## European Markets After 199:

*The Single Market* Great Britain: Parliament: House of Lords: European Union Committee, 2008-02-08 This report is about the need for the Commission and Member States to take action in order to prevent the Single Market project from failing to achieve expectations Increased competition lower prices and a wider choice of products and services are the potential benefits to consumers access to an enormous home market is the potential benefit to business In reality the failure of Member States to implement important legislation has maintained barriers and prevented the fuller completion of the Single Market This failure is aggravated by the growing trend towards economic protectionism in a number of Member States Misguided attempts to protect domestic industries and safeguard national jobs are preventing consumers and businesses from reaping the full benefits of a truly open Single Market The EU needs to reassess the tools it uses The legislative route is not always the most effective means for achieving Single Market goals The increased use of other non legislative tools will help to overcome the difficulties of legislating for an expanded EU National Regulatory Authorities NRAs must be independent of government especially where governments have financial interests in the major market operator or national incumbent There is no need for a super regulator at EU level in any of the sectors considered in this inquiry energy telecommunications and financial services Achieving consistent implementation begins with effective policy making based on detailed sector specific understanding Currently very few SMEs are engaged in cross border activity and this is largely due to the regulatory barriers which remain in place and the lack of reliable information to assist businesses The Committee welcomes the objective of engaging small business in the Single Market

The European Economy Since 1914 Derek Aldcroft, Steven Morewood, 2012-12-07 The fifth edition of *The European Economy* provides a succinct and lucid account of the development and problems of the European economy since the first world war It covers the whole of Europe including Russia and Turkey The text divides into several clearly defined sub periods the impact and aftermath of the first world war and recovery and reconstruction during the 1920s the depression and the recovery of the 1930s the impact of the second world war and the new political division in Europe the post war boom of the 1950s and 1960s and then into the growth slowdown of the 1970s and the persistent problems of inflation and unemployment It then analyses the demise of the centrally planned economies of eastern Europe and the move to a more united Europe and then discusses the financial and economic problems that have emerged in the early twenty first century This new edition has been extensively revised new chapters have been added and the reading lists updated Though the volume is designed as a basic introductory text the authors elicit some of the lessons that can be learnt from a study of past development one of which is the limited power of governments to influence the course of events and to combat the operation of market forces

The European Economy Since 1914 Derek Howard Aldcroft, Steven Morewood, 2013 *The European Economy Since 1914* provides an invaluable guide to the major economic changes in both Western and Eastern Europe during the twentieth century

**The Impact of Union Citizenship on the EU's Market Freedoms** Alina Tryfonidou, 2016-02-25 The book's aim is to consider the impact that the introduction and development of the status of Union citizenship has had on the interpretation of the EU's market freedoms. Starting by providing in its introductory part part one a comprehensive and up to date analysis of the status of Union citizenship and its development from 1998 onwards the book proceeds in part two to provide an in depth examination of the relationship between this status and the Union's market freedoms. The central argument of the book is that as a result of the move towards the creation of a meaningful status of Union citizenship the market freedoms have been reconceptualised as fundamental Union citizenship rights and their interpretation has adapted accordingly. Part three of the book analyses the result of this process of transforming the market freedoms into sources of fundamental Union citizenship rights and considers where it is likely to lead in the future. It demonstrates that despite the fact that this development appears to be the next natural step in the process of constructing a meaningful notion of Union citizenship it brings with it a number of issues that the EU will have to consider and carefully address. In particular the method which the Court seems up until now to have employed to facilitate the metamorphosis of the market freedoms into citizenship rights has led to criticisms on the grounds of legitimacy and coherence and will undoubtedly lead to further problems in the future. Hence part three of the book also identifies the difficulties that may emerge as a result of this process and suggests ways in which they may be overcome.

The Search for a European Identity Furio Cerutti, Sonia Lucarelli, 2008-06-30 This book examines the link between political identity and legitimacy in the European Union. Stimulated by the crisis of legitimacy and identity suffered by the EU after the referenda on the Constitutional Treaty the editors have developed a theoretical framework to examine the interplay between these two items in the problematic development of the EU into a fully fledged political actor. The contributors to the volume seek to Redefine the key notions in the rigorous way of political philosophy thus avoiding the generic or imprecise language usage found in a large part of political science literature on identity. Test these concepts in the analysis of EU policies that may reveal the world views and the principles upon which EU legislation is based and whose degree of acceptance on the side of the citizens is an indicator of how far a shared political identity has developed. Featuring case studies on foreign and environmental policy biosafety policy biotechnology regulation civil society human rights promotion as well as studies on the role of memory space and external views on the process of European identity building this book will be of interest to students and researchers of political science political philosophy European politics and European Studies.
