European Nonproliferation Policy 1993-1995:

European Non-proliferation Policy, 1993-1995 Harald Müller, 1996 This year PRIF's European non proliferation program has its 10th anniversary Following Nuclear Export Controls in Europe European Interuniversity Press 1995 this volume is the sixth book published by the program It differs from its predecessors in that non proliferation policy due to the Non Proliferation Treaty Extension Conference held a central place in the Common Foreign and Security Policy CFSP of the European Union and the associated countries of Central Eastern Europe it became subject of a Joint Action the most significant CFSP instrument under the Maastricht Treaty This reflected the high rank that preventing the spread of weapons of mass destruction has obtained in the post Cold War European security agenda The studies contained in this volume focus very much on this Joint Action They prove both how difficult it is to arrive at a common policy starting from vastly different positions and the power that a focused policy by 15 member states plus the associates can yield Since the fabric of CFSP is so much hidden from the public eye this book offers one rare insight into the working of this highly important part of European integration and it reveals that CFSP after all might be better than its often maligned reputation [The European Union's Nuclear Non-proliferation Policy](#) Manuel Herrera, 2025-04-15 This book looks at European Union EU attempts to manage the risks associated with nuclear non proliferation and assesses its performance and external challenges The introductory section delves into current academic scholarship elucidating the concepts of contestation and performance The second section provides an overview of the historical and institutional evolution and the third scrutinizes the performance The final section examines present policy with case studies on the EU's bilateral relations with Iran and India Adopting a focus on both the development and performance of the EU's non proliferation and disarmament policy as well as its contestation from non Western countries this book provides a solid and innovative contribution to existing debates on both the EU's non proliferation and foreign policy The book will appeal to scholars researchers and practitioners of International Relations European Union Studies and Nuclear Non Proliferation as it provides an analysis of the intricacy of the EU's non proliferation policy offering fresh perspectives and empirical evidence **The Handbook of European Defence Policies and Armed Forces** Hugo Meijer, Marco Wyss, 2018-06-22 The armed forces of Europe have undergone a dramatic transformation since the collapse of the Soviet Union The Handbook of European Defence Policies and Armed Forces provides the first comprehensive analysis of national security and defence policies strategies doctrines capabilities and military operations as well as the alliances and partnerships of European armed forces in response to the security challenges Europe has faced since the end of the cold war A truly cross European comparison of the evolution of national defence policies and armed forces remains a notable blind spot in the existing literature The Handbook of European Defence Policies and Armed Forces aims to fill this gap with fifty one contributions on European defence and international security from around the world The six parts focus on country based assessments of the evolution of the national defence policies of Europe's major medium and

lesser powers since the end of the cold war the alliances and security partnerships developed by European states to cooperate in the provision of national security the security challenges faced by European states and their armed forces ranging from interstate through intra state and transnational the national security strategies and doctrines developed in response to these challenges the military capabilities and the underlying defence and technological industrial base brought to bear to support national strategies and doctrines and finally the national or multilateral military operations by European armed forces The contributions to The Handbook collectively demonstrate the fruitfulness of giving analytical precedence back to the comparative study of national defence policies and armed forces across Europe

Foreign and Security Policy in the European Union Kjell A Eliassen,1998-10-16 This book provides a comprehensive overview of why European integration in foreign and security policy has proved so difficult The obstacles to developing the common policy in this second pillar of the European Union go to the heart of debates around the sovereignty of the nation state A leading group of international contributors explain how these problems arise and consider the future prospects of developing a more regional based solution Broadly organized around the three areas of policy actors and issues the first section traces the reluctant growth of EU integration in foreign and security policy as it developed from the mid 1980s In the second section the national policies and interests that typically obstruct a

Routledge Handbook on the European Union and International Institutions Knud Erik Jørgensen,Katie Verlin Laatikainen,2013 This Handbook addresses the increasingly contested issue of profound political importance Europe s presence in multilateral institutions It assesses both the evolving role of Europe in international institutions and the transformations in international institutions themselves

The Nordic Countries and the European Security and Defence Policy Alyson J. K. Bailes,Gunilla Herolf,Bengt Sundelius,2006 In 1999 the EU decided to develop its own military capacities for crisis management This book brings together a group of experts to examine the consequences of this decision on Nordic policy establishments as well as to shed new light on the defence and security issues that matter for Europe as a whole

Germany's Uncertain Power H. Maull,2006-01-26 This comprehensive in depth assessment of the German foreign policy record under the Red Green government of Gerhard Schröder and Joschka Fischer from 1998 to 2005 produced by a team of German and international experts explores the idea of continuity and the sources depths and directions of German foreign policy

Europe and Nuclear Disarmament Harald Müller,1998 During the Cold War Europe at both sides of the Iron Curtain was the area with the highest concentration of nuclear weapons in the world These weapons were integrated into the security policies and military strategies of either side and would have probably used early in a military confrontation The revolution of 1989 1991 has changed the parameters of European security completely The huge conventional forces of the Warsaw Treaty Organization have disappeared the Soviet Union dissolved as did the WTO The rationale for keeping thousands of tactical nuclear weapons in Western Europe did thus no longer exist and NATO reduced the number of these deployed weapons drastically Yet nuclear weapons play still a role in

