European Emblem Selected Papers From The Glasgow Conference:

The European Emblem Bernard F. Scholz, Michael Bath, David Weston, 2024-01-08 The ten papers in this volume were all presented at the first International Conference The European Emblem held in Glasgow in August 1987 under the auspices of the Society for Emblem Studies The conference included papers discussing most of the major European languages in which emblem books flourished and the papers selected for the presented volume represent something of the variety and scope of current scholarship in this field Subjects dealt with include a protoemblematic Latin translation of the Tabula Cebetis the Emblematum Liber by Andreas Alciat the earliest reception of the Ars Emblematica in Dutch the career of Thomas Palmer Daniel Cramers 80 Emblemata moralia nova and the Emlimata of Polockij The papers selected for this volume demonstrate the vigor and variety of work in this field whilst also suggesting some of the directions and opportunities for further research

The European Emblem Bernhard F. Scholz, Michael Bath, David W. Weston, 1990 A selection of papers read at the first international conference devoted exclusively to emblematics The papers have been selected with an eye to representing various national traditions in emblematics and various currently active approaches to the emblem Spectacle & Image in Renaissance Europe André Lascombes, 1993 This collection of nineteen essays focuses on the ways in which in England France and Spain the Renaissance made propagandistic or aesthetic use of the image in various spectacles Under surface differences between genres what emerges is a surprising similarity in tactics and response which invites further questioning about image elaboration and its reception **European Iconography - East and West** Gyorgy E. Szonyi, 2023-08-14 This volume is the offspring of many years of research in symbolic representations carried out at the English and Comparative Literature departments of J zsef Attila University Szeged In 1990 the dramatic changes in East Central Europe inspired the organization of an international conference where scholars of the politically defined East and West could exchange ideas in the fields of iconography emblem studies and cultural symbolisation In June 1993 at the conference in Szeged fifty seven papers were read by scholars representing Canada the Czech Republic England Germany Holland Hungary Poland Rumania and the USA The present publication contains eighteen papers covering the following aspects Iconography and Ideology Iconography and History The World of Emblems and Occult Emblematics The volume not only shows the state of affairs in these important fields but also demonstrates the scope and strength of a new type of European cooperation The Emblem **in Early Modern Europe** Peter M. Daly, 2016-12-05 The emblem was big business in early modern Europe used extensively not only in printed books and broadsheets but also to decorate pottery metalware furniture glass and windows and numerous other domestic devotional and political objects At its most basic level simply a combination of symbolic visual image and texts an emblem is a hybrid composed of words and picture However as this book demonstrates understanding the precise and often multiple meaning intention and message emblems conveyed can prove a remarkably slippery process In this book Peter Daly draws upon many years research to reflect upon the recent upsurge in scholarly interest in and rediscovery of emblems

following years of relative neglect Beginning by considering some of the seldom asked but important questions that the study of emblems raises including the importance of the emblem the truth value of emblems and the transmission of knowledge through emblems the book then moves on to investigate more closely focussed aspects such as the role of mnemonics mottoes and visual rhetoric The volume concludes with a review of some perhaps inadequately considered issues such as the role of Jesuits who had a role in the publication of about a guarter of all known emblem books and guestions such as how these hybrid constructs were actually read and interpreted Drawing upon a database containing records of 6 514 books of emblems and imprese this study suggests new ways for scholars to approach important questions that have not yet been satisfactorily broached in the standard works on emblems The Alchemy of Light Urszula Szulakowska, 2021-10-01 This study concerns the late Renaissance metaphysics of light in its adoption to a Paracelsian alchemical context by John Dee Heinrich Khunrath Michael Maier and Robert Fludd Their alchemical theosophy is contextualised within Protestant reformism of the 1590s to 1620s specifically that of Valentin Weigel and Johannes Arndt This results in a re assessment of the Rosicrucian movement which challenges the existing historiography and problematises the character of the movement The volume includes fifty illustrations from alchemical treatises of the period the emphasis being placed on Khunrath s Amphiteatrum Sapientiae Aeternae 1595 1609 In an innovative manner the study investigates these images using analytical tools drawn from semiotics structuralism and post structuralism. This method yields an unusual interpretation of the geometry optical diagrams and spatial structures employed in such alchemical engravings Rhetorica Movet Heinrich Franz Plett, Peter Lothar Oesterreich, Thomas O. Sloane, 1999 This collection of articles in English and German covers a wide range of interdisciplinary topics of historical and modern manifestations of rhetoric in literature linguistics philosophy law theology education politics and intellectual history Spectacle & image in Renaissance Europe / Spectacle & image dans l'Europe de la Renaissance Andre Lascombes, 2023-08-14 This collection of nineteen essays focuses on the ways in which in England France and Spain the Renaissance made propagandistic or aesthetic use of the image in various spectacles Under surface differences between genres what emerges is a surprising similarity in tactics and response which invites further questioning about image elaboration and its reception **Applied Emblems in the Cathedral of Lugo** Carme López Calderón, 2021-02-08 In Applied Emblems in the Cathedral of Lugo Carme L pez Calder n explores the emblematic programme found in the Chapel of Nuestra Se ora de los Ojos Grandes Galicia Spain consisting of fifty eight emblems painted c 1735 Making use of a wide range of printed sources the author delves into the meaning of each emblem and provides an all encompassing interpretation of this cycle which can rightly be described as the richest and most complete programme of Marian applied emblematics in the Iberian Peninsula The Seventeenth-century French Emblem Alison Saunders, 2000
