Event Theory Irene Fast, Robert E. Erard, Carol J. Fitzpatrick, Anne E. Thompson, Linda Young, 2013-12-19 First published in 1985 Routledge is an imprint of Taylor Francis an informa company **Event Theory** Irene Fast, Robert E. Erard, Carol J. Fitzpatrick, Anne E. Thompson, Linda Young, 2013-12-19 First published in 1985 The event model presented in this study attempts a framework for integrating psychoanalytic and Piagetian psychologies centered in the notion that development occurs by the differentiation of self and nonself Its aim is to understand phenomena conceptualized in psychoanalytic terms in a model based on this Piagetian perspective or in other words to provide an object relational model for the development of psychic structure analytic and Piagetian psychologies centered in the notion that development occurs by the differentiation of self and nonself **Selving** Irene Fast, 2013-05-13 In *Selving A Relational Theory of Self Organization* Irene Fast invokes the basic distinction between the self as me and the self as I in order to develop a contemporary theory of the self as subject In a return to Freud's clinical finding that all psychological processes are personally motivated she elaborates a notion of the I self that is intrinsically dynamic and relational Within this conception our perceiving thinking feeling and acting are not what our self does rather they are what our self is According to Fast the basic unit of the dynamic I self of selving is a scheme of personally motivated interaction between self and nonself This notion which comprehends development and developmental failure as a product of integration and differentiation among discrete I schemes provides a radically new framework for understanding those dynamic phenomena that Freud included within his structural model of the mind and that contemporary theorists have addressed within object relational perspectives Via the notion of selving Fast likewise brings fresh insight to a host of issues that have engaged psychoanalysts and developmental psychologists in recent years These topics include the place of bodily experience in a relational model of mind the organization of self as simultaneously individual and relational the formulation of a constructivist model of psychic structure among others Selving is not only a lucid demonstration of how a relational theory of self can reorder clinical observations in conceptually and therapeutically illuminating ways It is also a convincing demonstration of how a constructivist model emphasizing the interactive nature of meaning making provides bridges to Piagetian theory developmental research and observational infancy studies Self-Defeating Behaviors Rebecca C. Curtis, 2013-11-11 In the desert I saw a creature naked bestial Who squatting upon the ground Held his heart in his hands And ate of it I said Is it good friend It is bitter bitter he answered But I like it Because it is bitter And because it is my heart Stephen Crane *The Black Riders and Other Lines* It is the function of great art to purge and give meaning to human suffering wrote Bernard Knox 1982 p 149 in his introduction to *Oedipus Rex* This is done by showing some causal connection between the hero's free will and his suffering by bringing to the fore the interplay of the forces of destiny and human freedom Knox states that Freud was wrong when he suggested that it was the particular nature of the material in *Oedipus* that makes the play so deeply moving and not the contrast between destiny and human will Knox believes that this play has an overpowering

effect upon us not only because we share the tendency of Oedipus to direct our first sexual impulse towards our mother and our first murderous wish against our father as Freud tells us but also because the theological modification of the legend introduced by Sophocles calls into question the sacred beliefs of our time Knox 1982 pp 133 137

Relationality Stephen A. Mitchell, 2022-09-29 This book first published in the year of the author's death expresses Mitchell's vision for the theory of relational psychoanalysis and provides his most developed expression of its foundations Now republished in this Classic Edition Mitchell's ideas are brought back to the psychoanalytic readership complete with a new introduction by Donnel Stern In his final contribution to the psychoanalytic literature the late Stephen A Mitchell provided a brilliant synthesis of the interrelated ideas that describe the relational matrix of human experience Relationality charts the emergence of the relational perspective in psychoanalysis by reviewing the contributions of Loewald Fairbairn Bowlby and Sullivan whose voices converge in apprehending the fundamental relationality of the human mind Mitchell draws on the multiple dimensions of attachment intersubjectivity and systems theory in espousing a clinical approach equally notable for its responsiveness and responsible restraint This remains a canonical text for all relational psychoanalysts and psychotherapists