Western as well as in Russian military strategy and they have a major impact on the way NATO enlargement is viewed in Moscow in the ways Russia reacts to this process even though NATO has declared not to station nuclear arms in any of the new member states This is the framework within which the authors of this book inquire the thinking in European countries about nuclear weapons security arms control and disarmament Their findings point to a considerable inertia of thinking While in the United States a major debate is under way to question the utility of nuclear weapons altogether and to explore possible paths towards complete nuclear disarmament such a debate is not discernible in Europe Political elites are rather cautious while they support the disarmament process in principle and have clear ideas what the next steps might be they are the more cautious the more far reaching measures are proposed and display considerable skepticism towards the ultimate goal of a world free of nuclear arms

Rogue States as Norm Entrepreneurs Carmen Wunderlich, 2019-10-11 This book investigates whether so called rogue states assumed antagonists of a Western liberal world order could also act as norm entrepreneurs by championing the genesis and evolution of global norms The author explores this issue by analyzing the arms control policies of the Islamic Republic of Iran A comparison with the prototypical norm entrepreneur Sweden and the Democratic People's Republic of North Korea a notorious norm breaker reveals interesting insights for norm research Apparently norm entrepreneurship manifests itself in different degrees and phases of the norm life cycle The finding that Iran indeed acts as a norm entrepreneur in some cases also sheds light on those factors that might account for the success or failure of norm advocacy Lastly the book offers a new perspective on rogue states by not only regarding them as irrational antagonists of the current world order but also as legitimate participants in a discourse on what the ruling order should look like This book will appeal to scholars interested in critical norm research in international relations This book offers cutting edge norm research highlighting how norm breakers can function as norm makers Maria Rost Rublee Associate Professor of International Relations Monash University Australia So called rogue states are typically understood as norm breakers but Carmen Wunderlich makes a persuasive conceptual case backed by empirical research that we need to consider the extent to which they are in fact norm entrepreneurs in their own right In an era characterized by much concern over the status of liberal norms this is a very timely study Richard Price Department of Political Science The University of British Columbia Canada At a time when the world order is under pressure this cutting edge analysis of how dissatisfied states challenge existing global norms illuminates a topic crucial to understanding contemporary international relations Nina Tannenwald Director Watson Institute for International and Public Affairs Brown University Rhode Island USA *The European Union Review*, 2001

Security and Environment in the Mediterranean Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They

also analyse NATO's Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South. The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II, the Gulf War, the Balkan wars and the Middle East conflict. It also examines factors of global environmental change: population growth, climate change, desertification, water scarcity, food and urbanisation issues as well as natural disasters. Furthermore, it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century.

Security in Translation H. Stritzel, 2014-08-12. *Security in Translation* proposes an innovative way to capture the evolution, spread and local transformation of threat images in world affairs. Reworking traditional securitization theory, this book develops a coherent new framework for analysis that makes securitization theory applicable to empirical studies.

European Access, 1998. **From Europe Agreements to Accession** Paul van den Bempt, Greet Theelen, Trans-European Policy Studies Association, 1996. The European Union has been engaged after the fall of the Berlin Wall in determined efforts to end the artificial separation of West and East and to foster economic, social and political integration of the whole of Europe. On their side, the countries of Eastern and Central Europe have undertaken fundamental reforms to introduce the law of democracy and to evolve towards a free market economy. Having established close contacts with academic and political circles in the Associated Countries, TEPSA was eager to study the implications for both sides and organized five conferences for this purpose. This book presents the essence of the main findings in the form of an overall analysis. It starts with a technical description of the Europe Agreements and the Concurrent Interim Agreement on Trade-Related Matters, followed by the main decisions taken at the Copenhagen and Essen summits. Subsequently, the criteria and conditions presently envisaged for membership of the CEECs are analysed. Whether, when and to what extent these countries can meet these criteria and what kind of steps the European Union has to take to ensure enlargement is the subject of the following chapters, concentrating on the problems which will have to be solved before and even after this decisive step will have been taken.

Nuclear Proliferation A. M. Babkina, 2002. Since the nuclear genie was let out of the bottle, nuclear weapons have been the exclusive domain of a select few countries. At the dawn of the next millennium, however, the notion that small countries and even a few individuals may acquire and use them or threaten to do so is a major concern. This annotated bibliography presents citations of the current book and journal literature which deal with this dangerous issue. Access is provided through subject, author and titles indexes.

The European Union at the Crossroads Yuri Devuyst, 2003. This study provides an account of the EU's institutional evolution. It identifies the enduring features and tensions in the EU's polity, notably against the backdrop of the Community method of the 1950s. The author analyses the milestones in the European integration process, such as the Single European Act and the Treaties of Maastricht, Amsterdam and Nice, and examines their impact on the crucial stages in the EU's decision-making process. Special attention goes to the institutional debates on the EU
