*Carl Sandburg* North Callahan, 2010-11-01      **Winds of Change** Louis A. Pérez Jr., 2002-11-25 The first book to establish hurricanes as a key factor in the development of modern Cuba *Winds of Change* shows how these great storms played a decisive role in shaping the economy the culture and the nation during a critical century in the island's history Always vulnerable to hurricanes Cuba was ravaged in 1842 1844 and 1846 by three catastrophic storms with staggering losses of life and property Louis Perez combines eyewitness and literary accounts with agricultural data and economic records to show how important facets of the colonial political economy among them land tenure forms labor organization and production systems and many of the social relationships at the core of Cuban society were transformed as a result of these and lesser hurricanes He also examines the impact of repeated natural disasters on the development of Cuban identity and community Bound together in the face of forces beyond their control Cubans forged bonds of unity in their ongoing efforts to persevere and recover in the aftermath of destruction      **Winds of Change** Ion Bogdan Vasi, 2011-01-12 In recent decades the global wind energy industry has undergone explosive growth and there is still vast potential for wind to supply more of the world's energy Though not only is wind power far from reaching its potential its rise has been uneven and irregular What factors influence the development of the wind energy industry and why has it developed successfully in some places but not in others In *Winds of Change* Ion Bogdan Vasi argues that the development of wind energy is dependent not only on improvements in technology and economic forces but also in large part on the efforts of the environmental movement Vasi defines and analyses three pathways through which the environmental movement has contributed to industry growth it has influenced the adoption and implementation of renewable energy policies created consumer demand for clean energy and changed the institutional logics of the energy sector Vasi uses quantitative analysis to present the big picture of global wind power development and qualitative research to understand why certain countries are world leaders in wind energy while others are relatively underdeveloped Through interviews with renewable energy professionals and campaigners he shows that environmental groups and activists participated actively in energy policymaking pressured various organizations to purchase wind power and formed new companies that specialized in wind farm development He also demonstrates that environmentalists contributed to wind turbine manufacturing by becoming entrepreneurs innovators and advocates *Winds of Change* sheds much new light on how wind energy is adopted and why and demonstrates how activists and social movements can contribute to the creation of new industries      *Carl Sandburg, 1878-1978* George Hendrick, 1978      *Non Solus*, 1977
