## **Evaluating Family Mental Health History Epidemiology And Treatment Issues:**

Evaluating Family Mental Health John J. Schwab, Judith J. Stephenson, John F. Ice, 2013-11-11 At the time of this writing there is much uncertainty about the form of this country's future healthcare system and the role of psychiatry and other mental health disciplines in that system Current experience with various managed healthcare programs is not encouraging Most often patients with severe psychiatric disturbances receive at best some form of crisis intervention or brief treatment Marital and family approaches to treatment receive even less support This discouraging socioeconomic context makes the work of John Schwab and his colleagues even more important than it would be in more favorable times Their message is clear The family is crucial to an understanding of psychiatric disorders and must often be the major focus in the treatment of these disorders This book is unique in its direct reflection of the senior author's long term professional interests the family epidemiology and history A careful reading provides family therapists and researchers with wonderful opportunities to examine the ways in which history socioeconomic and political contexts and epidemiology can be used to increase understanding of the family This history of the family is unusually thorough in particular I found fascinating the information about early Egyptian families 3000 B C and their accordant high status of women Family Functioning John J. Schwab, Helen Gray-Ice, Florence R. Prentice, 2006-04-18 The family that most fundamental of human groups is currently perceived to be changing in response to social biological cultural and technological developments in our postmodern society While the observed changes in families have been considered by some sociologists to be evidence of adaptation and therefore normal the authors of this volume consider them maladaptive Viewing society from the point of view of clinical psychiatry they point to greatly increased numbers of children born to single mothers soaring rates of divorce a statistically confirmed increase in mental disorders increase in reported incest high rates of depression in younger people and escalation of the amount of reported family violence as evidence that the family as a social institution is in crisis and can either move toward renewed vitality or continued deterioration Perceiving a need to obtain information about family functioning that might lead to the increased stability and well being of this critically important type of system Dr John Schwab and his associates designed and carried out a research program that began with a thorough review of relevant literature beginning with LePlay's study of 300 families in the 1850s and including important recent statistical studies They found that although these studies represent advances in understanding the family system some serious problems with the research remain one of which is confounding variables such as family function and mental or substance abuse disorders so that if a family member has a problem such as drug abuse the family is classified as dysfunctional *Adolescent Substance Abuse* Yifrah Kaminer, 2013-06-29 This volume provides a unique and advantageous perspective to the trainees and practitioners in the adolescent substance abuse field It offers a sophisticated perspective on addiction treatment techniques developed in recent years with a sensitivity to the social and developmental needs of the adolescent Marc Galanter from the Foreword
