Evaluating Stakeholder Participation In The Transition To Sustainable Development Methodology Case Studies Policy Implications:

Evaluating Stakeholder Participation in the Transition to Sustainable Development Angela Oels, 2003

Stakeholder participation in economic development is generally considered to be a good thing. However, questions remain: Does stakeholder participation live up to the high expectations about it in the literature? How can success be measured? What are suitable criteria and indicators? How do the involved stakeholders themselves judge the outcomes of their involvement? What can be done to improve the performance of stakeholder participation? Which structural factors impede stakeholder participation? This study addresses questions such as these with respect to methodology, case studies, and policy implications. Angela Oels is assistant professor at the Institute of Political Science, University of Hamburg, Germany.

Stakeholder Dialogues in Natural Resources Management Susanne Stoll-Kleemann, Martin Welp, 2007-01-10

Participatory Processes for Natural Resource Management. Ortwin Renn, University of Stuttgart, Stuttgart, Germany.

Need for analytic deliberative processes: Inviting the public to be part of the decision-making process in natural resource management has been a major objective in European and American environmental policy arenas. The US National Academy of Sciences has encouraged environmental protection agencies to foster citizen participation and public involvement for making environmental policy making and natural resource management more effective and democratic. Stern and Fineberg (1996) The report emphasizes the need for a combination of assessment and dialogue which the authors have framed the analytic deliberative approach. Unfortunately, early public involvement of the public in deliberative processes may compromise, however, the objective of efficient and effective policy implementation or violate the principle of fairness. Cross (1998), Okrent (1998). Another problem is that the public consists of many groups with different value structures and preferences. Without a systematic procedure to reach consensus on values and preferences, the public's position often appears as unclear. Coglianese (1997), Rossi (1997). Participatory processes are thus needed that combine technical expertise, rational decision making, and public values and preferences. How can and should natural resource managers collect public preferences, integrate public input into the management process, and assign the appropriate roles to technical experts, stakeholders, i.e.

Public Participation and Better Environmental Decisions Frans H. J. M. Coenen, 2008-12-12

Public Participation and Better Environmental Decisions is about a specific promise that participation holds for environmental decision making. Many of the arguments for public participation in international environmental policy documents are functional; that is to say, they see public participation as a means to an end. Sound solutions to environmental problems require participation beyond experts and political elites. Neglecting information from the public leads to legitimacy questions and potential conflicts. There is a discourse in the literature and in policy practice as to whether decision making improves in quality as additional relevant information by the public is considered. The promise that public participation holds has to be weighed against the limitations of public

participation in terms of costs and interest conflicts The question that Public Participation and Better Environmental Decisions seeks to answer for academics planners and civil servants in all environmental relevant policy fields is What restricts and what enables information to hold the promise that public participation lead to better environmental decision making and better outcomes *Governance for Sustainable Development* Jens Newig, Jan-Peter Voß, Jochen Monstadt, 2013-09-13 Sustainable development stirs up debate about the capacities of political steering and governance The complexity of the task expounds limits of steering in three dimensions goals knowledge and power Sustainability goals are subject to changing and controversial risk perceptions values and interests Moreover knowledge of the coupled dynamics of society technology and nature is limited Finally the power to shape structural change in society and technology is distributed across a multitude of actors and societal subsystems Steering attempts therefore have to cope with conflict and ambivalence with uncertainty and with a lack of central control and they have to face the necessity of coordinating different actor groups and social networks This volume explores steering strategies and governance arrangements for sustainable development with a view to these problem dimensions The contributions by authors from various disciplines approach these challenges from different conceptual angles ranging from positivist managerial up to post modern constructivist perspectives By combining theoretical reflections with insights from empirical research in European and American contexts the volume maps out conditions and identifies approaches which both reflect the limits of steering and reveal options for constructively taking up the task of sustainable development in science and practice **Handbook of Improving Performance in the Workplace, The Handbook of Selecting and Implementing Performance Interventions** Ryan Watkins, Doug Leigh, 2009-12-09 HANDBOOK of IMPROVING PERFORMANCE IN THE WORKPLACE Volume 2 Selecting and Implementing Performance Interventions In this groundbreaking volume leading practitioners and scholars from around the world provide an authoritative review of the most up to date information available on performance interventions all presented within a holistic framework that helps ensure the accomplishment of significant results Addressing more than 30 performance interventions with such varied topics as Incentive Systems e Learning Succession Planning and Executive Coaching this volume guides readers through the development of comprehensive performance improvement systems Each chapter illustrates in practical terms how to select plan implement and manage performance interventions as well as how to evaluate their results Through best practices research comparative analysis illustrative case studies from around the world and editorial guidance on how to link together diverse interventions the handbook is an important guide for achieving desired results in the workplace and beyond Sponsored by International Society for Performance Improvement ISPI the Handbook of Improving Performance in the Workplace three volume reference covers three main areas of interest including Instructional Design and Training Delivery Selecting and Implementing Performance Interventions and Measurement and Evaluation *Research Handbook on Climate Change Adaptation Policy* E.C.H. Democracy and Expertise Frank Fischer, 2009-03-12 This book examines the role of policy expertise in a democratic society From the perspectives of both political theory and policy studies the chapters explore the implications of deliberative democratic governance for professional expertise and extends them to specific policy practices Following the lead of John Dewey the discussion focuses in particular on the ways professional practices might be reoriented to assist citizens in understanding and discussing the complex policy issues of an advanced technological society In doing so it also explores how public deliberation can be improved through more cooperative forms of policy inquiry Adopting a deliberative analytic approach policy inquiry is grounded in a postempiricist constructivist understanding of inquiry and knowledge and the participatory practices that support it Toward this end the chapters draw on thriving theoretical and practical work dedicated to revitalizing the citizen's role in both civil society and newer practices of democratic governance in particular deliberative democracy in political theory practical work with deliberative experiments the theory and practices of democratic governance and participatory research Deliberative practices are promoted here as a new component part of policy related disciplines required for participatory governance Calling for a specialization of policy epistemics to advance such practices the second half of the book takes up issues related to deliberative empowerment including the relation of technical and social knowledge the interpretive dimensions of social meaning and multiple realities the role of narrative knowledge and storylines policy inquiry social learning tacit knowledge the design of discursive spaces and the place of emotional expression in public deliberation

