survey of this phenomenon With recurrent reference to its most famous creators notably William Wordsworth who was the first to consciously explore and delineate those momentous spots in time in his *Prelude* Walter Pater James Joyce and Virginia Woolf this book intends to provide a broad and unbiased exploration into the various types and categories of the moment of moment that can be distinguished ranging from William Blake Ann Radcliffe and Charles Maturin through the nineteenth century sonnet tradition and the naturalistic novel to modernist and postmodernist exponents such as Ezra Pound and Elizabeth Bowen Philip larkin and Seamus Heaney and include contributions by acclaimed experts in the field such as Martin Bidney Robert Langbaum Jay Losey and Ashton Nichols

Opera and British Print Culture in the Long Nineteenth Century Christina Fuhrmann, 2023-02-16 Winner of the 2024 H Robert Cohen RIPM Award from the American Musicological Society Recently studies of opera of print culture and of music in Britain in the long nineteenth century have proliferated This essay collection explores the multiple point of interaction among these fields Past scholarship often used print as a simple conduit for information about opera in Britain but these essays demonstrate that print and opera existed in a more complex symbiosis This collection embeds opera within the culture of Britain in the long nineteenth century a culture inundated by print The essays explore how print culture both disseminated and shaped operatic culture how the businesses of opera production and publishing intertwined how performers and impresarios used print culture to cultivate their public persona how issues of nationalism class and gender impacted reception in the periodical press and how opera intertwined with literature not only drawing source material from novels and plays but also as a plot element in literary works or as a point of friction in literary circles As the growth of digital humanities increases access to print sources and as opera scholars move away from a focus on operas as isolated works this study points the way forward to a richer understanding of the intersections between opera and print culture

Sound, Sin, and Conversion in Victorian England Julia Grella O'Connell, 2018-04-19 The plight of the fallen woman is one of the salient themes of nineteenth century art and literature indeed the ubiquity of the trope galvanized the Victorian conscience and acted as a spur to social reform In some notable examples Julia Grella O'Connell argues the iconography of the Victorian fallen woman was associated with music reviving an ancient tradition conflating the practice of music with sin and the abandonment of music with holiness The prominence of music symbolism in the socially committed quasi religious paintings of the Pre Raphaelites and their circle and in the Catholic Wagnerian novels of George Moore gives evidence of the survival of a pictorial language linking music with sin and conversion and shows even more remarkably that

this language translated fairly easily into the cultural lexicon of Victorian Britain Drawing upon music iconography art history patristic theology and sensory theory Grella O Connell investigates female fallenness and its implications against the backdrop of the social and religious turbulence of the mid nineteenth century
