multiple topics in the field When We Deal with Children is Fritz Redl's collection including writings on the ongoing crisis in the children's field as well as ego disturbances and ego support

Anthropologists and the Rediscovery of America, 1886-1965 John S. Gilkeson, 2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold's the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective
