Europe as Empire Jan Zielonka, 2006-04-07 This book seeks to comprehend the evolving nature of the European Union following the fall of the Berlin Wall and the failure of the European Constitution Its prime focus is the last wave of enlargement that has profoundly transformed the EU Although there are many parallels between the European integration process and state building processes the Union is nothing like a Westphalian super state The new emerging polity resembles a kind of neo medieval empire with a polycentric system of government multiple and overlapping jurisdictions striking cultural and economic heterogeneity fuzzy borders and divided sovereignty The book tries to spell out the origin the shape and the implications of this empire The aim of this book is to suggest a novel way of thinking about the European Union and the process of European integration The book shows two Europes coming together following the end of the cold war It proposes a system of economic and democratic governance that meets the ever greater challenges of modernization interdependence and globalization It identifies the most plausible scenario of promoting peaceful change in Europe and beyond The author argues that mainstream thinking about European integration is based on mistaken statist assumptions and suggests more effective and legitimate ways of governing Europe than through adoption of a European Constitution creation of a European army or introduction of a European social model The book covers many fields from politics and economics to foreign affairs and security It analyzes developments in both Eastern and Western Europe It also gives ample room to both theoretical and

empirical considerations      **Women and Gender in Postwar Europe** Joanna Regulska, Bonnie G. Smith, 2012-03-12 Women and Gender in Postwar Europe charts the experiences of women across Europe from 1945 to the present day Europe at the end of World War II was a sorry testimony to the human condition awash in corpses the infrastructure devastated food and fuel in such short supply From Soviet Union to the United Kingdom and Ireland the vast majority of citizens on whom survival depended in the postwar years were women This book charts the involvement of women in postwar reconstruction through the Cold War and post Cold War years with chapters on the economic social and political dynamism that characterized Europe from the 1950s onwards and goes on to look at the woman s place in a rebuilt Europe that was both more prosperous and as tension filled as before The chapters both look at broad trends across both eastern and western Europe such as the horrific aftermath of World War II but also present individual case studies that illustrate those broad trends in the historical development of women s lives and gender roles The case studies show difference and diversity across Europe whilst also setting the experience of women in a particular country within the broader historical issues and trends in such topics as work professionalization sexuality consumerism migration and activism The introduction and conclusion provide an overview that integrates the chapters into the more general history of this important period This will be an essential resource for students of women and gender studies and for post 1945 courses      The European Union's Engagement with the Southern Mediterranean Maria Giulia Amadio Viceré, Giulio Venneri, 2023-09-21 This book addresses the EU s engagement with the Southern Mediterranean It examines the involvement of EU institutions in member states approach to relevant policy issues within the European Neighbourhood Policy and how such involvement affects the EU s overall cooperation with countries in the Southern Mediterranean region In particular the book offers an assessment of the nature and development of integration in the EU s approach to trade and economic development energy security counterterrorism irregular migration and asylum and maritime security In doing so it not only provides a precise and thorough overview of the institutional practices underpinning the EU s engagement with the Southern Mediterranean but also sheds light on the EU s evolution beyond the regulatory polity model      The New World Architecture Jose Magone, 2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s With respect to its international role reorganization of the EU s external relations department was high on the list The New World Architecture explores the contribution that the European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU

multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union
