European Firearms:

Weapons Law in Western Europe, 1550-2020 Gunner Lind, 2024-12-09 This book is a transnational history of European weapons law that utilizes the law and primary sources to trace the development from early portable firearms to modern day weapons Challenging many conventional assumptions this book establishes that weapons control in the current sense is a new phenomenon Control with possession only became dominant between 1918 and 1939 thereby establishing a high degree of uniformity for the first time Weapons law is old in Western Europe but only as a palette of possible solutions Possession control triumphed as a tool against Communist and Fascist attacks on democracy and remained as an instrument against crime and accidents It is argued that previously the laws on possession furthered rather than hindered ownership For centuries governments sought security by encouraging trusted men to arm themselves rather than disarming the suspect Legislators used a range of carrying restrictions sometimes many but mostly few as a tool against armed crime The author examines attitudes and policies towards power law violence social hierarchy national defence and civic freedom This volume offers historians and social scientists a new perspective on the long term development of Western European states and societies and it will be of value to undergraduate and postgraduate students of history sociology and politics

committee recognises that thousands of people use firearms responsibly for recreation and in their work It has no intention of restricting such activity However the committee today concludes that interpreting and applying the current 34 pieces of legislation governing the control of firearms places an onerous burden on the police and on members of the public who wish to abide by the law because it is so complex and confused In particular the committee recommends introducing one licensing system to cover all firearms which require a licence and identifies age restrictions on firearms use as a particular area of uncertainty Although the majority of firearms related crimes are not committed with licensed firearms the committee is also concerned about the use of legally owned weapons in domestic shootings including those related to domestic abuse The Committee has several recommendations including a review of the minimum age limits on the use of firearms and eligibility for firearms certificates recommends tighter restrictions and clearer guidance to the police on the granting of firearms and shotgun licences to individuals who have engaged in criminal activity considering requiring the police to consult the domestic partners of licence applicants in making the decision as to whether to grant a licence suggests that the Government considers requiring advocates raising the fees charged to applicants so that it covers the costs of licensing to ensure that police spending cuts do not jeopardise the rigour of the licensing process Finally the committee was concerned at evidence of the significant criminal threat posed by reactivated and converted firearms in response to tighter regulations on genuine lethal weapons
