**The European Union** Jaap W. de Zwaan, Frans A. Nelissen, Jan H. Jans, Steven Blockmans, 2004 The European Union concentrates on the three main areas of European integration that mark the career path of Alfred E Kellermann Part I covers institutional and constitutional aspects Part II general principles and substantive aspects and Part III new Member States and Eastern Europe The contributions included in this Liber Amicorum vary from thematic in depth studies to studies of a comparative nature Their themes include inter alia the structure of the Union according to the Constitution for Europe the changes and challenges with which the Union's institutions are faced the future paths of flexibility enhanced cooperation partial agreements and pioneer groups the role of national competition authorities and national courts under Regulation 1/2003 the constitutional preparation for EU accession in the new Member States and the influence of European integration on the development of law in Russia Specific to this book Contains 27 original contributions authored by prominent EU lawyers from

academia and practice All contributions written in honour of Alfred E Kellermann and his work in European Law Examines amongst other things the new Member States at a time of integration and development in Europe EU Foreign and Interior Policies Stephen Stetter, 2007-01-24 This book offers an innovative theoretical and empirical analysis of integration in EU foreign and interior policies across the three pillars from the Maastricht Treaty to the Treaty of Nice The establishment of the three pillar structure with the Maastricht Treaty has been one of the key transformations of European governance This divided EU policies into three main areas European Community Common Foreign and Security Policy CFSP and Justice and Home Affairs JHA and for the first time the two sovereignty related areas of foreign and interior policies became part of the formal governance structure of the EU This is the first volume to present a comparative perspective on how integration in both areas across the three pillars has contributed to the construction of a distinct sovereignty dimension of the EU Drawing from sociological institutionalism and on the basis of the two case studies of EU Middle East and migration policies it offers a comprehensive empirical analysis of cross pillar policy making dynamics in foreign and interior policies in the EU EU Foreign and Interior Policies will appeal to scholars and researchers interested in international relations European Union politics and Middle East studies *Direct Effect in EU Law* Daniele Gallo, 2024-12-23 Direct Effect in EU Law is the first book in English to thoroughly examine this revolutionary legal principle tracing direct effect s evolution throughout the multiform process of European integration A founding doctrine of EU constitutional law and the driving force of the EU legal system direct effect enables individuals and companies to invoke their rights before domestic authorities and the Court of Justice of the EU CJEU Yet while the doctrine of direct effect remains the backbone of the EU legal system it lacks clear legal framing by the CJEU Emphasizing the need for the CJEU to fully articulate and systematize direct effect as to its core components and consequences the book advocates for an innovative understanding of such principle that acknowledges its transformative impact on EU law It bridges theory and practice drawing upon the CJEU rulings dating from the 1950s up to 2024 The book reconstructs direct effect beyond the doctrine originating from Van Gend Loos and ultimately puts forward solutions for its principled comprehension and enforcement *The European Union's External Action in Times of Crisis* Piet Eeckhout, Manuel Lopez-Escudero, 2016-12-01 The Lisbon Treaty modified the legal framework of EU external action and these innovations must be applied in a period of deep economic and financial crisis interacting with other more specific crises affecting the EU s external activities This volume investigates the recent institutional and substantive developments in EU external relations law and practice in this context of multiple crises for the EU The economic and financial crisis has a major impact on EU external action but other crises too affect this sensitive area of the EU s activity and the book takes them into account For instance there is a crisis in the relationship between EU law and international law after the ECJ judgement in the Kadi case In addition to exploring these questions the volume also examines questions of legitimacy in fields such as foreign investment protection and arbitration Representing the output of a powerful research team composed of leading

scholars in the field this comprehensive collection will appeal to both an expert and non expert readership

***The Real World of EU Accountability*** Mark Bovens, Deirdre Curtin, Paul 't Hart, 2010-06-24 *The Real World of EU Accountability* reports the findings of a major empirical study into patterns and practices of accountability in European governance The product of a 4 year path breaking project this book assesses to what extent and how the people that populate the key arenas where European public policy is made or implemented are held accountable Using a systematic analytical framework it examines not just the formal accountability arrangements but also documents and compares how these operate in practice In doing so it provides a unique empirically grounded contribution to the pivotal but often remarkably fact free debate about democracy and accountability in European governance With four empirical chapters covering the Commission and its agencies the European Council and Comitology committees it shows that a web of formal accountability arrangements has been woven around most of them but that the extent to which the relevant accountability forums actually use the oversight possibilities offered to them varies markedly some forums lack the institutional resources others the willingness But in those cases where both are on the increase as in the European Parliament's efforts vis a vis the European Commission fundamentally healthy accountability relationships are developing Although ex post accountability is only part of the larger equation determining the democratic quality of European governance this study suggests that at least in this area the EU is slowly but surely reducing its democratic deficit

