Euthanasia Daniel Jussim,1993 Discusses passive and active euthanasia and some ethical and moral issues surrounding the topic *Euthanasia and the "right to Die"* Renée C. Rebman,2002 An objective examination of both sides of the issue of euthanasia **Euthanasia and the Right to Die** Jennifer M. Scherer,Rita James Simon,1999 Sensitive and high profile public policy issues often benefit from being considered in comparative perspective Here euthanasia and the right to die are examined in the context of the social legal and religious settings of a wide range of countries The authors employ public opinion data where available to illustrate the great disparity between approval of physician assisted suicide and the general illegality of the practice Ultimately making and implementing laws to ensure a responsible right to die_as the U S has been struggling with in Oregon Michigan and elsewhere_will be informed by experiences in such places as the Netherlands Australia and the only country in the world where euthanasia is a clear cut medical option Colombia *Terminal Choices* Robert N. Wennberg,1989 A discussion of the moral religious legal and personal issues surrounding euthanasia suicide and the right to die *The Right to Die* Melvin I. Urofsky,Philip E. Urofsky,2020-11-25 First Published in 1996 The key issue in all right to die matters is who decides Who will decide whether life support should be terminated Who will decide if a person is competent to make life and death decisions The law is quite clear that in cases of conscious competent adults the individual is free to make all decisions relating to his or her care and future This volume is a collection of writings and case studies around the topics of personal choice AIDS and informed consent due process and the right to die *The Right to Die* John E. Ferguson,2007 A series of controversial essays that debate issues related to a person s right to die including such cases as Karen Ann Quinlan in 1976 Terri Schiavo in 2005 and the trial of Dr Jack Kevorkian The Right to Die Howard Ball,2017-01-26 This book provides a comprehensive and contemporary examination of the right to die issues facing society now that vast improvements in public health care and medicine have resulted in people not only living longer but taking much longer to die often in great pain and suffering In 1900 the average age at which people died in America was 47 years of age the primary causes of death were tuberculosis and other respiratory illnesses In the 21st century as a result of better health care and working conditions as well as advances in medical technology we live much longer as of 2016 about 80 years A much larger proportion of Americans now die from chronic diseases that generally appear at an advanced age such as heart disease cancer or chronic obstructive pulmonary disease COPD Should this fundamental change in human lifespan alter how society and government view right to die legislation What are the pros and cons of giving a mentally competent person who is terminally ill and in great pain the right to end his or her life *The Right to Die A Reference Handbook* provides a complete examination of right to die issues in the United States that dissects the complex arguments for and against a person s liberty to receive a physician s assistance to hasten death It covers the legal aspects and the politics of the right to die controversy analyzes the battles over the right to die in state and federal courts and supplies primary source documents

Voluntary Euthanasia and the Common Law Margaret Otlowski,1997 Margaret Otlowski investigates the complex and controversial issue of active voluntary euthanasia She critically examines the criminal law prohibition of medically administered active voluntary euthanasia in common law jurisdictions and carefully looks at the situation as handled in practice The evidence of patient demands for active euthanasia and the willingness of some doctors to respond to patients requests is explored and an argument for reform of the law is made with reference to the position in the Netherlands where active voluntary euthanasia is now openly practiced
