**The Search for Certainty** W.W. Spradlin, P.B. Porterfield, 2012-12-06 Who are we What are we How do we fit into the world Or into the universe These and other questions pertaining to ourselves and our environment are as compelling to us today as they were to our primitive ancestors Throughout our history we have developed paradigms of thought that have attempted to answer these questions each conceptual framework being particularly relevant to its age We are in the twentieth century witnessing a complete reorganization of our thinking We are now with the aid of technology able to bring together both ancient and new patterns of thought and to observe the emergence of a kaleidoscopic world view that is uniting the once dissonant theories of philosophy religion and science This book sketches an historical picture of three world views that have shaped our ideas about ourselves These conceptual formats that have so influenced us are not mutually exclusive and are present in all of us simultaneously although to varying degrees depending upon our individual biases

[The Souls of Black Folk](#) W.E.B. Du Bois, 2000-11-01 Selected by the Modern Library as one of the 100 best nonfiction books of all time The problem of the twentieth century is the problem of the color line Thus speaks W E B Du Bois in *The Souls Of Black Folk* one of the most prophetic and influential works in American literature In this eloquent collection of essays first published in 1903 Du Bois dares as no one has before to describe the magnitude of American racism and demand an end to it He draws on his own life for illustration from his early experiences teaching in the hills of Tennessee to the death of his infant son and his historic break with the conciliatory position of Booker T Washington Far ahead of its time *The Souls Of Black Folk* both anticipated and inspired much of the black consciousness and activism of the 1960s and is a classic in the literature of civil rights The elegance of DuBois's prose and the passion of his message are as crucial today as they were upon the book's first publication

*From Aristotle to Christ* Louis Markos, 2025-09-23 Discover how Aristotelian thought has shaped Christianity through history and remains relevant for Christians today When Christians of any age country or denomination debate the nature of the good life the soul free will or design Aristotle lies behind their logic as well as their rhetoric

Although Aristotle did not have access to the Bible's special revelation he made full use of general revelation to arrive at deep truths about the nature of God, human identity and the universe. In the Catholic Middle Ages the spiritual vision that undergirded Dante's Divine Comedy was strongly indebted to Aristotle's cosmology and in the Protestant Reformation and Enlightenment the social vision of a well run state was equally indebted to his political science. In a follow up to his well loved book *From Plato to Christ* renowned scholar Louis Markos takes us on a vigorous and celebratory journey through the work of Plato's greatest student demonstrating Aristotle's often unacknowledged influence on the Christian faith. In Markos's hands Aristotle is far from an irrelevant ancient philosopher but is instead an important conversation partner for some of history's greatest Christian thinkers and a thoughtful guide to today's most challenging questions. With this book you'll consider the influence of Aristotle's thought on the Christian faith, carefully analyze several of Aristotle's best known texts, trace Aristotle's influence upon many key theologians in Christian history and understand Aristotle's continuing importance for Christians today. This book is a perfect addition to any classroom that seeks to understand how classical thought intersects with Christianity both past and present. Grab your copy today and explore the relationship between Aristotelian philosophy and Christianity.

[The Spontaneous Self](#) Paul Breer, 2012-10-22  
Many philosophers have argued that free will may be no more than a flattering illusion. Few have gone on however to spell out what life would be like without that illusion. In *The Spontaneous Self* Dr Breer explores the many ways in which our everyday experience is likely to be affected by giving up a belief in free will. Topics include guilt, pride, credit, blame, ambition, fear, identity, power and love. His analysis of what we stand to gain and lose by changing our beliefs draws upon the results of an eight year attempt to dispel the illusion of free will in his own life. *The Spontaneous Self* describes the cognitive/emotional techniques he devised for uprooting the illusion of free will and the personal transformation that followed when he put those techniques into practice.

