European Telecommunications Liberalisation:

European Telecommunications Liberalisation Kjell A. Eliassen, Marit Sjøvaag Nfa, Marit Sjøvaag, 2013-03-04 This book examines the process and consequences of telecommunications liberalisation in the context of an ever closer European Union. The creation of a single market for telecommunications and of a wider European single market mirror one another. Telecommunications are also something of a test case for the privatisation process as this sector has traditionally been a state monopoly. The volume approaches the European experience from three angles: the politics of regulation and the process of liberalisation in the EU including case studies of the UK, France and Germany; increasing global economic interdependence makes international comparisons essential and the volume compares the EU experience with that of the Czech Republic, Israel and Thailand; the consequences of technology and continuous innovation. **European Telecommunications**

Liberalisation Kjell A. Sjøvaag, 1999-05-01 This book examines the process and consequences of telecommunications liberalization in the context of an ever closer European Union. The creation of a single market for telecommunications and of a wider European single market mirror one another. **Telecomm Privatisation and Liberalisation in European**

Telecommunications Willem Hulsink, 2012-12-06 This book combines a detailed sector specific study of comparative telecommunications regimes set in the context of the EC with an extensive historical and empirical analysis of individual policy management and change as experienced by three diverse regulatory cultures: namely Britain, the Netherlands and France. By adopting a comprehensive analytical framework based on far reaching literature, the author explores a wide range of theories addressing key issues at the forefront of contemporary political and academic debate: as do nation states matter in the globalizing telecommunications industry? Does the common challenge of techno global telecommunications restructuring elicit different national responses? What is the significance of a single speed or multi speed Europe in implementing telecommunications governance regimes? **The Privatisation of European Telecommunications** Johan

From, Kjell A. Eliassen, 2017-11-28 This international volume presents a comprehensive comparative study of the transformation of the European telecommunications industry from 1990 to the present. The book focuses on the old incumbent operators and their dramatic change from state agencies to listed companies. It analyzes the liberalization process as well as the corporatization and privatization of these companies. The contributors assess the conditions for the transformations taking place: the driving forces for change; the effects to management; the efforts of the EU during these processes; and ultimately the role of the private owner. Political science publications have all but excluded analysis of the newly privatized companies: their contribution to the liberalization process both before and after privatization; and the interplay between the national political and company levels. The book redresses this shortcoming and also features a double empirical focus in that the main national incumbents in Europe are analyzed and compared to Telenor, the Norwegian former incumbent. *European telecommunications liberalisation* Patricia Boyle, 1998 **Telecommunications Policy-making**

in the European Union Joseph W. Goodman, 2006-01-01 This book offers a good study of the development of telecommunications policy by the EU Great value to those interested in understanding both European telecommunications policy and more generally in how policy making operates in the EU Mark Thatcher West European Politics the book provides an interesting perspective on the evolution of nature of telecommunications policy making within the EU As a consequence the book should be of interest to telecommunications and politics government researchers alike Jason Whalley Communications Booknotes Quarterly This well written book deals with the emergence and shaping of telecommunications policy in Europe with a particular focus on the time period of 1987 1998 This book fills an important gap reviewing the initial formative years of European telecommunications policy development and liberalization in detail The book captures the complicated and interdependent policy formation process in Europe in a credible and thoughtful way without falling into the trap of admiring critical personalities and key actors The author has written an important and useful book which invites the research community to further explore the evolution of European telecommunications policy Erik Bohlin Communications Strategies Examining the emergence of a European Union telecommunications policy Joseph Goodman explains how and why the policy developed as it did and why certain reforms in the sector were easier to achieve than others He provides a history of the key actors in the policy making process from the first attempts by the national postal telegraph and telecommunication administrations to coordinate their telecommunications policies in the 1950s to the implementation of a comprehensive EU telecommunications regulatory structure in 1998 and the development of a new regulatory structure in 2003 The analytical framework employed by the author draws upon new institutionalism and actor based approaches providing an opportunity to evaluate the utility of a synthetic approach for examining and explaining EU policy making The focus of his analysis is on the European Commission s two pronged strategy of liberalisation and harmonisation which began in the late 1980s and culminated in an important milestone on January 1st 1998 when the EU Member States fully opened their telecommunications markets to competition He concludes that a synthetic approach which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis is useful even necessary in understanding and explaining the many dimensions of EU policy making This authoritative study will be of interest to all those in the telecommunications industry including attorneys consultants and lobbyists who would like to know how the EU s policy developed It will appeal more generally to political scientists and scholars of European history and politics *New Opportunities in European Telecommunications* Robert Hall, Paul Lee, 1996-01-01 *Restructuring Telecommunications* P. Curwen, 1997-10-27 The first of January 1998 was the deadline for market liberalisation within the European Union which together with the passing of the USA Telecommunications Act has served to open up major markets in the Telecommunications Industry This book examines the changes that have been occurring in the industry in recent years seeking to impose a coherent structure upon a rapidly changing environment It includes case studies of the UK Germany and