***Sovereignty in Post-Sovereign Society*** Jiří Přibáň, 2016-03-09 *Sovereignty* marks the boundary between politics and law Highlighting the legal context of politics and the political context of law it thus contributes to the internal dynamics of both political and legal systems This book comprehends the persistence of sovereignty as a political and juridical concept in the post sovereign social condition The tension and paradoxical relationship between the semantics and structures of sovereignty and post sovereignty are addressed by using the conceptual framework of the autopoietic social systems theory Using a number of contemporary European examples developments and paradoxes the author examines topics of immense interest and importance relating to the concept of sovereignty in a globalising world The study argues that the modern question of sovereignty permanently oscillating between de iure authority and de facto power cannot be discarded by theories of supranational and transnational globalized law and politics Criticising quasi theological conceptualizations of political sovereignty and its juridical form the study reformulates the concept of sovereignty and its persistence as part of the self referential communication of the systems of positive law and politics The book will be of considerable interest to academics and researchers in political legal and social theory and philosophy

***EU International Relations Law*** Panos Koutrakos, 2006-04-14 In the post 9 11 world the European Union has been trying to define its international presence in a way which corresponds to its economic power and enlarged membership In an effort to assert its identity on the international scene it has developed a very wide range of economic relations with third countries and international organisations It has also developed a Common Foreign and Security Policy in the context of which it is

gradually shaping its Security and Defence Policy These policies are carried out on the basis of distinct albeit interrelated sets of legal rules This book provides a comprehensive and systematic analysis of these economic political and security aspects of the relations of the European Union with the rest of the world It examines their genesis development and interactions and places them in the specific context of the establishment of the internal market and the broader context of the increasingly interdependent international economic and geopolitical environment Issues covered include the coexistence of Community and national competence in external relations the approach of the Court of Justice to international law the negotiation conclusion and implementation of international agreements the relationship between EC and WTO law and the development of the political and security policies of the Union The book will be of interest to academics practitioners and students of EU law

*The International Social Survey Programme 1984-2009* Max Haller, Roger Jowell, Tom W Smith, 2009-09-11 The social sciences rely more on the comparative method than on experimental data mainly because the latter is difficult to acquire amongst human populations The International Social Survey Programme has played a pioneering role in creating and sustaining methodologically sophisticated mass attitude surveys across the globe Starting in 1984 with five nations it now encompasses forty five nations spread over five continents each administering an identical annual survey to a random sample of their population Analyses of the data or descriptions of the methodology already appear in over 3 000 publications This book contains new contributions from three dozen eminent scholars who analyse and compare the perceptions and attitudes of citizens across all five continents nations and over time Subjects range from inequality and the role of the state ethnic national and global identities the changing relevance of religion beliefs and practices gender roles family values and work orientations household and society Some chapters focus on methodological issues others focus on substantive findings This book sets new standards for cross cultural research

**The European Union, Mercosul and the New World Order** Helio Jaguaribe, Alvaro Vasconcelos, 2004-08-02 A critical insight into the politics and economics of relations between the EU and Latin America particularly Mercosul highlighting the significance of such relations for multilateralism and the international order

**(Un)Doing Europe** Michał Krzyżanowski, Florian Oberhuber, 2007 After successive waves of enlargement the European Union has been struggling with political integration The project of the constitutionalisation of the EU was therefore launched to cater to a growing need of institutional reform but it also intensified debates about the underlying conceptions norms and values of the European polity as well as the meanings and identities of entire Europe This book approaches the ongoing legal and political re construction of the EU through a focus on the Convention on the Future of Europe 2002 2003 which produced a draft of the EU s first constitution The Convention is studied from a multidisciplinary perspective integrating approaches from ethnography of institutions political sociology and linguistically based discourse analysis Drawing on extensive fieldwork and multiple textual data the book offers an inside perspective on the multitude of ways in which politics in supranational environments works in practice The book also contributes to the ongoing research on the discursive re negotiations of meanings of Europe and European integration in the institutions of the European Union

