those assumptions and shows not only that the nation state never left but that it is still a force to be reckoned with. European Audiovisual Policy in Transition Heritiana Ranaivoson, Sally Broughton Micova, Tim Raats, 2023-05-31 This book describes and critically addresses the innovations and shifts made in the revision of the Audiovisual Media Services Directive AVMSD adopted by the European Parliament and Council in 2018. Reflecting on European Union regulation and policy practice in all its Member States, the book's unique approach places in depth case study topics against the broader theoretical background. Taking a Europe-wide angle, an international team of authors focuses on key aspects of the AVMSD: the expansion of its scope to include video sharing platforms such as YouTube; the update of the rules for commercial communications; the first attempt for harmonized minimal requirements at EU level regarding transparency of media ownership; new rules to ensure that video on demand services offer, invest in and prioritise European content; the obligation on television distributors and smart TV manufacturers to pass on broadcasters' signal without any interference, alteration or modification; and the formalisation and consolidation of new forms of collaboration among national regulatory authorities. This thorough analysis of the cornerstone of European media policy makes this edited collection a crucial reference for scholars and students of media and cultural industries, media law and policy, European and EU media policy and technology studies.

From Analogue to Digital Radio JP Devlin, 2018-07-23 This book examines the history of UK radio from its analogue beginnings to its digital future by highlighting the roles played by the BBC and commercial radio in ensuring the medium's long-term success. Beginning as a mere technological innovation, radio developed into a broadcasting model which has sustained for almost one hundred years. The UK model was defined by a public service broadcaster responsible for maintaining standards of broadcasting as well as commercial operators acting illegally and then legally who have sought to exploit radio's economic potential. This book aims to show how both these entities have contributed to the success of radio in the UK, whether acting competitively or by cooperating in order to ensure radio's survival into the next century. This study will appeal to students of media or anyone with a general interest in the history of radio.