[The Christian Life and the History of Israel](#) Paul L. Dunteman, 2009-02  
In Israel's history who are the Amorites and the Philistines? Do they represent anything for modern Christians? In this book we can see spiritual problems they represent in the Christian life. **The Problem with Rules** John Churchill,2021-02-23 There is a constant drumbeat of commentary claiming that STEM subjects science technology engineering and math are far more valuable in today s economy than traditional liberal arts courses such as philosophy or history Many even claim that the liberal arts are under siege by neoliberal politicians and cost conscious university administrators In a forceful response The Problem with Rules establishes the essential value of the liberal arts as the pedagogical pathway to critical thinking and moral character and argues for more not less emphasis in higher education John Churchill asserts that the liberal arts are more than decorative frills Drawing from the philosophy of Wittgenstein to craft a cogent inspired argument Churchill insists on the liberal arts indispensable role providing in this book a clarion call to politicians university administrators and all Americans to recognize and actively support and nurture the liberal arts

**Survivism** Dr. Scott Hockin, Ph. D.,2023-08-10 Survivism reveals itself primarily within attempts to solve an unsolicited problem and other accompanying encounters thereof Secondly a movement arises resulting from intelligences deemed necessary to process a vast array of complexities engulfing this otherwise ancient yet modern symbolic Parthenon structure representation hence dynamically riddled with existential change infiltrated throughout a range of time and space What manifests deeply rooted upon its foundational structure are the cornerstone pillars of consciousness emotion rationality and behavior Survivism learns via acquisition of knowledge and experience to grow and develop identities intent to pursue and acquire a higher need of mindfulness shrouded with intellectual guidance and a self determinant personality There too is an equilibrium of functionalities devised to sustain the balance of cognitive flow from within the structural and organizational symbolic complex and then throughout the greater abstract concrescence of social or relational exchanges Survivism maintains motivation to preserve valuation respect negation and comprehensively strive toward actualization Thus survivism remains not only created and exposed of

the aforementioned inputs compounded with a metaphysical ideal process but also profoundly thrives and possesses a real purposeful outcome

*Psychological Concepts and Biological Psychiatry* Peter Zachar, 2000-01-01 This interdisciplinary work addresses the question What role should psychological conceptualization play for thinkers who believe that the brain is the organ of the mind It offers readers something unique both by systematically comparing the writings of eliminativist philosophers of mind with the writings of the most committed proponents of biological psychiatry and by critically scrutinizing their shared anti anthropomorphism from the standpoint of a diagnostician and therapist Contradicting the contemporary assumption that common sense psychology has already been proven futile and we are just waiting for an adequate scientifically based replacement this book provides explicit philosophical and psychological arguments showing why if they did not already have both cognitive and psychodynamic psychologies philosophers and scientists would have to invent them to better understand brains Series A

**Nietzsche and Modern Times** Laurence Lampert, 1993-01-01 This major work by Laurence Lampert provides a new interpretation of modern philosophy by developing Nietzsche s view that genuine philosophers set out to determine the direction of culture through their ideas and that they conceal the radical nature of their thought by their esoteric style From this Nietzschean perspective Francis Bacon and Ren Descartes can be considered the founders of modernity Lampert argues that Bacon s positive claims for science aimed to destroy the dominance of Christianity Descartes continued Bacon s radical program while providing it with the mathematical physics required for its success Far from being solely an epistemological and metaphysical thinker says Lampert Descartes was a master writer whose comic ridicule helped bring down the Church to which he paid lip service Both Bacon and Descartes used the Platonic art of dissimulation to achieve their ends by making their revolutionary aims appear compatible with Christianity Once we recognize Bacon and Descartes as legislators of modern times in a specifically Nietzschean sense we can also see Nietzsche in a new way as the first thinker to have understood modern times and transcended it in a postmodern worldview According to Lampert Nietzsche provides a new foundation for culture a joyous science that reveals the grandeur and purposeless play of the cosmic whole and yet avoids enervating despair or destructive dogmatic belief

*The History of Philosophy* Emile Bréhier, 1966

*Beyond the Wager* Douglas Groothuis, 2024-04-02 There was more to Blaise Pascal than his wager an argument about the existence of God In this accessible study philosopher Douglas Groothuis introduces readers to Pascal s life as well as the breadth of his intellectual pursuits overviewing the key points of his Pensées and exploring his views on culture politics and more
