Evaporation Loss of Petroleum in the Mid-Continent Field (Classic Reprint) J. H. Wiggins, 2017-05-18 Excerpt from Evaporation Loss of Petroleum in the Mid Continent Field In 1919 the United States was threatened with a shortage of gaso line In spite of this well known fact a detailed field investigation has shown that in one stage only of handling crude oil the volume of gasoline that evaporates is equal to one thirtieth of the country s yearly gasoline production This loss occurs during the few days that the oil is stored on the leases before being taken by the pipe line and in 1919 in the mid continent field alone it amounted to gallons Large as it is it is only a part of the loss on the lease Investigation has further shown that the gasoline in crude oil evaporates from one half to six tenths as rapidly as the same gaso line after being distilled and stored all evaporative conditions being the same About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works Technical Paper - Bureau of Mines United States.