The Political Economy of Climate Finance in Brazil Ursula Flossmann-Kraus, 2023-03-17 Navigating institutions and donor requirements to successfully access international climate finance is challenging for many countries Establishing national climate funds can be a way to meet these challenges ensuring the targeted use of funds and strengthening ownership This book examines the establishment of two national climate funds in Brazil the Low Carbon Agriculture Programme and the Amazon Fund Their establishment must be seen against the background of a drastic shift in Brazilian climate policy enabled by discursive changes during the administration of the Workers Party 2003-2016

Evaluation of FAO's contribution to Sustainable Development Goal 2 - "End hunger, achieve food security and improved nutrition and promote sustainable agriculture" Food and Agriculture Organization of the United Nations ,2020-11-03 FAO is well positioned at the global level to offer relevant support to countries in achieving their SDG 2 targets and is committed to support the SDGs a Global Agenda that it helped design The new FAO s Strategic Framework will provide an opportunity to promote and communicate FAO s role in a coherent and joined up manner aligned with the 2030 Agenda FAO has engaged with the current UN reform strongly connected to the SDGs with a very collaborative attitude At the country level which was the focus of the second phase of this evaluation FAO s position was found to be generally weaker due to its limited programmatic footprint Nevertheless a number of initiatives were acting at scale and producing results Entry points to act at scale include support to develop laws and policies to instigate agriculture trade and investment to induce climate finance or South South cooperation and to education both formal and informal The depth and breadth of partnerships are generally increasing but more partnerships with the private sector and mobilization of domestic resources would be needed to make a serious impact on food systems

Stakeholder Dialogues on Sustainable Development Strategies D. Barry Dalal-Clayton,Krystyna Swiderska,Stephen Bass,2002 This book provides a set of case studies summarising recent developing country experiences of developing and implementing national sustainable development strategies NSDSs These are based directly on the work of country teams that facilitated multi stakeholder dialogues on NSDSs Drawing also from this

