reality and the patient's voice combining them with different research approaches. It presents the best available knowledge and research methodologies about patients' wishes at the end of life together with a series of ethical views and a discussion about the clinical implications for palliative care. The book presents material in an open and unbiased manner whilst remaining sensitive to the spiritual and existential dimensions of dying and to the different cultural views that provide meaning to the individual. Written by the best specialists and ethics scholars from around the world including palliative care practitioners and end of life scholars from countries where assisted dying practices are legalized and from those where it isn't. **The Patient's Wish to Die: Research, Ethics and Palliative Care** will prove essential reading for all those working or studying in the field of palliative care.