Patriarchy and Its Discontents Jean Petrucelli, Sarah Schoen, Naomi Snider, 2022-12-30 This anthology of interviews and essays joins luminaries in contemporary psychoanalysis with pioneers of feminism to provide a timely analysis of the crushing effects of patriarchy and the role that psychoanalysis can play in moving us into a future defined by mutuality and respect Departing from the contemporary psychoanalytic view that the socio political and intrapsychic are inextricably linked contributors use psychoanalysis as a tool to demystify and even dismantle patriarchy while also examining how our theories practices and institutions have been implicated in it The issues under examination here include important and often under theorized topics such as institutional responses to boundary violations the search for a black feminist psychoanalytic theory patriarchal enactments within the trans community the persistence of patriarchy within contemporary psychoanalysis and the impacts of patriarchy on diverse patient populations and ways to address this clinically This book represents the first anthology comprised of voices from both within and outside the psychoanalytic realm outlining a contemporary feminist psychoanalysis for both an analytic and non analytic audience It is invaluable for both psychoanalysts and for those in gender studies wishing to draw on psychoanalytic thinking

Paradigms of Clinical Social Work Rachele A. Dorfman, 2015-11-17 This fully integrated volume written by the leading experts in the field of social work presents a wide range of therapeutic paradigms Especially noteworthy is the common framework provided for all paradigms discussed thus facilitating comparison and contrast between each approach These paradigms include cognitive brief oriented and psychosocial therapies as well as Adlerian theory and radical behaviorism

Self, Ego, and Identity Daniel K. Lapsley, F. Clark Power, 2012-12-06 In the midst of the cognitive revolution there has been a veritable explosion of interest in topics that have been long banished from academic consideration under the intellectual hegemony of behaviorism Most notably notions of self ego and identity are

reasserting themselves as fundamental problems in a variety of research traditions within psychology and the social sciences. Theoretical models review articles edited volumes and empirical work devoted to these constructs are proliferating at a dizzying rate. This clearly attests to the nascent interest in these topics, the vitality of these research paradigms and the promise that these constructs hold for explaining fundamental aspects of human development and behavior. Although the renewed academic interest in self, ego and identity is obviously an exciting and healthy development, there is always the tendency for research to take on a parochial character. When boundaries are erected among different theoretical perspectives when empirical findings are viewed in isolation when theories are too sharply delimited and segregated from other domains of behavior then what may seem like progressive healthy and content increasing tendencies in a research paradigm may turn out to be on closer inspection merely an inchoate thrashing about. Fortunately there is an internal dynamic to scientific investigation that tends to combat this degenerating tendency. There is something about the rhythm of science that bids us to transcend parochial theoretical interests and seek the most general theory.

Comprehensive Handbook of Cognitive Therapy Hal Arkowitz, L.E. Beutler, Karen M. Simon, 2013-06-29. In reviewing the Contents of this Handbook edited by Freeman Simon Beutler and Arkowitz I am both impressed and gratified with the enormous strides made by cognitive behavior therapy since the late 1960s. A perusal of the Contents reveals that it is used with adults, children, couples and families; it is clinically appropriate for such problems as anxiety, depression, sexual dysfunctions and addictions and it is employed in conjunction with psychopharmacological and other psychotherapeutic interventions. It was in the mid 1960s when Breger and McGaugh published an article in the Psychological Bulletin taking behavior therapists to task for using only classical and operant principles in devising their therapeutic interventions. Breger and McGaugh argued that the field of learning was undergoing a major revolution paying considerably more attention to cognitive processes than had previously been the case. In short they criticized the growing behavioral orientation for being limited in its exclusively peripheralistic orientation. At the time behavior therapists were initially somewhat resistant to any allusion to cognitive metaphors. Indeed my own initial reactions to the Breger and McGaugh article was quite negative. Yet in rereading their critique many of their suggestions now seem most appealing. No doubt I and my behavior colleagues lacked the appropriate cognitive set for incorporating such contradictory information. Nonetheless the clinical evidence for the relevance of cognitive factors in the behavior change process was simply too compelling to ignore.