**The Uniting of Europe** Stanley Henig, 2013-10-18 The Uniting of Europe provides an accessible introduction to the history of European integration and places European unification within a wider political and economic context The book shows how institutional developments have been conditioned by wider international considerations The Uniting of Europe considers the impact of the Cold War and the superpowers on Europe Britain s decision to join the Community the consequences of German reunification the problem of nationalism in Eastern Europe key personalities parties regimes and political systems This Second edition brings the history of the European Union up to date to include the Amsterdam and Nice treaties as well as other contemporary issues such as the impact of events in Yugoslavia the changing relationship with the US and British membership of the single currency

**Rethinking Governance in Europe and Northeast Asia** Uwe Wissenbach, 2019-10-23 This book explores how nationalism and multilateralism transform international society and global governance It does so by comparing the governance model of the EU a constitutionalised and increasingly polycentric form of multilateralism with Northeast Asia There nationalist administrations have resisted multilateral commitments and are locked into rivalries instead of pursuing a regional project Both Europe and Northeast Asia can be seen as success stories of the late 20th early 21st centuries but by having followed different approaches to international governance The book traces these two trajectories through critical junctures in history to how both regions have dealt with the contemporary challenges of the financial crisis and climate change During the financial crisis Europe s multilateral economic and monetary architecture revealed profound weaknesses whilst national policies allowed much of Northeast Asia to escape the worst of it On climate change the European Union EU has developed effort sharing governance models to reduce emissions while Northeast Asian countries are relying on greening national industrial policy The book argues that global governance has to find the balance between multilateralism and nationalism in order to find collaborative approaches to global challenges This book provides a fresh take on the EU and on Northeast Asia and develops innovative concepts of international society and polycentric governance Thus

it will be of considerable interest to researchers and students of global governance international relations EU and Asia Studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY ND 4.0 license

*Contemporary Europe* William Outhwaite, 2016-10-04 Europe is one of the most dynamic and interesting areas of the world pioneering in the European Union a new form of governance for half a billion people represented in the world's first directly elected transnational parliament This book situates the European Union in a broader European global historical and geographical context providing a readable presentation of the most important facts and drawing on the theoretical approaches which have transformed the study of contemporary Europe over the past two decades The European Union is still on the road to what has been called an unknown destination and this book presents its economic political legal and social trajectory from the middle of the last century to the present Contemporary Europe covers some of these issues in an interdisciplinary framework aiming to situate the development of the European Union in a broader context of pan European and global processes Europe has been cut down to size but it does not have to become a global backwater and the study of contemporary Europe's institutional reality does not have to be boring The book counters this misperception conveying the essential facts and theories of contemporary European reality in a clear and approachable analysis It will serve as a readable introduction both to the academic field of European studies and to contemporary Europe itself

**The Political Influence of Business in the European Union**

Andreas Dur, David Marshall, Patrick Bernhagen, 2019-02-28 Many citizens politicians and political activists voice concern about the political influence of business in the European Union But do business interests really pull the strings in Brussels Contrary to expectations this book shows that business interests are no more influential than other interests in shaping contemporary EU policies Andreas Dur David Marshall and Patrick Bernhagen present an original argument that stresses the role of public actors in facilitating or impeding interest groups lobbying success Novel data on a large number of legislative proposals on the EU's agenda and three case studies present strong support for this argument The Political Influence of Business in the European Union offers new insights into how lobbying success depends on the demand and supply of information as well as new ideas on how to measure lobbying success The book advances a fresh perspective on the question of business power and shows why business interests often lose in the policy struggle

*Citizenship in Contemporary Europe* Michael Lister, 2008-05-12 This book seeks to analyse the impact of globalisation European integration mass migration changing patterns of political participation and welfare state provision upon citizenship in Europe Uniting theory with empirical examples the central theme of the book is that how we view such changes is dependent upon how we view citizenship theoretically The authors analyse the three main theoretical approaches to citizenship 1 classical positions liberal communitarian and republican primarily concerned with questions of rights and responsibilities 2 multiculturalist and feminist theories concerned with the question of difference and 3 postnational or

cosmopolitan theories which emphasise how citizen rights and behaviours are increasingly located beyond the nation state  
Using these theoretical perspectives the second section of the book assesses four key social economic and political  
developments which pose challenges for citizenship in Europe migration political participation the w **Constitutional**
