The Business of the FIFA World Cup

Simon Chadwick, Paul Widdop, Christos Anagnostopoulos, Daniel Parnell, 2022-04-07 The FIFA World Cup is arguably the biggest sporting event on earth. This book is the first to focus on the business and management of the World Cup, taking the reader from the initial stages of bidding and hosting decisions through planning and organisation to the eventual legacies of the competition. The book introduces the global context in which the World Cup takes place, surveying the history and evolution of the tournament and the geopolitical background against which bidding and hosting decisions take place. It examines all the key issues and debates which surround the tournament, from governance and corruption to security and the media, and looks closely at the technical processes that create the event, from planning and finance to marketing and fan engagement. Analysis of the Women's World Cup is also embedded in every chapter, and the book also considers the significance of World Cup tournaments at age group level. No sport business or management course is complete without some discussion of the FIFA World Cup, so this book is essential reading for any student, researcher or sport business professional looking to fully understand global sport business today.

Performing National Identity, 2008-01-01 National identity is not some naturally given or metaphysically sanctioned racial or territorial essence that only needs to be conceptualised or spelt out in discursive texts; it emerges from, takes shape in, and is constantly defined and redefined in individual and collective performances. It is in performances ranging from the scenarios of everyday interactions to cultural performances such as pageants, festivals, political manifestations or sports, to the artistic performances of music, dance, theatre, literature, the visual and culinary arts, and more recent media that cultural identity and a sense of nationhood are fashioned. National identity is not an essence one is born with but something acquired in and through performances. Particularly important here are intercultural performances and transactions, and that not only in a colonial and postcolonial dimension where such performative aspects have already been considered but also in inner European transactions. Englishness or Britishness and Italianity, the subject of this anthology, are staged both within each culture and more importantly in joint performances of difference across cultural borders. *Performing difference* highlights differences that make a difference; it draws a line between self and other, boundary lines that are however constantly being redrawn and renegotiated and remain instable and shifting.

Football Politics in Central Europe and Eastern Europe

Roland Benedikter, Dariusz Wojtaszyn, 2020-07-07 Football in Central, Eastern and Eastern Europe has long functioned as a carrier of the three non-normal socio-political drivers that were effective below the surface of modernity, including the official self-image of European political systems since the second half of the 20th century: Tribal Politics, Imaginal Politics, and Contextual Politics. All three are trends that are currently surfacing prominently on an international and global level. Long before the return of the now proverbial Political Tribes by the means of populisms and neo-authoritarianisms in societies around the world, football in Central, Eastern and Eastern Europe worked as a subconscious vehicle of group instincts and political moods that represented mirrored, informed

and influenced political behavior and governmental decisions both in the post WWII communist and then after 1989 the neo capitalist societies located east of the former iron curtain Football has always been used by both governments and their opponents including the dissident civil society to further coherence and to symbolically represent specific readings of power relations system ideologies and history Football in Central and Eastern Europe was always able to attract and include large parts of the population inducing them to symbolically express protest against the government or to sustain the politics from above Through football politics aspects of the area s specific political mechanisms are introduced and explained

English National Identity and Football Fan Culture Tom Gibbons,2016-05-13 In recent years scholars have understood the increasing use of the St George s Cross by football fans to be evidence of a rise in a specifically English identity This has emerged as part of a wider national response to broader political processes such as devolution and European integration which have fragmented identities within the UK Using the controversial figurational sociological approach advocated by the twentieth century theorist Norbert Elias this book challenges such a view drawing on ethnographic research amongst fans to explore the precise nature of the relationship between contemporary English national identity and football fan culture Examining football fans expressions of Englishness in public houses and online spaces the author discusses the effects of globalization European integration and UK devolution on English society revealing that the use of the St George s Cross does not signal the emergence of a specifically English national consciousness but in fact masks a more complex multi layered process of national identity construction A detailed and grounded study of identity nationalism and globalization amongst football fans English National Identity and Football Fan Culture will appeal to scholars and students of politics sociology and anthropology with interests in ethnography the sociology of sport fan cultures globalization and contemporary national identities
