Organizing European Space Christer Jonsson, Sven Tagil, Gunnar Tornqvist, 2000-05-31. This book combines perspectives from political science, history, and geography to provide a comprehensive introduction to Europe or European space as we understand it today. Central to the book is the phenomenon of the sovereign state and the question of alternative ways of organizing Europe politically and economically. The book explores four different ways of organizing space: state, union, region, and network. By tracing the origins of the sovereign state in Europe, the book first reviews the resilience and adaptability of the sovereign state historically and then looks at the implications of the contradictory processes of integration and fragmentation or globalization and regionalization present today. A key concept developed throughout the book is that of networks, especially with respect to the European Union and the relationship between regions, networks, and cities, a relationship long traditional to Europe's political organization. The authors review critically popular notions of a Europe of regions or the end of the sovereign state and instead serve to combine their different disciplinary conceptual tools and perspectives to provide new insights into the future organization of European space. Organizing European Space will be essential reading for all students of contemporary Europe seeking a deeper understanding of the modern state and the complexity of changing notions of identity, political organization, and territoriality inherent in Europe in the past, present, and future.