the USA *Universal Service in WTO and EU law* Olga Batura, 2015-10-07 This book is a systematic comparative study of WTO and EU law relevant for universal service provision and a timely contribution to the ongoing scholarly and policy debates about the concept and scope of universal service Universal service is one of the most significant regulatory issues worldwide and it is likely to remain so The central question dealt with by the author is how the technologically intensive sector of telecommunications services can be regulated in a socially fair way in the light of liberalisation and the immense importance of ICTs in the Information Society The author investigates whether the legal frameworks of WTO and EU can meet the challenges of the rapid and dramatic technological and social change and formulates relevant policy recommendations The book is of interest to both scholars and practitioners in several disciplines such as EU and WTO law telecommunications law and regulation political science regarding market regulation and governance as well as European integration and WTO Olga Batura is affiliated to the Leuphana Law School University of Lüneburg Germany and to the European Humanities University in Vilnius Lithuania

Development Centre Seminars Asia and Europe Services Liberalisation OECD, Asian Development Bank, 2003-06-06 This book demonstrates some of the pitfalls associated with services liberalisation but recommends perseverance and even acceleration of the reforms Contributors call for orderly and rapid progress towards regional integration of the services

Globalisation, Convergence and European Telecommunications Regulation Peter Humphreys, Seamus Simpson, 2005-01-01 This book provides an up to date account and analysis of the development of the European Union's regulatory framework for telecommunications in a globalising world A key feature is its treatment of the EU's regulatory policy response to technological convergence in the information and communications sector through its new Electronic Communications Regulatory Framework The book explores in detail the dynamics of the complex relationship between technological and globalisation pressures economic interests and European and national policy responses The authors also examine the achievements and limitations of over twenty years of EU efforts to liberalise markets and to harmonise regulation

Economics and Information Pascal Petit, 2001-11-30 This book explains the way in which information and knowledge are treated in contemporary economic theories and therefore contributes to our understanding of the importance of the strategic organisation of information and the acquisition of know how to the behaviour of modern economies It gathers together contributions of experts on the role of information in the various theories covered specifically in system analysis in game theory in the statistical theory of information in theories of market pricing of financial speculation and of bounded rationality decision making in the evolutionary theory of the firm in the new industrial economics and in the economics of codification Economics and Information is divided into three parts Part One deals with

general theories of information Part Two addresses the role of information in the functioning of markets Part Three considers the importance of information to the operation of organisations Conclusions are drawn in Part Four on the implications for the process of economic growth and for economic policies It therefore provides new insights into some of the puzzling features of recent developments in the so called New Economy

The New Electronic Marketplace George Christou, Seamus Simpson, 2007-01-01 This book breaks new ground by exploring governance strategies that the EU has been developing over the last decade for the growing electronic economy driven by the Internet Through an analysis of key EU policy initiatives the authors provide an explanation of both the form and mechanics of emergent governance arrangements within the European e economy Drawing on data gathered through interviews with key national and EU level policymakers the volume applies theoretical insights from academic work on the regulatory and post regulatory state to situate and explain the EU's role as an international regional actor in a new area of economic activity with important national and global dimensions

External Energy Security in the European Union Matúš Mišík, 2019-03-28 This book explores the positions of small EU members in approaching external energy security using Austria the Czech Republic and Slovakia as case studies It examines when small EU members support and when they oppose further development of cooperation at the European level in external energy security and argues that their preferences depend on their perceived ability to deal with the challenges of their energy policies It finds that small EU members whose decision makers believe that their states can successfully deal with these challenges do not support the deepening of European integration in external energy security as this would mean a loss of competences and vice versa concluding that European integration is considered to be a response to perceived vulnerability This book will be of key interest to scholars students and professionals in EU politics and foreign policy energy policy and security and more broadly to security studies European politics and international relations

Globalisation and EU Policy-making Ian Bartle, 2005 Assesses and contrasts the roles of globalisation institutions and ideas on policy making in the EU Views the creation of liberalised European single markets in the telecommunications and electricity supply sectors out of national monopolies as an example of the dramatic transformation of economic organisation across Europe in the last twenty years Connects micro policy making processes in two industrial sectors to macro international political economy Covers the period from the mid 1980s when the single market came on the agenda through the liberalising initiatives in the 1990s to the new regulatory framework in communications in 2002 and the 2003 directive on the full liberalisation of electricity by 2007 Will be of interest to anyone studying globalisation European integration and policy making regulation and policy in utility sectors
