Flowers Dried Flower Projects Flower Frame Flower and Herb Leaf Ideas Appendix Conclusion How to Make a Rose Potpourri Crystallized Violets Author Bio Publisher Introduction The art of floral preservation has been en vogue for millenniums all over the world in some form or the other You may have heard of dried flowers dried herbs dried seeds bark roots and even potpourri The only reason why I would want to live in the age of Cleopatra is that the ancient Egyptians knew all about a flower preservation method with which flowers kept their original color shape and looks for more than 6 months after they had been cut Cleopatra s rooms were full of these flowers Unfortunately we have lost this method of preserving flowers with the burning of the library at Alexandria However even up to 1638 Signor Ferrari living in Siena Italy described how flowers could be preserved and kept everlasting and alive Nevertheless the flowers that we dry today do not have their original color not do they have the rich feel of a thing alive What we have is something mummified because it has been dried in sand and silica gel When I was a child I asked my science teacher to give me a little bit of silica gel because I wanted to preserve all the flowers in our garden in all their colors and that nice gentleman told me that the colors changed and turn brown when the water content was removed from that particular plant I believe that was the first disappointment in my young life because I wanted all of those colors and their shapes to last forever But well that secret has gone with the ancient Egyptians Nevertheless today we are drying flowers through air drying processes and this book is going to tell you all about how you can create things of beauty from dried flowers and anything natural which you can dry and turn into a thing of beauty and a joy forever