work and from broader international experience the early chapters explore new thinking and provide key lessons about the development implementation and monitoring of NSDSs and explore how the continuous improvement approach now advocated for NSDSs can link their development and implementation with the needs and opportunities for research The book is a practical complement to the Resource Book on Sustainable Development Strategies isn 1668215 which provides guidance on how to develop assess and implement such strategies Indicators to monitor and evaluate the sustainability of bioeconomy Food and Agriculture Organization of the United Nations,2019-11-06 FAO has been working for many years on non food biomass products including sustainable bioenergy and biotechnology and it received a mandate to coordinate international work on food first sustainable bioeconomy by 62 Ministers present at the Global Forum for Food and Agriculture GFFA 2015 Moreover FAO has received support from the Government of Germany to develop guidelines on sustainable bioeconomy development Phase 1 2016 Phase 2 2017 mid 2020 This involves work on the bioeconomy monitoring including the selection and use of indicators The ultimate aim of FAO s work on sustainability indicators is to provide technical assistance to countries and stakeholders in developing and monitoring sustainable bioeconomy more particularly on identifying suitable indicators in line with the Sustainable Bioeconomy Aspirational Principles and related Criteria agreed upon in 2016 by the International Sustainable Bioeconomy Working Group created in the context of FAO s project on Sustainable Bioeconomy Guidelines These indicators shall help both policy makers and producers manufacturers in monitoring and evaluating the sustainability of their bioeconomy strategies and interventions In order to cover all the relevant aspects and issues for a sustainable bioeconomy our approach identifies impact categories from the sustainable bioeconomy principles and criteria The monitoring approach suggested is balanced since it considers the three sustainability dimensions social economic and environmental at the same time it proposes to use a limited set of core indicators to keep the monitoring feasible and cost effective The suggested methodology starts with a review of existing monitoring approaches to identify already available indicators from which the authors *Transport Transitions: Advancing Sustainable and Inclusive Mobility* Ciaran McNally,Páraic Carroll,Beatriz Martinez-Pastor,Bidisha Ghosh,Marina Efthymiou,Nikolaos Valantis-Kanellos,2025-07-18 This is an open access book It gathers the proceedings of the 10th edition of Transport Research Arena TRA 2024 held on 15 18 April 2024 in Dublin Ireland Contributions cover a wide range of research findings methodological aspects technologies and policy issues that are currently reshaping the transport and mobility system in different parts of Europe Bridging between academic research industrial developments and regulations this book offers a comprehensive review of the state of the art in transportation with a special emphasis on topics concerning digital transition in transport and inclusive and sustainable mobility alike This is the fourth volume of a 6 volume set **Governance of Innovation Systems: Volume 3 Case Studies in Cross-Sectoral Policy** OECD,2005-11-28 This OECD book provides lessons from case studies in policy governance for the information society and sustainable development It highlights

important lessons from these policy areas and illustrates mechanisms and practices for better co ordination and integration across policy areas

Impact Assessment and Sustainable Development Clive George, Colin H. Kirkpatrick, 2007 Translation of the principle of sustainable development into policy and practice and the evaluation of the outcomes of these strategic interventions are some of the most pressing challenges facing policymakers in Europe and beyond The chapters in this book contribute to the debate surrounding these challenges By exploring the conceptual and methodological issues relating to the evaluation of sustainable development and analysing European practice and experience this work provides a coherent and integrated contribution to our understanding of these issues With contributions from a distinguished international group of authors this book will be of interest to researchers policy analysts and practitioners in the area of impact assessment and sustainable development

Technology, Globalization, and Sustainable Development Nicholas A Ashford, Ralph P Hall, 2018-08-06 Technology Globalization and Sustainable Development offers a unified transdisciplinary approach for transforming the industrial state in order to promote sustainable development The authors present a deep analysis of the ways that industrial states both developed and developing are currently unsustainable and how economic and social welfare are related to the environment to public health and safety and to earning capacity and meaningful and rewarding employment The authors offer multipurpose solutions to the sustainability challenge that integrate industrial development employment technology environment national and international law trade finance and public and worker health and safety The authors present a compelling wake up call that warns of the collision course set between the current paths of continued growth and inevitable unsustainability in the world today Offering clear examples and real solutions this textbook illustrates how the driving forces that are currently promoting unsustainability can be refocused and redesigned to reverse course and improve the state of the world This book is essential reading for those teaching and studying sustainable development and the critical roles of the economy employment and the environment

Planning, Development and Management of Sustainable Cities Tan Yigitcanlar, Md. (Liton) Kamruzzaman, 2019-04-30 The concept of sustainable urban development has been pushed to the forefront of policymaking and politics as the world wakes up to the impacts of climate change and the destructive effects of the Anthropocene Climate change has emerged to be one of the biggest challenges faced by our planet today threatening both built and natural systems with long term consequences which may be irreversible While there is a vast body of literature on sustainability and sustainable urban development there is currently limited focus on how to cohesively bring together the vital issues of the planning development and management of sustainable cities Moreover it has been widely stated that current practices and lifestyles cannot continue if we are to leave a healthy living planet to not only the next generation but also to the generations beyond The current global school strikes for climate action known as Fridays for Future evidences this The book advocates the view that the focus needs to rest on ways in which our cities and industries can become green enough to avoid urban ecocide This book fills a gap in the literature by bringing together issues related to

the planning development and management of cities and focusing on a triple bottom line approach to sustainability
